READ—the following papers :—

From the Superintending Engineer, Fourth Circle, dated 31st August 1882.

READ—the following papers :—

Letter from the President, Taluk Board, Berhampur, dated  
Endorsement by the President, District Board, Ganjam, dated  
Endorsement thereon by the Sanitary Engineer, dated 8th Sept.

Note by the Sanitary Commissioner, dated 13th Sept.

A Koch's pattern well would be particularly suitable for an open well.

Note by the Sanitary Engineer to Government, dated

8. Koch's proposals as regards wells are embodied (see No. 32. well) and such a well, 36 feet deep, will cost about Rs. estimate of Rs. 295.

9. The aim of Koch's proposals is "to give to the people a means of obtaining water against contaminating percolations by means of filtering the case of a simple pump" (meaning a tube well).

10. This can be achieved in masonry wells. The first, say, to a depth of 5 feet with a diameter of 10 feet, that, say, to a height of 10 feet with clean river sand filled up with stiff earth.

Resolution—

The plans and estimate, amounting to Rs. 295, for the Union market at Chatrapur, submitted by the President, with his endorsement read above, are returned for the Sanitary Board's type design for open wells.

2. The remarks of the Sanitary Commissioner about the Koch's pattern well and the proposals of the Sanitary Engineer for wells are of general application and affect the type design already communicated to all Local bodies for information.
