

GOVERNMENT OF MADRAS.

MILITARY DEPARTMENT.

29th June 1882, No. 3179.

Commissariat Department—Machinery.

Read the following papers :—

No. 531. *From Colonel R. A. MOORE, Acting Commissary-General, to Colonel E. L. HANKIN, Acting Secretary to Government, Military Department, Ootacamund; dated Madras, 9th June 1882, No. 1851.*

I have the honor, with reference to O.G., No. 1614, dated 4th April 1882, to enclose the marginally-noted letter to my address from the General Superintendent, Public Works Workshops, in which he suggests that the makers of the steam engine in use at the Government Bakery should be written to to supply the donkey engine now required, because, in order to admit of a donkey engine of exactly the same pattern as the one now in use being made up by him, it would be necessary to make accurate drawings and wooden patterns of its different parts, which would be very tedious and expensive work.

The Superintendent of the Public Works Workshops took no steps apparently to ascertain what was really wanted, because no reference was made by the Executive Commissariat Officer in his original requisition to any particular kind of donkey engine.

The Executive Commissariat Officer, after applying to the Public Works for a donkey engine for the Government Bakery, very naturally came to the conclusion that the Superintendent of the Workshops would do all that was subsequently necessary in the matter.

The Executive Officer's letter * on the subject is enclosed, and from this it will be seen that Messrs. Massey and Company sent up some one from their works

at once to the Bakery to ascertain what was wanted, and it was not till after they had done so that they sent in their estimate offering to do the needful at a cost of Rs. 560-8-0 in about ten weeks' time.

Major Bruce reports that Messrs. Massey and Company's offer still holds good, and I request I may be favored as soon as possible with the orders of Government as to its being accepted or not. Messrs. Massey and Company say, "We cannot guarantee the pump being similar in every respect, the main outline and working parts are the same, and it will couple up in all respects same as present pump giving no trouble with the erection." The steam engine at the Bakery was supplied † by Messrs. Emmerson and Murgatroyd of Heaton Foundry, Stockport, in 1868.

† *Vide* Proceedings of Government, Military Department, No. 638, of 14th February 1868.

No. 532. *With report from the Controller of Mily. Accounts, 20th June 1882, B.*

No. 533.

ORDER THEREON, 29th June 1882, No. 3179.

Under the circumstances now explained and in supersession of the orders conveyed in O.G., No. 1614, dated 4th April 1882, the Right Honorable the Governor in Council directs that the work in question be given to Messrs. Massey and Company on the terms stated by the Commissary-General in his letter, No. 10808, dated 20th March 1882.
