GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General
Establishment.

No. 207.

READ—the following letter from J. W. RUNDALL, Esq., Superintending Engineer, Second Circle, to the Chief Engineer for Irrigation, dated Masulipatam, 26th December 1882, No. 1799 K.S. :—

I have the honor to acknowledge the receipt of G.O., No. 972 I., dated the 2nd instant, authorizing me to entertain establishment for the new Central Division, One Map.

Kistna. Since the receipt of this order, Mr. J. Hannan, Executive Engineer, has been appointed to the charge of the new division and has already joined the district.

2. I have not received any instructions as to the way in which the present Eastern Division is to be split up. I beg to submit the following proposals, and request the favor of early orders on the subject.

3. I assume that it is intended to divide the Eastern Section of the Delta into two parts, and that each of the two Executive Engineers shall hereafter have all the work within the limits decided on, including the maintenance of existing works and the distribution of water. I assume also that there will be three Sub-divisional Officers attached to the Executive Engineer having his headquarters at Bezvada.

4. Stated broadly I would make the head works with workshop and quarries, the Ellore Canal, the Bank Canal, the Masulipatam Canal and the Pulleru up to Marrivada into one division.

5. The Pulleru below Marrivada, the Polaraz Canal, the Bantumilli Canal and all the country below Pamarru to the north of the Masulipatam, including all the drainages except the Lazzabanda drain, would form the other division. Ryves' Canal must be split up, the work under (2) Main Canals and Branches being attached to the old division, and the work under the distributaries, with the exception of one or two channels above Komatigunta weir, being attached to the new division.

6. I forward a map showing the proposed boundaries of the two divisions. The old division had better continue to be called the Eastern Division, but as the new division lies entirely to the east of the old one, to call it the Central Division would be a misnomer, and it would be better to call it the Gudivada Division.

7. The headquarters of the Eastern Division must continue at Bezvada, but the headquarters of the new division should be at Gudivada.

8. The sub-division boundaries should be as follows :—

EASTERN DIVISION.

Headquarter Sub-division.—Anicut, Head Works, Quarries and works at Bezvada, including Main Canal.

Northern Sub-division.—Ellore Canal, Masulipatam Canal, 1st Reach, Bank Canal and River Embankment to Vallur and Ryves' Canal.

Southern Sub-division.—Bank Canal from Vallur downwards, Masulipatam Canal from Kankipad downwards, West Side Channel, Pulleru to Marrivada and Lazzabanda Drain. The latter work can be better supervised from Masulipatam than elsewhere.

GUDIVADA DIVISION.

Cowtaram Sub-division.—Pulleru from Marrivada, Polaraz Canal, Bantumilli Canal, and drainages between them and Polaraz Drain. Headquarters at Cowtaram.

Gudiváda Sub-division.—Ryves' Canal Distributaries, Chendrayakodu Drain, and new Gudiváda Channel. Headquarters at Gudiváda.

9. I would propose that Mr. Whiteley, Assistant Engineer, who has lately completed his practical course, be posted to the Cowntaram Sub-division.

10. I can attach Honorary Assistant Engineer Muhammad Khasim Sahib to the new division, and the two Overseers at present in the portion of country transferred will be posted to the Gudiváda Division.

11. But as I am short of two Upper Subordinates in the Kistna Western Division, I request that another Overseer may be posted to the circle at an early date for duty in that division. I will apply for the second temporary Overseer sanctioned as soon as it is found that a man is wanted.

12. It is not, I consider, either advisable or necessary to add any portion of the present Western Division to the charge on left bank of the river.

13. If it is thought that as regards area the new division has been made somewhat too large, it is to be remembered that the officer in charge of the old division will have an immense amount of work in connection with the supply of materials to all three Delta Divisions: the supervision of the workshops and supervising the licensing of boats, &c., will all fall to the Eastern Division.

14. The proposed arrangements will not, I think, involve any difficulties between the two divisions as regards water regulation and distribution. All that will be necessary is for the officer at Gudiváda to intimate the depth of water he requires at Komatigunta weir and Pamarru bridge. As soon as a connection is made with the Upputeru the surplus arrangements will be much improved. After the Polaraz Canal has been carried through, if the officer at Bezváda cannot, for any reason, reduce water at once, the Gudiváda officer will be able to pass on surplus to the Upputeru.

No. 8 E.W.

Forwarded to the Chief Engineer, Public Works Department.

2. The appointment of Mr. Whiteley, Assistant Engineer, to the new Kistna Division is recommended, and also that of one temporary Overseer.

3. The arrangements proposed by the Superintending Engineer have been discussed with him, and are approved by the undersigned.

CAMP, SANGAM,
15th January 1883.

Note by the Acting Chief Engineer for Irrigation.

* In the above letters the Superintending Engineers, Second and Sixth Circles, apply for an office establishment in connection with the work to be carried out by the proposed Kistna Central Division and Cauvery and Vennar Regulator Divisions. It is recommended that, under the authority conveyed in the telegram from the Government of India, printed with Proceedings of Madras Government, No. 2213 W., dated 28th August 1882, the Superintending Engineers be authorized to appoint office establishments according to the scale laid down in Proceedings of Madras Government, No. 2592 W., dated 4th October 1882. And further that as the Superintending Engineer, Sixth Circle, in anticipation of the sanction of Government, has already made certain appointments, retrospective effect, from 1st instant, be given to the sanction now accorded.

Kistna Central and the Cauvery
and Vennar Regulator
Divisions.

Regarding Office Establishment for the
and Upper Subordinates for the former divi-
sion.

No. 1799 Ks.

Superintending Engineer's Office,
2nd Circle, Masulipatam
26th December 1882

From

The Superintending Engineer,
2nd Circle.

To

The Chief Engineer
for Irrigation

Sir,

I have the honor to acknowledge
the receipt of G.O. No. 972 I dated the 2nd
Instant, authorising me to entertain Establish-
ment for the new Central Division Kistna.
Since the receipt of this order, Mr. J. Hannan
Executive Engineer has been appointed to the
Charge of the new Division and has already
joined the District.

2. I have not received any instructions
as to the way in which the present Eastern
Division is to be split up. I beg to sub-
mit the following proposals and request
the favor of early orders on the subject.

3. I assume that it is intended
to divide the Eastern Section of the Delta
into two parts, and that each of the two

Executive Engineers, shall hereafter have all the work within the limits decided on, including the maintenance of existing works, and the distribution of water. I assume also, that there will be 3 Sub-Divisional Officers attached to the Executive Engineer having his Head Quarters at Beguadā.

4. Stated broadly, I would make the Head works, with Workshop and Quarries, the Ellore Canal, the Bank Canal, the Masulipatam Canal, and the Pulleru up to Marri-nāda into one Division.

5. The Pulleru below Marri-nāda, the Polariy Canal, the Bauntunilli Canal and all the country below Pāwama to the north of the Masulipatam, including all the drain-ages except the Lazzahanda Drain would form the other Division. Ryues' Canal must be split up, the work under (2) Main Canals and Branches, being attached to the old Division, and the work under the Distributaries, with the exception of one or two channels above Komatigūsta Weir, being attached to the New Division.

6. I forward a map showing the proposed

boundaries of the 2 Divisions. The old Division has better continue to be called the Eastern Division but on the new Division lies entirely to the east of the old one, to call it the Central Division would be a misnomer, and it would be better to call it the Guduvāda Division.

7. The Head Quarters of the Eastern Division must continue at Beguadā, but the Head Quarters of the New Division should be at Guduvāda.

8. The Sub-Division boundaries should be as follows:-

Eastern Division

Head Quarter Sub-Division. Ancient Head works, Quarries and works at Beguadā, including Main Canal.

Northern Sub-Division. Ellore Canal, Masulipatam Canal 1st Reach, Bank Canal and River Embankments to Vallur and Ryues' Canal.

Southern Sub-Division. Bank Canal from Vallur downwards, Masulipatam Canal from Kankipād downwards, 1st Side Channel, Pulleru to Marri-nāda and

Lazza Kunda Drain. The latter works can be better supervised from Masulipatam than elsewhere.

Gudivada Division

Cowtaram Sub Division. Puttur from Marriada, Polaray Canal, Banturumalli Canal, and drainages between them and Polaray Drain. Head Quarters at Cowtaram.

Gudivada Sub Division. Ryves Canal Distributaries, Chundrayakodu Drain, and New Gudivada Channel. Head Quarters at Gudivada.

9. I would propose that Mr. Whitely, Assistant Engineer, who has lately completed his practical course, be posted to the Cowtaram Sub Division.

10. I can attach Honorary Assistant Engineer Mahomed Khasim Sahib, to the New Division and the 2 Overseers at present in the portion of Country transferred will be posted to the Gudivada Division.

11. But as I am short of 2 Upper Subordinates in the Kistna Western Division, I request that another Overseer may be posted to the Circle at an early

date for duty in that Division. I will ^{sanctioned,} apply for a second temporary Overseer as soon as it is found that a man is wanted.

12. It is not I consider either advisable or necessary to add any portion of the present Western Division to the Charge on left bank of the River.

13. If it is thought, that as regards area, the new Division has been made somewhat too large, it is to be remembered, that the Officer in charge of the old Division will have an immense amount of work in connection with the supply of materials to all three Delta Divisions; the supervision of the workshops and superintending the licensing of Boats &c will all fall to the Eastern Division.

14. The proposed arrangements will not, I think, involve any difficulties between the 2 Divisions as regards water regulation and distribution. All that will be necessary is for the Officer at Gudivada to intimate the depth of water he requires at Komatigunta weir and

Kanaru Bridge. As soon as a connection
is made with the Upper river, the surplus
arrangements will be much improved.

After the Polaray Canal has been carried
through, if the officer at Beywada cannot,
for any reason, reduce water at once, the
Gudwada Officer will be able to pass on
surplus to the Upper river.

I have the honor to be,

Sir,

Your most Obedt. Servant.
