JUDICIAL.

Issued

Recd. 13/1/83 Encl.

G.O., 6th January 1883, No. 11.

JANUARY.

Jail Manufactures.

Intimating that the proposal made by the Superintending Engineer, Fourth Circle, to have all wood-work for new buildings made up at the Central Jails, is inadmissible.

ORDER -dated 6th January 1883, No. 11, Judicial.

The proposal made by the Superintending Engineer, Fourth Circle, is clearly inadmissible in the face of the Resolution of the Government of India communicated with G.O., 21st October 1882, No. 1643. That Resolution, while including "hand-sawing of timber" among permissible jail industries, distinctly prohibits prison labor being employed upon "carpentry" which Colonel Beatty is understood to refer to by "making up wood-work."

GOVERNMENT OF MADRAS.

JUDICIAL DEPARTMENT.

READ—the following paper:—

From Colonel J. BEATTY, R.E., Superintending Engineer, Fourth Circle, to the Chief Engineer, Public Works Department, dated Coimbatore, 13th December 1882, No. 537.

I have the honor to request you will be good enough to get me sanction of Government to have all wood-work for new buildings, as far as possible, made up at the Central Jails.

2. I suggested to the Inspector-General of Jails that the teakwood-work of the quarters proposed to be built for the Superintendent of the Vellore Jail might be made up at the Penitentiary at Madras, but he seemed to think that the late Resolution of the Government of India would forbid this.

3. I may be mistaken, but it seems to me that the preparation of materials for public works in jails is allowable, though not definitely requested by the Government of India, under paragraph 15 of the Resolution circulated with G.O., No. 3042, of 16th November 1882.

4. I would propose to get work to be done with Burma teak carried out at the Penitentiary, Madras; with Anaimalai teak and Vengay wood at Coimbatore; and with Vengay and Burma teak at Cannanore. The Forest Department would probably be able to arrange to supply the jails with timber, and thus that department would be benefited, while a special opening would be created for the employment of jail labor in connection with public works.

5. I have consulted the Superintendent of the Central Jail of Coimbatore, and he thinks there would be little difficulty if Government give their sanction. Mr. Grimes, I may mention, built his house entirely with jail labor, and made up all the wood-work, which is very good, with Vengay wood and Anaimalai teak.

6. I urgently want sanction to make use of the jails in this way, because some of our arrangements for carrying on buildings in progress are failing, or likely to fail, because of the great rise that has lately taken place in the price of Burma teak.

7. If the wood-work be also fitted up in the new buildings with jail labor, that department would be credited with the amount provided in the estimates for the wood-work, *minus* the cost of carriage to site.

No. 2353-C.

Endorsement on the above.

Transferred to the Judicial Department with the observation that there will be no objection on the part of this department to give the system a trial.
