GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

7th October 1879, No. 2,522 W.

General.

Establishment.

Read the following papers :—

No. 9-A. From Major H. M. VIBART, R.E., Acting Superintending Engineer, Third Circle, to the Chief Engineer, Public Works Department, dated Chepauk, 18th September 1879.

WITH reference to your memorandum No. 2,832, dated 27th August (only received by me on my return from the Buckingham Canal on the 7th instant), I have the honor to forward the following.

2. First, as regards North Arcot District, Chittur Division, the taluks to be abandoned would seem to be—

Palmanair, including Punganur and Kangundi Zemindaris.
Chandragiri Taluk, including Kalahasti and Karvetnagar Zemindaris.

There are no works of importance in these.

It is proposed also to abandon all the Chittur Taluk except that part contained within the boundaries of roads from Vellore Railway Station to Chittur, and road from Chittur to Poiney. This will include all the most important tanks, the tanks under Poiney Anicut as well as those affecting the south-west rail.

Gudiyatam Taluk should be retained, as it contains many large tanks and channels fed from the Palar.

In rejected taluks there will be hereafter a few works which will, while in progress, require professional supervision :—

Dispensary at Palmanair.
Bridge over Kuggal river.
Do. Chittur river, &c.

3. North Arcot District, Vellore Division.—Vellore Taluk might be given up (no important tanks); the cantonment and five miles round which would include the bridge and one or two tanks which affect the town should be retained; the Polur Taluk is almost all a jungle, it might be abandoned. There are only two important works, Polur Tank and Aliabad Anicut.

In Wandiwash Taluk there is Chenair Anicut system and little else.

The two most important taluks are Wallajapet and Arcot.

4. South Arcot District.—In the Cuddalore Division there are five taluks, four of these should be retained.

(1) Tirukoilur on account of anicuts and Pennar embankment question.
(2) Cuddalore because of Guddelum Anicut and Pennar embankments.
(3) Virudachalam with the Kottymayloor, Mahmattoor and Virudachalam Anicuts.
(4) Chilambaram on account of Perundurai Anicut and Lower Coleroon.

Kallakurchi Taluk to be given up.

5. In Tindivanam the Villupuram Taluk alone is recommended to be retained. There is some important irrigation, and as there are constant disputes with the French Government an officer is required in this part.

Trinomalai and Tindivanam can be given up.

6. Chingleput.—Saidapet and Chingleput Taluks might perhaps be handed over to the Civil Authorities, with the exception of Chembrumbakam and Red Hills Tanks, the three cantonments of Poonamallee, Pallavaram, and St. Thomas' Mount, and the following roads:—

South trunk road.
West do.
Chingleput, Conjeveram road.
Poonamallee, Tiruvallur road.

7. I do not consider it would be advisable to double up Bangalore with Oosoor Division. It is certainly very necessary to have an officer always (or very nearly so) at Bangalore; whereas if he had the Oosoor Division also he must be absent, I think, two-thirds of his time.

8. As regards the best means of carrying on work in the eliminated taluks, as well as work of a more or less non-professional, together with that of a comparatively unimportant professional, character, the most practicable suggestion I have received is that for each taluk or section of a taluk a contractor should be appointed who should carry on all the above description of works within stated limits. He should furnish a heavy security and sign an agreement binding himself to pains and penalties for failure of contract or bad and indifferent work. He should be made to employ a duly qualified supervisor to prepare plans and estimates for all works and superintend their execution. The supervisor to be the servant of the contractor. Executive Engineer to be, of course, ex-officio adviser of Collector on all professional matters. The supervisor appointed by contractor to be approved of by Executive Engineer as well as the Collector.

9. As regards lightening the clerical work of the office, I think there should be some fixed source from which printed forms of all kinds could at all times with certainty be procured. All correspondence between Examiner and the Executive Engineers should be direct, and not pass through the office of Superintending Engineer as at present.

If powers of Executive Engineers to allot funds to some extent were allowed, the Superintending Engineer's office work would be lightened, and his powers in other ways as regards establishment might, I think, be increased with advantage.

10. To sum up, the taluks to be retained are the following:—

In North Arcot—

Taluks.

Wandiwash.
Wallajapet.
Arcot.
Gudiyatam.

with parts of Vellore and Chittur Taluks.

In South Arcot—

Taluks.

Tirukoilur.
Cuddalore.
Virudachalam.
Chilambaram.
Villupuram.

In Chingleput—

Parts of Saidapet and Chingleput Taluks would be retained including Chembrumbakam and Red Hills Tanks, the three cantonments and certain roads—also the whole of

Taluks.

Ponneri.
Tiruvallur.
Madhurantakam.
Conjeveram.

P.S.—I enclose a list of the establishment of sub-overseers and office clerks with my remarks, which I trust will be of use to you in disposing of the question of reducing the establishments.

(Signed) H. M. VIBART.

No. 9-B. ORDER THEREON, 7th October 1879, No. 2,522 W.

THE Chittur Division will be amalgamated with Vellore, and Tindivanam with Cuddalore, thus forming each of the districts of North and South Arcot into a single division, and the Superintending Engineer will take immediate steps for carrying out these amalgamations.

2. On further consideration His Grace the Governor in Council has determined to amalgamate the Oosoor Division with Salem; Bangalore will therefore remain as at present, but to it will be added the charge of the buildings connected with the Remount Agency at Oosoor.

3. The accounts of the amalgamated divisions will be dealt with in communication with the Examiner, Public Works Accounts, in accordance with the instructions issued at the time of the re-organisation of the department, under the terms of G.O., No. 3,674 W, of 18th September 1878.

4. Captain A. C. Smith will take charge of the South Arcot Division, and Captain McNeil Campbell of North Arcot; as soon as the amalgamation of the Vellore and Chittur Divisions is complete, Mr. Vincent, now in charge of the latter, will proceed to Madura for charge of the Madura Division.

5. The new North and South Arcot Divisions will each have an office establishment of the first-class, and the Superintending Engineer will take immediate steps for reducing the cost of the office establishments of his circle to the amount allowable for the divisions which it includes, on the scale fixed by the order quoted above.

6. It is not desired that the number of individuals should be reduced, or their pay raised, to correspond with the above scale, but merely that the total cost of the establishments is to correspond with it. It will be left to the Superintending Engineer to select the individuals whose services are to be permanently retained under the new arrangements, but he will be guided in his selection by the following principles:—

First, all men over 55 years of age and, second, all incompetent men should be at once given one month's warning of the intention of Government to dispense with their services.

All men not included in either of the above classes, but for whom room cannot be found in the new permanent establishment, should be warned that Government reserve to themselves the right of dispensing with their services without further notice, on such terms as may hereafter be decided on.

7. The men thus warned for discharge should be by preference those who have been but a short time in the service, and who have no claim to pension, but competence and good conduct must in all cases be taken into consideration.

8. The Superintending Engineer will submit, for the consideration and final orders of Government, a list showing the numbers of the office establishment to be—

(*a*) permanently retained,
(*b*) warned for immediate discharge,
(*c*) warned for discharge at the pleasure of Government;

his reasons for the selection being briefly stated in each case, but action in matter need not be deferred until the orders of Government are received.

9. With regard to the future execution of work, the proposals of the Superintending Engineer are generally approved, with the exception of the abandonment of the Vellore Taluk, which the Government consider should be retained in charge of the Public Works Department; that department will also continue to retain charge

of all works in the abandoned taluks irrigating more than five hundred acres; and the actual transfer to other agency of the charge of local funds works must await the result of the discussion with Presidents of Local Fund Boards ordered by G.O., No. 2,428 W, of 25th September 1879.

10. From and after the 31st December next the execution of ordinary repairs to civil buildings and the construction of petty or temporary buildings of all classes limited to 1,000 rupees in each case in all districts will be entrusted to the departments concerned, the balance of the budget grants for the year being placed at the disposal of the local heads of departments; and in future years these petty construction and repair works will be provided for in the civil budgets, and not in those of the Public Works Department.

11. Improvements, new works, and special repairs, will, as a rule, be carried out by the Public Works Department.

12. The Superintending Engineer will submit definite proposals for the strength and distribution of the Upper Subordinate Establishment of his circle, but the total strength of this establishment will not exceed nine Sub-Engineers and Supervisors (together) and twenty-seven Overseers.

13. The Government will be prepared to consider favorably an application for the temporary retention of such extra subordinate establishment as may be necessary for the completion of works now in progress in the areas or of the classes to be given up. Every effort should be made to finish works and transfer charges to the agency selected by the end of 1879; but special works and the necessary establishment for their completion may be retained till the end of the official year if necessary.

14. The Government desire to get rid as soon as possible of the permanent petty establishment, and every endeavour should be made to induce its members to retire, but they are not at present prepared to order the dismissal of any individual; no new appointments are to be made to this establishment.

15. The Government are not at present prepared to pass orders on the suggestions contained in paragraph 8 of the letter under consideration. Superintending Engineers have already, it is considered, sufficient discretion as to the selection of the agency by which works under the charge of the Public Works Department are to be executed. As regards works under the charge of the Local Fund Boards, the latter must be left free to select their own agency.

No. 193.

ORDER—dated 27th October 1882, No. 2834 W., Public Works.

In paragraph 5 of Proceedings in the Financial Department, No. 2502, dated 22nd December 1881, the large unexpended balance of the allotments made to Civil Officers for works of petty construction and repair was noticed, and it was suggested that this was probably due to the want of time on the part of Civil Officers to attend to work of this character, which might, it was thought, be advantageously retransferred in some districts to the Public Works Department.

2. Before a final decision on the question was come to, it was considered * desirable that inquiry should be made both from Public Works and Civil Officers as to the working of the present system, the partial failure of which might possibly be found to be due to Civil Officers not properly exercising their powers of sanction, in which case time and practice would it was thought overcome the difficulty.

* G.O., No. 71 W., dated 11th January 1882.

3. The letters read above are the replies of the officers concerned, which are summarised as follows :—

Superintending Engineer, First Circle.—With regard to petty irrigation works is of opinion that, where such works have already been transferred to the Revenue Department, it would be inadvisable to retransfer them to the Public Works Department, and that where they have not yet been transferred to the Civil Department (as in the Vizagapatam and Ganjam Districts) they should at once be made over, it being quite impracticable for the Public Works Department to attend properly to the wants of hundreds of tanks, while the officials of the Revenue Department are sufficiently numerous and widely distributed to attend promptly to necessary repairs. (It may here be remarked that the petty irrigation works of Vizagapatam and Ganjam have since been transferred to the charge of Civil Officers—*vide* G.O., No. 425 I., dated 31st May 1882.)

As regards other petty construction and repair works, the Superintending Engineer considers that, while departments concerned should be able to carry out promptly for themselves really petty work, the limit of Rs. 1,000 is too high, and that it would be better to reduce it to Rs. 200, beyond which work often requires professional skill.

Superintending Engineer, Second Circle.—States that, except in the upland taluks of his circle where the Public Works Department have no establishment, petty work *can* be undertaken by the department, but that at the same time it would in every way be better that such petty work should be carried out by Civil Officers themselves, who should apply to the Public Works Department for aid only in cases of extensive repairs or failure of buildings.

Superintending Engineer, Third Circle.—Would strongly deprecate any proposal to retransfer to the Public Works Department the work of petty construction and repair of civil buildings.

Superintending Engineer, Fourth Circle.—Considers that the present system will work well after some little time and practice, and that unless the Public Works Department be considerably strengthened it cannot undertake petty construction and repair works.

Superintending Engineer, Fifth Circle.—Expresses no opinion as to the advisableness or otherwise of the proposed measure, but states merely that if the work be retransferred to the Public Works Department it will be necessary to strengthen the Presidency Division by three Overseers and one Draughtsman, and (so long as Lieutenant Falvey is in charge of the Bangalore Sub-division) by one Assistant or Sub-Engineer; and that in the South Arcot and Chingleput Divisions probably one additional Overseer will be required for each.

Superintending Engineer, Sixth Circle.—Civil Officers should have no difficulty in carrying out their own petty construction and repair works; considers the proposed retransfer uncalled for, and highly inexpedient, and that it would lead to the neglect of more important work, for the due performance of which even the present strength is totally insufficient.

In the Civil Department, the majority of Collectors are in favor of making no alterations in the existing arrangement, which is said to obviate delay, correspondence, and friction, and to be on the whole economical. The only Collectors who suggest the retransfer of the work to the Public Works Department are those of Ganjam, Madras, Nílgiris, Malabar, South Arcot, and Nellore. The Board of Revenue agree with the majority of Collectors, and remark that 1880-81 being the first year in which such work was transferred to the Civil Department, no fair conclusion can be arrived at from the short outlay which then took place. The Board however have no objection to the retransfer to the Public Works Department of petty construction and repair work in districts so exceptionally circumstanced as Madras and the Nílgiris. In the former district the reason urged is that, as there is a Public Works Department establishment on the spot, the work can with advantage be executed by it; and in the Nílgiris that labor is scarce, wages high, and material difficult to procure.

4. It would thus appear that the general concensus of opinion, both among Public Works and Civil Officers, is against any general retransfer of these petty works to the charge of the Public Works Department.

5. As regards such exceptional districts as Madras and the Nílgiris, further references were made to the Superintending Engineers, and from their replies it would appear that petty works in these localities might advantageously be carried out by the agency of the Public Works Department.

6. Orders will accordingly issue in the Financial Department transferring the works in the Nílgiri and Presidency Divisions to the Public Works Department with the unexpended balances of funds during the current official year.

7. The question of increasing the staff of the Nílgiri Division will be separately considered on renewed representation after the works have been taken over, and some experience gained as to the additional work involved.
