With reference to G.O., No. 1668 W., dated 1st July 1882, I have the honor

General of Registration.

No. 215-A.

From G. T. WALCH, Esq., Officiating Superintending Engineer, First Circle,
to the Chief Engineer, Public Works Department, dated Penugole, 3rd
January 1883, No. 573 V.Z.

With reference to your No. 2398 C. (returned herewith with enclosures), I have
the honor to state that the dimensions for doors and windows entered in the esti-
mate* are clear "inside of frames," and
the size of openings in the masonry there-
fore will, it is thought, be as shown in the standard design; if, however, the sizes in
that design are intended to be those clear inside the frames, then the dimensions given
in this estimate should be increased by 6 inches in height and breadth, the amounts
under the items in question being correspondingly increased.

No. 215-B.

Note by the Chief Engineer, Public Works Department.

Submitted for the sanction of Government.

2. The Superintending Engineer is correct in supposing that the dimensions of doors and windows given in the standard plan are inclusive of frame-work, but it is observed that the estimate as originally submitted did not show that the sizes therein given were clear inside of frames.
