Accountant-General, Public Works Department, Bengal, I have the honor to inform you that five bundles of steel, as noted in the margin, *ex S.S. Gwalior* from London, were received in excess by

the Superintendent of Roorkee Workshops, and as this steel was marked "Madras," it is believed that it was short delivered at such place, for the reasons stated by the Accountant-General the steel has been retained, and if still required in Madras a fresh indent should, it is suggested, be forwarded.

ENCLOSURE.

From Lieutenant-Colonel A. FILGATE, R.E., Accountant-General, Public Works Department, (General,) to the Agent for Government Consignments, Calcutta, dated Fort William, 29th November 1882, No. 741 G.

In reply to your letter No. 4996, dated 2nd instant, I have the honor to state that as it would cost a large amount to send the surplus steel, received by the Roorkee Workshops, from Roorkee to Madras, the Superintendent of the workshops should be informed that he had better keep the steel in question and utilise it hereafter. You should at the same time advise the Madras Government of what has happened, and suggest to that Government that a fresh indent be sent home, if necessary, for its requirements.

No. 2329 C.

Referred to the General Superintendent, Public Works Stores, for report.

No. 201-A.

From Lieutenant W. L. C. BADDELEY, R.E., General Superintendent, Public Works Stores, &c., to the Under Secretary to Government, Public Works Department, dated Madras, 20th December 1882, No. 1623 S.

In returning herewith the papers referred to me for report with your endorsement No. 2329 C., dated 15th December 1882, I have the honor to state that the three first items in the margin of letter No. 5716, from the Agent for Government Consignments, were indented for by this department and short delivered by the S.S. *Gwalior* from London. The last item does not belong to this department.

2. The value of the steel retained by the Roorkee Workshop will be adjusted by issue of a transfer debit advice, and the cost of two bars, round $\frac{3}{4}$ ", and other short deliveries will be recovered from the freight due to the ship.
