Number of appointments guaranteed to passed students of the Indian Engineering Colleges,

Read again—

Despatch to the Secretary of State, No. 97, dated 2nd November 1880.

RESOLUTION.—In the Despatch now read the Government of India made an estimate of the number of students entering the Royal Indian Engineering College in 1881 who should be guaranteed appointments in the Engineer Establishment on completing their year of practical training in 1885. This estimate was based on the actual vacancies from ordinary causes in 1879, viz., 30.

2. With the view of gradually absorbing the present supernumeraries and lessening the very large number which must in any case accrue during the next few years, the Government of India has resolved that one-fourth shall be deducted from the total number of vacancies, and that of the remainder, three-fourths shall be obtained from the Royal Indian Engineering College and the Corps of Royal Engineers, and the remaining one-fourth from the Indian Civil Engineering Colleges. This arrangement gives in all only six appointments for India. Of these one should be allotted to the Civil Engineering College, Madras; one to the College of Science, Poona; one to the Civil Engineering College, Howrah; and three to the Thomason College, Roorkee. The students appointed would be employed in Madras, Bombay, Bengal, and the other Provinces, respectively, and the appointments may be made, if there are qualified candidates, irrespective of vacancies in the Engineer Establishment. The above guarantee of appointments applies to the year 1885. For subsequent years, timely notice will be given. Meanwhile existing guarantees must be fulfilled.

ORDER.—Ordered, that this Resolution be communicated to the Governments of Madras, Bombay, Bengal, and the North Western Provinces and Oudh for information and guidance.
