4 Sketch Estimates
Report by the Superintending Engineer
on the plans and estimates for constructing
Straw and Hay sheds for the use of the
O/1st Brigade R.A. at St. Thomas
Mount.

The present sheds are built within
a walled enclosure on Government land
similar to and by the side of those, al-
ready sanctioned in G. O. No. 1395 W. dated
3rd June 1881 for the 1/6th Battery as sho-
wn in the site plan, they are constructed
on poles with thatched roofs of bamboo
rafters & reapers which have to be
frequently repaired at a large outlay
owing to the damages caused by the
wind and white ants. It is thought
that it shall be more economical to
construct these sheds with tiled roofs
consisting of Palmyrah rafters and
reapers

reefers &c as provided in the estimates and supported with brick pillars $1\frac{1}{2}$ ft. square 8 ft high at eaves and 13 ft. at Centre.

Each of the sheds will measure 63×18 and 58×18 ft. respectively and will be built so as to hold the following stores required for 6 months supply in each shed.

No I Shed will contain 40,000 tt of straw nearly in the space of 1086.75×10.5 ^{area} or 11410.8 Cft. excluding the pillars.

No II Shed will contain 34,000 tt of Hay ^{nearly} in the space of 913.5×10.5 or 9591.75 Cft. excluding the pillars.

The plans and estimates amounting to Rs 700 and Rs 600, have been prepared in accordance with Proceedings of the Station Board assembled at St. Thomas Mount on the 30th August 1881. and they have been approved of by the Commander-in-Chief and
Countersigned

Countersigned by the Quarter Master general it is therefore requested that they may be sanctioned and funds allotted so that the work may be undertaken in the current year and [expected to be] completed within 2 or 3 months.
