From Lieutenant W. L. C. BADDELEY, R.E., General Superintendent, Public Works Workshops, to the Chief Engineer, Public Works Department, dated Madras, 26th May 1882, No. 434 W.

I have the honor to submit the report on the Native Apprentices of the Presidency Public Works Workshops for the half-year ending 31st March 1882.

One Apprentice is required in the carpenter's shop to make up the authorised number, and I have arranged to take on a boy who has been working in the shop for about two years.

It will not, I consider, be necessary to entertain Apprentices in the smith and machine shops, as in each of these there are always about ten native boys employed who are practically Apprentices, and who have the same advantages for learning their trade as the boys noted in the accompanying list.
