For remarks with reference to the item "Mathematical instruments 2nd Class - The rate entered in the estimate is Rs 37-3-7, whereas your price list gives Rs 25-12 as the price each.

37-3-7 was the rate in the ledger on 1st April 1882, owing to a large number of boxes recd in Apr Sept 1881 which were issued at the rate of 25/12 but on receipt of the invoice it was found that these boxes ought to have been issued at the rate of 27-9-4; the difference had to be charged off on the balance, hence the change of 37-3-7.

This will now be reduced to 20/4 as per R.O. 2743 of 01st Oct/82

GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

READ—the following papers:—

From A. CRUICKSHANK, Esq., President to the South Arcot Municipalities, to the Chief Secretary to Government, dated Cuddalore, 23rd November 1881, No. 204.

With reference to G.O., dated 21st January 1881, No. 111, Financial Department, desiring that the proposals of the Commissioners of the Cuddalore Municipality for providing a supply of drinking-water to Cuddalore Old Town should be revised in

Enclosures.

- * Two Detailed Estimates.
- One Abstract Estimate.
- Two Plans.†
- One Memorandum from Local Fund Engineer.

† Will follow.

Mr. R. E. Norfor, descriptive of the scheme now proposed and showing what has been done to meet the wishes of the Chief Engineer, and to request that the Government will be pleased to accord their sanction to the scheme.

2. It will be observed that the total cost of the project is now found to be Rs. 10,012, composed of the following items:—

	RS.	A.	P.
Works connected with the upper bund of the Tank Mount			
Capper	5,643	12	6
Works connected with proposed new channel	2,548	10	8
Masonry drain at end of supply-channel	17	8	10
Superintendence	200	0	0
Compensation for land taken up for channel	1,602	0	0

3. An alteration has been made in the plans regarding the passage of the channel under the railway line, in that the pipe proposed to be laid through the railway embankment is made straight instead of with bends as was originally intended. This change was made on the suggestion of the Chief Engineer, South Indian Railway Company, to whom the plans were submitted for an expression of his opinion.

4. With reference to the land that will have to be taken up on account of the new channel, I may state that its value was fixed by the Tahsildar after ascertaining the market price of such land; but I fear that, when the land comes to be required, possession of it will not be obtained without the assistance of Government under Section 19 of the Towns Improvement Act.

5. The sum set apart for the scheme in the current year is Rs. 3,650, of which Rs. 250 were, with the sanction of Government (*vide* G.O., 16th November 1881, No. 2235, Financial Department), transferred to meet charges which it may be found necessary to incur on account of precautionary measures against an outbreak of cholera in the town. Deducting this sum, the amount available for the scheme is Rs. 3,400, which is more than the Commissioners will be able to spend before the close of the current official year. The amount, Rs. 6,612, still required for the work will be provided for in future budgets.
