PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

No. 183.

READ—the following papers:—

From Colonel T. E. TENNANT, Inspector-General of Jails, to the Chief Engineer and Secretary to Government, Public Works Department, dated Ootacamund, 23rd August 1882, No. 218.

The Warders attached to the Zillah Jail at Vizagapatam have no proper accommodation at present, and quarters are required for the Deputy Jailor and Head Constable attached to the jail; I therefore have the honor to submit the accompanying plans and estimates, amounting to Rs. 4,050, for the sanction of Government.

- 3 Plans.
- 1 Report.
- 1 Specification.
- 1 Detailed Estimate.
- 1 Abstract Estimate.
- 1 Letter from the Executive Engineer, No. 280, dated 6th July 1882.

Warders' Lines.—With regard to the plans, I beg to remark that the Warders' line should face to the north; a yard 12' x 12' at the rear will be required. The walls of these yards can be built by prison labor. The basements should be raised at least 1' 6" and all wood-work thoroughly tarred, but these items are not provided for in the estimate.

Head Constable's Hut.—The best site for the Head Constable's hut will be to the southern end of the present Police lines, as marked by me in pencil. A yard will be required at the back of the hut; the basement should be raised and the wood-work tarred.

Deputy Jailor's Quarters.—As this officer's presence is constantly required, and it is necessary that he should live within easy call, I propose that his house be built next to the Dresser's quarters, as marked in pencil on the site plan. The plan and estimate for the Deputy Jailor's quarters being the same as for the Head Constable, the same additions (backyards, &c.,) are necessary.

2. The soil of Vizagapatam is infested with white-ants, and experience has proved that it is bad economy to build foundations in stone and mud. The walls should be laid with stone and chunam for the height at least of 3 feet from the basement, otherwise the white-ants will pass up the walls into the roofing; all stone-work in chunam ought to be perfectly well grouted in each course; this may be done by the prisoners.

3. The amount of the estimate can be met from the Convict Labor Fund.

No. 1629 C.

Forwarded to the Superintending Engineer, First Circle, in view to the plans and estimate being revised in accordance with the remarks of the Inspector-General of Jails. Early return requested.
