

GOVERNMENT OF MADRAS.
FINANCIAL DEPARTMENT.

READ—the following paper :—

From A. J. B. ATKINSON, Esq., Acting Collector of Kurnool, to the Chief Secretary to Government, dated Kurnool, 24th June 1882, No. 266.

In reference to G.O., 28th April 1882, No. 346, Financial, I have the honor to submit a report on the Huzur Treasury of this district, as sent by the Executive Engineer, Department of Public Works.

ENCLOSURE.

Report on the Huzur Treasury, Kurnool, by Captain W. JACKSON, Officiating Executive Engineer, dated Kurnool, 17th March 1882.

The "strong room" (20 feet by 18 feet) is in the main building of the Collector's Cutcherry. It has one door opening into a large room, the portion nearest the door being partitioned off by a wooden railing for the use of the Treasurer or Shroff.

The ends of the strong room are enclosed by iron bars rivetted into flat iron, top and bottom, and screwed into stout teakwood frames; they extend to the roof of the building which is of solid terracing.

The teakwood frames should be protected by having sheet iron placed on two sides, inside and out; rivetted through as they are at present, they could be cut away.

There are four iron barred windows with wooden frames, the frames to these windows should also be protected by sheet iron, to prevent them being cut through and the bars removed.

The door, which is an iron one, is secured by a strong hasp and staple, with a good Chubb lock. A chain and padlock in addition to the above is necessary.

The coin is stored in large brass bound boxes, with strong hasp and two Chubb locks to each.

There is a large almira containing stamps in the centre of the room; this should be removed to one side and the boxes containing treasure ranged in the centre.

If this is done all parts of the room will be exposed to the sentry on duty.

There are a number of small boxes about the strong room in which stamps and "current expense" money are kept; these are in charge of the Treasurer and necessitates the opening of the strong room very frequently even during the absence of the Treasury Officer.

This may be obviated by enclosing the space now used by the Treasurer (21 feet by 10 feet) with iron bars, in the same manner as the strong room, and protecting the frames of the two iron barred windows with sheet iron. The Treasurer can then keep his current expense money and stamps (Rs. 5,000 stamps and Rs. 5,000 cash) in his own charge.

ORDER—dated 1st July 1882, No. 611, Financial.

The suggestions of the Executive Engineer should be adopted.
