REMARKS SHOWING CAUSES OF SHORT OR EXCESS OUTLAY.

REMARKS FOR GUIDANCE.

Irrigation Branch.

1. Form "E" is intended for submission by Superintending Engineers to the Chief Engineer and is merely a general abstract for each Division. It will be open to the Chief Engineer to call for, or to the Superintending Engineers to submit, reports for individual works in Form "B" or "C" where such a course may appear desirable.

2. In the Irrigation Branch the Expenditure on Productive Public Works, Capital Account, will be shown under main and sub-heads for each canal in each system; expenditure on other works will be shown under Budget Heads in a lump sum for "Original Works, Major," "Original Works, Minor" and "Repairs."

3. It is to be understood that these returns are not accounts, and although the figured entries should be as accurate as circumstances will allow, promptitude and regularity in their submission is of more importance than in their accuracy. No annas and pies should appear in them. Great care should be taken that the "name of the work" is in all cases absolutely the same as that under which it has been sanctioned.

CIRCULAR MEMO.

Irrigation.

WITH reference to this Office Circular Memo., No. 10-G., dated 11th July 1881, the undersigned has the honor to notify to Superintending Engineers that it has now been determined to make further changes in the Progress Reports submitted to this Office, with the object of decreasing clerical work, and of ensuring punctuality in the despatch and return of the Progress Report in Form B.

2. With a view to effect this, Memo. No. 10-G., dated 11th July 1881, is hereby cancelled, and the following orders are issued for future guidance with regard to the Progress Reports required :—

First.—The Report in Form B circulated with G.O., No. 1064-W, dated 23rd April 1881, will still be submitted monthly for all Major Original Works, *i.e.*, works costing more than Rs. 2,500, but the abstract in Form C will no longer be prepared in this Office, and the original report in Form B will be returned, within two days of its receipt in this Office, with marginal remarks noted on it whenever such may be necessary. As formerly, this report will not be required for Repair Works.

Second.—Form C hitherto required for each division for the month of March in each year will be discontinued.

Third.—In G.O., No. 667 I, dated 24th August 1882, the adoption of a revised Form E, in place of the Form ordered in G.O., No. 1562-W, dated 22nd June 1881, has already been ordered, and will be used in future. This form admits of the outlay on Minor Original Works being shown separately from that on Major Original Works, and such an abstract, together with the special reports on important works required by Form B, will be amply sufficient for this Office in future.

3. It is particularly requested that the utmost punctuality be observed in forwarding Progress Reports, and that they may invariably be despatched so as to reach this Office not later than 20th day of the month succeeding that to which they refer.

(Signed) J. O. HASTED, Colonel, R.E.,
Acting Chief Engineer for Irrigation.
