The scantlings of vapour are I think
sufficient. These of timber & of series are
not quite correct but my stand as the
difference could be slight.
as regards posts & brissumers the latter
are weak, but half the number appear
to be the old brissumers shifted to new
positions, and as I presume they were
found sound & suitable in their old position
they may be used again the brissumers
being possibly the same. Therefore the design
has my stand.
Sanction - but I remark that openings
for ventilation over the windows & doors
or below posts & plates would probably be
desirable. (1)

NOTE OF REMARKS.

1. The enclosed plan and estimate
provide for the addition of
a room to the Tahsildar's
Cutchery at Poddapur, to
serve as a Sub-Registrar's
office. Amount of estimate
is Rs. 1940.
2. The details of estimate have
been submitted but it may
be seen from the plan that
the scantlings of timbers are
not in accordance with
the standard specification
and it would be advisable
if the scantlings of posts
and brissumers were
increased.
3. Both plan and estimate
have been countersigned
by the proper Genl. of Registrar.
