GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers:—

From Colonel T. E. TENNANT, Inspector-General of Jails, to the Chief Engineer, Public Works Department, dated Ootacamund, 16th September 1882, No. 252.

I have the honor to submit, for the sanction of Government, the accompanying plan and estimate, amounting to Rs. 5,714, for constructing a store-room in the Penitentiary at Madras.

2. The printing and book-binding department at the Penitentiary Branch of the Government Press have been lately considerably extended, and the Superintendent of the Government Press represents that a large store-room is much required for keeping stationery, &c. I have satisfied myself that the proposed store-room is necessary. The work can be carried out departmentally, and funds are available from the Convict Labor Fund.

3. The estimate allows for asphalting the floor. I would, however, recommend that concrete and Portland cement should be used, as this style of flooring is harder and more durable than asphalte.

From Colonel H. L. PRENDERGAST, R.E., Superintending Engineer, Fifth Circle, to the Chief Engineer, Public Works Department, dated Chepauk, 18th June 1883, No. 1059.

With reference to your memorandum, No. 1748 C., dated 29th September 1882,

I have the honor to submit an estimate of Rs. 6,425, prepared in the regular form, for the construction of a new store-room and boundary wall for the Printing Office at H. M's Penitentiary at Madras.

2. The estimates provides for a floor of concrete in Portland cement in lieu of asphalte as suggested by the Inspector-General of Jails in his letter, No. 252, dated 16th September 1882.

From Colonel T. E. TENNANT, Inspector-General of Jails, to the Chief Engineer, Public Works Department, dated Ootacamund, 21st June 1883, No. 161.

I have the honor to invite attention to this office letter, No. 252, dated 16th September 1882, forwarding plan and estimate, amounting to Rs. 5,714, for constructing a store-room in the Penitentiary at Madras.

2. The Superintendent of the Government Printing Press brings to notice how urgent is the need of store-room accommodation. I therefore request you will be good enough to obtain the early sanction of Government, so that the work may be commenced without delay.

3. I would suggest that a portion of the grant of Rs. 30,000 provided in the budget for a new District Jail at Kurnool be made available for the work.

4. The work will be executed departmentally.

No. 1059

Her Majesty's Penitentiary at Madras—Submitting an estimate for the construction of a New Store Room and boundary wall for the printing Office at—prepared in the regular form.

Dated in Council this
for the Inclosures

Returning the plan & Estimate for Constructing a store-room and boundary wall for the printing office at the Madras Penitentiary the Chief Engineer has the honor to inquire whether it would not be advisable to substitute teak for the wrought iron rods provided for struts of trusses. It is further observed that the low head-way allowed to the verandah at entrance may possibly prove inconvenient when Stores are being shifted and if this objection holds good, it is requested that the plan may be remodled accordingly.

2. It is noticed that the revised Estimate has by no means been Carefully prepared.

NOTE OF REMARKS.

1. The enclosed plan and estimate are resubmitted provide for the construction of a store room and boundary wall for the printing office of the penitentiary at Madras. Amount of estimate is Rs. 6,425.

2. The resubmission of this estimate arises from the Insp.r Genl. of Jails having requested (No. 2525 of 16/9/82) when the original was sent in, that certain alterations might be effected in the proposed flooring; and that certain changes might be made in the estimate form — these alterations have been effected but still it must be said both plan and estimate have been carelessly prepared even now

3. It is intended to use wrought iron rods, inch in diameter, for struts as well as for king posts, forge perhaps that while the

strain in the king-post is tension, that in the strut is pressure. The scantlings for timbers are according to the Standard Specification.

4. The certificate has not been countersigned by the Inspr. Genl. of Jails.
