To—The Director General of the Post Office of India.

In reply to your memorandum No. 246, dated 30th January 1882, I am directed to say—

- 1st—that Sections 5 and 5A of the Pay and Acting Allowance Code do apply in the
case of absence on privilege leave of an officer whose pay is less than Rs. 100
a month, in the same manner as in the case of absence of an officer whose
pay is not less than Rs. 100 a month; and
- 2^{ndly}—that if it be considered necessary to appoint an officer who has no substantive
appointment under Government to fill a vacancy in the chain of acting
appointments made in consequence of the absence on privilege leave of an
officer whose pay is not less than Rs. 100 a month, such leave should not be
refused upon the ground that as no acting allowances are admissible for the
first thirty days of absence, it will not be possible to employ an officer without
a substantive appointment to officiate. It has already been decided in the
orders in this Department, No. 481, dated 25th January 1882, that an officer
who, without holding any substantive appointment under Government, is
employed as a substitute in the place of an officer absent on privilege leave, is
entitled to acting allowance for the whole period during which he officiates.
This decision applies equally to an officer who, without holding a substantive
appointment, officiates in an appointment in consequence of an officer's
absence on privilege leave, even though the officiating appointment may not
be made in the place of the absent officer.

No 730.C dated 28th March 1882.

Memorandum.

(marked A) The Chief Engineer has the honor to circulate to Superintending Engineers, a statement showing the sums allotted to each circle in the several Budgets of 1881-82 and 1882-83.

It will be observed that greatly enhanced assignments are made available in the latter year, and it will thus be necessary to consider at an early date the arrangements requisite for the vigorous prosecution of work.

2. There may be some little accession of strength of establishment in 1882-83, owing to young Officers and subordinates now undergoing practical training being available for work, but on the whole this will not amount to much, and Superintending Engineers will have to rely mainly on the Establishments at present at their disposal. Any redistribution of the existing Circle Establishments which will provide for the object in view should be carefully considered, and proposals submitted for sanction where necessary.
