Reviewing statements showing the progress made in the disposal of compensation cases in several districts.

The arrears of compensation claims in Bellary are heavy ; but much seems to have been done during the half-year under report (first half of 1881) towards their adjustment.

2. The return from the South Arcot District is for the half-year ending 31st December 1880, and the Board have pointed out the great delay in its submission and the very small progress made during that period in settling the outstanding claims, some of which date so far back as 1853. The Collector must give his personal attention to this subject, to which the Government attach special importance and must see to the punctual transmission of the returns in future.

3. The return from the Kistna District is also for the half-year ending 31st December 1880, and, as observed by the Board, is very unsatisfactory. The number of cases which, at the date of the return, remained undisposed of was 889, of which 102 were more than twenty years old (two dating from 1838), and the explanations given are throughout insufficient. The Government trust that the instructions which the Board have issued will secure to the subject the earnest attention of the Collector, who must insist on his subordinates giving their utmost endeavours to the speedy disposal of these arrears which are scandalous. No doubt the bulk of the cases relate to the Delta Irrigation works and the circumstances are somewhat exceptional, but there can be no sufficient reason for such excessive delay in very many instances. If the regular establishment is unable to cope with the matter, the Collector should submit proposals for temporary additional agency.

4. In Cuddapah fairly satisfactory progress appears to have been made in the first half of 1881.

5. In Tinnevelly the file of outstanding claims is heavy and the progress made towards their adjustment small. A number of cases appear to be pending before the officers of the Public Works Department, and statement No. 2 for the half-year ending 30th June will be referred to that Department for the issue of such instructions as may be necessary to expedite their final disposal.

6. The Government note with satisfaction the progress made in the Godávari District in the settlement of compensation claims during the first half of 1881. The power under the Land Acquisition Act, to which reference is made in the remark on case No. 12 in statement No. 1 from this district, was granted in G.O., dated 8th December 1881, No. 1895. The application for peshkash reduction referred to in the remark on case No. 24 in the same statement was sanctioned so long ago as April last (G.O., 22nd of that month, No. 679). Cases Nos. 4 and 5, if the lands are not now required, should be struck out from the return. The question of *subsequent* Inams in Zamindaris alluded to in Board's paragraph 2 is under consideration.

7. The arrears of compensation claims in Coimbatore are heavy; but needful action towards clearing them seems to have been taken during the period reported on, viz., the first half of 1881.

8. The remark on items 2 and 3 in Statement No. 2 from the Madras District for the half-year ending 31st December 1881 is not clear. If no compensation is payable, there is no need for the entries to appear in the return. With reference to item No. 4, it does not appear what is the cause of the "non-receipt of compensation money," nor is it stated where it is to come from. If in the case of item 6 the acquisition of land has been deferred by order, there is no need for its entry in the return.

9. The Government agree with the Board in regarding the progress made in the disposal of compensation claims during the last half-year in Kurnool to be satisfactory.

10. The two outstanding claims of 1865 and the one of 1873 in Trichinopoly should be adjusted with as little further delay as possible.

(True Extract.)

(Signed) C. G. MASTER,
Secretary to Government.

To the Public Works Department, with two Enclosures to be returned.

Reviewing statements shewing the progress made in the disposal of compensation cases in Several Districts

—

Order thereon, 15th March 1882, No. 306.

The arrears of compensation claims in Bellary are heavy; but much seems to have been done during the half year under report (first half of 1881) towards their adjustment.

2. The return from the South Arcot is for the half year ending 31st December 1880, and the Board have pointed out the great delay in its submission and the very small progress made during

during that period in settling the outstanding claims, some of which date so far back as 1853. The Collector must give his personal attention to this subject to which the Government attach special importance and must see to the punctual transmission of the returns in future.

3. The return from the Kistna District is also for the half year ending 31st December 1880 and as observed by the Board, is very unsatisfactory. The number of cases which at the date of the return, remained undisposed of was 889 of which 102 were more than twenty years old (two dating from 1838), and the explanations given are thoroughly insufficient. The Government trust that the instructions which the Board have issued will secure to the subject the earnest attention of the Collector who must insist on his subordinates giving their utmost endeavours to the speedy disposal of these arrears which are scandalous. No doubt the bulk of the cases relate to the Delta Irrigation works and the circumstances are somewhat exceptional but there can be no sufficient reason for such excessive delay in very

many

many instances. If the regular Establishment is unable to cope with the matter the Collector should submit proposals for temporary additional agency.

4. In Cuddapah fairly satisfactory progress appears to have been made in the first half of 1881.

5. In Tinnevelly the file of outstanding claims is heavy and the progress made towards their adjustment small. A number of cases appear to be pending before the Officers of the Public Works Department, and Statement No 2 for the half year ending 30th June will be referred to that Department for the issue of such instructions as may be necessary to expedite their final disposal.

6. The Government note with satisfaction the progress made in the Godavari District in the settlement of compensation claims during the first half of 1881. The power under the Land Acquisition Act, to which reference is made in the remark on Case No 12 in Statement No 1 from this District, was granted in G.O. dated 8th December 1881, No 1895. The application for peshkash reduction referred to in the remark on Case No 24

in

in the same Statement was sanctioned so long ago as April last (G.O. 22d of that month No 679). Cases Nos 4 and 5, if the lands are not now required, should be struck out from the return. The question of subsequent Inams in Zamindaris alluded to in Board's para 2 is under consideration.

7. The arrears of compensation claims in Coimbatore are heavy; but needful action towards clearing them seems to have been taken during the period reported on, viz, the first half of 1881.

8. The remark on items 2 and 3 in Statement No 2 from the Madras District, for the half year ending 31st December 1881, is not clear. If no compensation is payable, there is no need for the entries to appear in the return. With reference to item No 4, it does not appear what is the cause of the "non-receipt of compensation money" nor is it stated where it is to come from. If in the case of item 6, the acquisition of land has been deferred by order, there is no need for its entry in the return.

9. The Government agree with the Board in regarding the progress made in the disposal of compensation claims during the last half year in Kurnool to be satisfactory.

10. The two outstanding claims of 1865 and the one of 1873 in Trichinopoly should be adjusted with as little fth delay as possible.
