

PROCEEDINGS OF THE BOARD OF REVENUE.

READ--the following letter from H. E. STOKES, Esq., President, Local Fund Boards, Tanjore, to the Secretary to the Board of Revenue, dated Vallam, 28th November 1882, No. 2421:—

I have the honor to forward the budget estimates of the Negapatam Circle for 1883-84.

2. The delay in the appointment of a separate Engineer which is dwelt on in the budget memorandum as the cause of short expenditure in the current year is due to the late receipt of sanction to the proposals. The sanction was conveyed in the budget orders which did not reach me till the middle of October. The delay in the receipt of the budget has had more to do with the short fall than the want of Engineering Establishment.

3. In the budget for 1883-84, the Local Fund Board have provided the contributions for an additional Deputy Inspector of Schools and for an elementary normal school, but under protest and with a request that the charges may not be incurred. If primary education is to be developed as it ought to be and might easily be in such a circle as Negapatam, an additional Deputy Inspector and possibly provision for normal instruction of teachers are essential. But both or either will produce little effect if the Local Fund Board are allowed as proposed to reduce the scale of result grants to two-thirds of the rates now given. I certainly think the educational policy of the Board to be fatal, and recommend that the allotment for results grants be raised. The provision for the current year will itself be insufficient if the increase in the number of schools, aided and inspected, which should result from the increase in the staff, is secured. If the Board of Revenue and Government are prepared to impose a policy on the Local Fund Board, I would recommend that the provision for result grants be increased to Rs. 1,500 under combined system schools and to Rs. 7,500 in results schools' proper; and I would provide the excess by omitting the normal school contribution, by reducing the grant for scavengering of large villages which the Local Fund Board propose to increase by Rs. 2,020, and by striking out the contribution to the Madras Medical College. This outlay on scavengering appears to me to be in great measure useless as the establishments entertained are too small to produce, even if judiciously worked, any appreciable effect on the sanitary condition of the villages and working as they do (or do not) almost without supervision, they produce no effect at all. Nothing is attempted except superficial street cleaning.

4. I fully agree in the remarks of the Local Fund Board on the absurdity of requiring that details of the grant for improvement of water-supply and for minor sanitary outlay shall be given in the budget. I would strike out all details and leave the amounts in the lump. As the Local Fund Board provide for stipendiary students in the Prince of Wales' medical school in Tanjore, and will not require any Government medical subordinate now being trained in the Medical College, Madras, I think the contribution to that institution should be struck out.

ENCLOSURE No. 1.

Memorandum by the Vice-President, Local Fund Board, Negapatam, dated 20th November 1872.

Regular Estimate of 1882-83.—The year opened with a balance of Rs. 2,90,505 against a budget balance of Rs. 2,32,610, the difference being due to short expenditure during 1881-82. As explained in paragraph 9 of the Administration Report for 1881-82, the reason was the want of Engineering Establishment to carry out work.

2. The chief item showing any noticeable variation between the figures in the regular and budget estimates under head "Receipts" is "Contribution for works." Only a thousand rupees and odd had been collected in the first five months of the year, and though steps have been taken to expedite collections of promised subscriptions, it cannot be expected that more than Rs. 5,000 in all will be collected against the budget estimate of Rs. 7,000. The receipts from avenues have so far been small, and the sum of Rs. 2,500 in the budget has been reduced to Rs. 1,500 in the regular estimate. The only other variation is "Sale of books and Miscellaneous," which is fluctuating:

3. The total assets are Rs. 5,11,085.

4. The charges are—

	RS.
Road Fund...	2,48,281
General Fund ...	77,154
Endowment Fund ...	4,891
Total ...	3,30,326

The closing balance is therefore Rs. 1,80,759 (or Rs. 1,80,760).

5. The expenditure on New Works—Communications for 1882-83 is taken at about Rs. 95,000 out of Rs. 1,45,000 and odd, and the expenditure on Civil Buildings is similarly reduced. The reason is that the circle have not even yet been provided with an Engineer, though more than half the year has passed, and the budgeted items were unusually large. On Repairs (Communications), the outlay is estimated to reach as nearly as possible the full allotments, and it is hoped that the expectation will be realized. The charges for Public Works Department supervision have been reduced according to instructions, and the charge for "Tools and Plant" reduced to 1½ per cent., both for Department of Public Works and Other Agency, as the expenditure under the latter head has always been much lower than the estimate. "Establishment—Other Agency is reduced from Rs. 22,760 to Rs. 14,200, owing to there having been no Engineer or separate establishment (as provided in the budget) up to this time. Government in G.O., No. 1043, dated 28th August last, communicated with Board's Proceedings, No. 7068, dated 11th September 1882, sanctioned the investment of the Railway Guarantee Fund. The sum thus invested (Rs. 58,000) is shown as expenditure.

6. Under *Grant II*, savings to the extent of Rs. 6,600 are expected from (a) the non-opening of the elementary normal school, (b) the late publication of the list of schools sanctioned for examination under the results grants rules (not received from the Inspector of Schools till June last), and (c) sundry savings from the allotments in favor of schools.

7. *Grant III.*—The maintenance of hospitals and dispensaries cost the Board about Rs. 5,300 up to September last. As nearly all the medicine indents have been paid for, there will be a saving under this head owing to the cutting down of these indents in Madras. The dieting of patients has also been reduced with reference to the actuals of the past and current years. On tank works the probable outlay is put at Rs. 6,000, the same sum as that spent during 1881-82. The Local Fund Board have agreed to pay half the actual cost of the maintenance of the Negapatam Municipal Hospital and its branch during 1881-82 and 1882-83. The contribution for 1881-82 will be paid in this year. Hence the increase. On the whole grant, it is estimated that there will be a saving of about Rs. 5,500.

The other items of charges for the year do not call for any remarks.

8. *Budget, 1883-84.*—There is a balance of Rs. 1,80,760 (in round numbers) to start with as stated in paragraph 4 above. The year's income is estimated at Rs. 2,10,060, and thus the total is Rs. 3,90,820. The sum is thus distributed:—

	RS.
Road Fund ...	2,98,590
General Fund ...	80,220
Endowment Fund ...	12,010
Total ...	3,90,820

Excluding the Railway Guarantee Fund and the Road and General Fund Reserves the amount actually available for budgeted expenditure is Rs. 3,32,790, which is thus distributed:—

	RS.
Road Fund ...	2,43,720
General Fund ...	77,060
Endowment Fund ...	12,010
Total ...	3,32,790

The fishery rents have been put at one half the receipts of the current year (*vide* Board's Proceedings, No. 2242, dated 14th March 1882), and nothing has been entered under "Surplus Pound Fund," as the Board are informed that, owing to the cost of building pukka pounds according to orders, there will be no surplus available. The receipts from "Canal and Ferry Funds" are lower than usual. The figures have been supplied by the President, who divides the fund between the two circles, the estimated total being supplied by the Collector. "Avenues" are put at Rs. 1,500 with reference to past actuals, the amount hitherto budgeted, Rs. 2,500, having never been realized. "Contributions for digging tanks" are put at Rs. 4,000 only. The regular estimate for the current year is Rs. 5,000 against a budgeted amount of Rs. 7,000, and with the very low rates at present quoted for paddy, it cannot be hoped that a larger amount than Rs. 4,000 will be collected from Mirassidars.

9. The proposed expenditure under *Grant I* aggregates Rs. 2,29,370 including the Road Fund Reserve. New Works—Communications are estimated to cost Rs. 87,880 against Rs. 1,34,000 entered in the budget for 1882-83, and none of the items call for any remarks, almost all the works having been already budgeted in former years. Estimates have been called for where necessary, and will be submitted as soon as received.

10. There is an increase under maintenance of roads. Some of them having been metalled are allowed higher rates, and some new roads just completed are for the first time allotted funds for their up-keep. The grant for Road No. 1 in the Nannilam Taluk is reduced to Rs. 100 a mile at the suggestion of the Local Fund Engineer.

11. The cost of supervision by the Department of Public Works and cost of Department of Public Works Tools and Plant are calculated at 23 and 1½ per cent. respectively, according to the Revenue Board's instructions. The same percentage (1½ per cent.) only is allowed for tools in the Local Fund Engineer's Department as the 2½ per cent. hitherto allowed is never spent. The expected collections of the Railway Guarantee Fund during 1882-83 are to be invested in Government securities, and are therefore shown on the expenditure side under this grant.

12. *Grant II, Education.*—A sum of Rs. 1,500 is entered as contribution towards the pay of an additional Deputy Inspector, and another Rs. 1,500 as the cost of the normal school class in accordance with the strongly expressed views of the Educational Department, approved by Government in paragraph 6 of their Proceedings, sanctioning the budget of 1882-83, No. 954, dated 16th August last. But the Board must point out that their funds do not really admit of the additional expense. The items of a permanent nature in this General Fund budget without these charges amount to Rs. 59,180 while the receipts amount to Rs. 52,810. And this is after reducing results grants this year by one-third of the rates hitherto allowed. Not only therefore is there nothing whatever available out of income for the important items of Reserve, improvement of water-supply and occasional charges, but the permanent charges are considerably in excess of the income, which must produce a most lamentable result. There is this year an opening balance of Rs. 27,400, and so all these charges can be met. But the year closes with no balance, and the reserve has been reduced very largely below what it should be by rule. It is obvious therefore that next year the fund will reach the verge of a hopeless bankruptcy. The Board recommend that both these items be omitted. They consider that miscellaneous sanitary improvements, a reserve for incidental works of public utility, and the importance of financial stability are of larger importance. It is true that the omission of this sum of Rs. 3,000 will bring the estimated expenditure below the amount which should be set apart for education according to rule, but this is merely due to the largeness of the opening balance, which, as half of it should by rule be devoted to education, accidentally and abnormally increases the total amount available for education according to this rule. Next year, while the expenditure must be the same, the items being permanent, the educational share of the fund calculated according to this rule will be very much smaller and much less than the expenditure as there will be no opening balance; so that even as a question of rupees, the educational interest will not suffer, while it must be obvious that it is to its advantage to keep whatever is undertaken constant and permanent rather than to burst out into expenditure on establishments in one year which next year must be dropped or abolished.

13. In order to reduce as much as possible expenditure in this fund, the additional teachers recommended by the Deputy Inspector of Schools are omitted, and the rates of results grants in both the combined and results system schools are reduced to two-thirds of those now prevailing (*viz.*, full grants).

14. Annexed is an abstract of the cost proposed under this grant:—

	RS.
* Contribution towards the cost of the additional Deputy Inspector	1,500
* Do. do. of the additional class in the Tanjore Normal School	1,500
Inspecting Schoolmasters	2,020
Local Fund Schools	14,520
Results Grants	4,000
Purchase of Books, &c.	230
Total	23,770

* Recommended to be omitted.

15. Under *Grant III*, the allotment for hospitals includes the salary of the medical subordinates of the Civil Apothecary Grade. The items of "Medicines, &c.," "Supplies," and "Dieting patients" have been considerably reduced with reference to actuals (*vide* notes on regular estimate) and to the necessity of economy in the General Fund as already explained. The slight variations under contingent charges have all been approved of by the District Surgeon, Tanjore. But his proposals to employ additional servants in some dispensaries have necessarily been laid aside, funds being short. The increase proposed to the midwife of the Tranquebar Hospital has also not been entered for the same reason.

16. This Board lately sanctioned a rupee as daily batta to the Deputy Inspector of Vaccination, and this is accordingly entered in the budget.

17. Under "Improvement of water-supply," only tank works for which contributions are promised are entered. This is the usual course. The Board would, however, remark that the present system is objectionable. These promises are fulfilled in a most dilatory manner. Sometimes the amount is not paid for two or three years; sometimes not at all. In the meantime, the Board's contribution is locked up in the budget estimates, and of the total allotments, only about half can be spent. The Board earnestly request permission to give in future detailed items only where the money has already been contributed and is available, and that for the rest, lump sums of so much per taluk be entered, which the Board can expend during the year as seems necessary. Of the merits of this petty tank and well repair, they must necessarily be the only judges, and it seems that in this way the public money is spent to the greatest advantage and with the greatest economy. Were there nothing else, the selection, a year-and-a-half in advance, of the wells which will require cleaning is, on the face of it, an absurdity.

18. The increase under scavenging of large villages, &c., covers the cost of additional establishments already sanctioned.

19. The increase under Chattram Establishments is to provide for the Gumastah employed to look after the business of the Kallimodu chattram.

20. Under *Grant IV*, the contribution for the Controlling Establishment at the Presidency is entered as directed by the Revenue Board.

21. The General Reserve is Rs. 3,560. This is less by Rs. 1,720 than the amount required by rule, but no more is available. There is no closing balance in the General Fund. The closing balances in the other funds are—

	RS.
Road Fund	70,460
Endowment Fund	7,820
Total	78,280

READ—the following letter from H. E. STOKES, Esq., President, Local Fund Boards, Tanjore, to the Secretary to the Board of Revenue, dated Vallam, 28th November 1882, No. 2424:—

In paragraph 6 of G.O., No. 954, dated 16th August 1882, Financial Department, the opening of a normal school in Negapatam Circle was sanctioned; provision for an additional Deputy Inspector of Schools was ordered to be made, should the Local Fund Board agree with the Director; and a recommendation of the Director regarding additional teacher for a certain school was noticed.

2. I have the honor now to enclose these resolutions of the Local Fund Board, Negapatam Circle, from which it will be seen that the Local Fund Board has rejected

these proposals on the ground of want of funds. The decision with regard to an additional Deputy Inspector will have soon, I trust, to be reconsidered, as the number of schools for examination in 1881-82 was 258, almost more than one officer can deal with in a year; but the number may become smaller if the reduction of grants suggested is permitted for next year. The retrenchments applied to the educational expenditure of the Local Fund appear to me to be mistaken, but can be considered with greater advantage when the budget is sent up.

ENCLOSURE No. 1.

Extract from the Proceedings of the Local Fund Board of the Negapatam Circle at the Special Meeting held on the 7th November 1882.

1. The Vice-President proposes that for the proposition of an elementary normal school which has not been opened, the idea of an additional class in the Tanjore school be substituted for the present and be kept in view, funds not being available for a school of our own.

Approved. But as the Board have suggested to Government the striking out of the item of Normal education altogether, the class will not be opened until their orders are received on the matter.

READ—the following letter from Surgeon A. J. STURMER, Secretary to Surgeon-General with the Government of Madras, to the Secretary to the Board of Revenue, dated Madras, 7th December 1882, No. 6386:—

I have the honor, by desire of the Surgeon-General, to report to your Board that the sum set apart in *Grant III* of the 1883-84 Local Fund budget estimate of the Negapatam Circle for the maintenance of the dispensaries is sufficient.

2. A sum of Rs. 1,050 is entered as contribution towards the expenses of the Medical College.

READ—the following letter from Deputy Surgeon-General M. C. FURNELL, M.D., F.R.C.S., Sanitary Commissioner for Madras, to the Secretary to the Board of Revenue, dated Madras, 26th December 1882, No. 1331:—

I have the honor to report, for the information of the Board of Revenue, that the budget allotment for vaccination and sanitation of the Negapatam Local Fund Circle for the year 1883-84 calls for no special remarks, except that no provision appears to be made for improvement of village-sites, which is to be regretted. The lump grant of Rs. 22,550, which gives a percentage of 51 on the estimated available income, though less than the grant for the current year by Rs. 2,750, or 6 per cent. of income, may be accepted. The distribution is as follows:—

	RS.
Improvement of water-supply	7,880
Scavenging establishments for twenty-three towns and villages	12,760
Other sanitary outlay including sanitary arrangements during fairs and festivals	1,910
Total	22,550

The vaccination grant is the same as that for the current year, viz., Rs. 3,800. It may be accepted; the establishment employed appears to be ample.

READ—the following letter from H. B. GRIGG, Esq., M.A., Director of Public Instruction, to the Secretary to the Board of Revenue, dated Madras, 19th January 1883, No. 220:—

I have the honor to submit the following remarks on the budget estimate of the Negapatam Circle for 1883-84.

Receipts.—The educational assets of the circle are estimated at Rs. 24,880, exclusive of a moiety of the General Fund opening balance:—

One-sixth Land Cess	...	...	...	...	...	RS.
School Fees	...	...	...	...	...	22,000
Sale of Books	...	...	...	...	...	2,600
Contribution for Educational Inspection	...	...	...	...	...	200
						80
Total	...	...	...	...	...	24,880

No credit, however, is taken for the results grants which the Local Fund Schools are likely to earn from Provincial Funds for the higher standards. I beg to point out that in Statement III, the total receipts from school fees are given as Rs. 2,500, while in Statement I, it is given as Rs. 2,600. I presume that the deficiency of Rs. 100 appertains to the proposed normal school and was erroneously omitted to be entered in the statement. The total of receipts against the Tediur School is wrongly entered as Rs. 100, instead of Rs. 80.—

3. *Charges.*—The total expenditure budgeted for the ensuing year amounts to Rs. 23,770 against Rs. 27,950, the sanctioned estimate for 1882-83:—

		Budget, 1882-83.	Budget, 1883-84.
		RS.	RS.
Inspection	...	2,020	3,520
Training Schools	...	4,000	1,500
Local Fund Schools	...	15,590	14,520
Results Grants	...	6,000	4,000
Miscellaneous	...	340	230
Total	...	27,950	23,770

4. *Inspection.*—Besides Rs. 2,020 for Inspecting Schoolmasters, a sum of Rs. 1,500 is provided as contribution to Provincial Funds towards the pay of a Second Deputy Inspector of Schools for the circle. This sum and a similar amount provided for the normal school, the Circle Board desires to omit. The reason assigned by the Vice-President for the omission is to prevent the General Fund from reaching the verge of hopeless bankruptcy next year, as its closing balance for the year will be *nil*. The Vice-President also states that there is no advantage in undertaking educational operations which cannot be maintained. While making the above statements, the Vice-President admits that the omission of the sum of Rs. 3,000 will bring the estimated expenditure below the amount which should be set apart for education according to rule. I beg to state that the recommendation of the Circle Board does not commend itself to me. From the figures in paragraph 2, it is clear that *exclusive of the opening balance* the normal educational assets alone more than cover the proposed expenditure, leaving a balance of Rs. 1,110 to the credit of the Board, without taking into account receipts from Provincial Funds for the higher standard grants. I do not wish to undertake the financial difficulties, but there is reason to think that before long Local Boards will possess means of largely supplementing their resources for dealing with General Fund expenditure whilst to continue to deal with collection as it is now dealt with is seriously to check its progress in the very direction in which the State desires in this, if any part of the country, it should progress. Two measures are essential for sound progress—the education and training of teachers and the better supervision of schools without their aid, advance must be uncertain and of indifferent inequality. I would therefore strongly urge the retention of the items in the budget. Moreover it seems to me that the stipends in the combined schools are unduly high and funds might be found by reducing the average fixed pay to a figure ranging from Rs. 4 to 6 *plus* 50 per cent. of the results grant. The fixed stipend will suffice for the teachers' maintenance. I am also prepared to sanction a grant from Provincial Funds for masters' salaries and stipends to normal students under the rules of the Grant-in-aid Code, in the event of the school being established. It must not be forgotten that the population of this circle is nearly one million.

5. *Training Schools.*—The provision of Rs. 1,500 made under this head is to take the form of opening an additional class in the Tanjore normal school. I am,

however, of opinion that it will be more advantageous to the circle if it has a normal school of its own. For this purpose the sum now provided will, I think, be sufficient. I therefore propose that a normal school, with the following establishment, be opened in a suitable locality in the circle:—

		RS.
Head Master	..	35
Assistant	...	20
Peon	...	5
Contingencies	...	5
House-rent	...	10
Ten Scholarships at Rs. 5 each	...	50
Total	...	125 per mensem.
		12
		1,500 per annum.

All special charges may be met from fees to be raised in the Practising School.

6. *Local Fund Schools.*—A sum of Rs. 14,520 is provided under this head. The decrease of Rs. 1,000 compared with the figure for the preceding year is on account of reduction in the results grants to Combined System Schools and in Miscellaneous Items.

7. *Results Grants.*—The allotment under this head is reduced by Rs. 2,000, owing to the proposal of the Circle Board to give only two-thirds of the maximum rate. Both the Inspector and the Deputy Inspector of Schools are of opinion that the reduction of the grants to Results Schools will operate materially against the progress of elementary education. I concur in this view. The Deputy Inspector of Schools, however, proposes that full grants be given to pure Results Schools, and 50 per cent. of the full rates to Combined System Schools. I have already recommended, in a preceding paragraph, the reduction of the rates in Combined Schools and also the reduction of fixed stipends. If this is done, the saving, together with the sum of Rs. 1,110 noted in paragraph 4 *supra*, should suffice to keep the rates in Results Schools proper at the maximum for a year, or until the changes in Local Fund Administration are settled.

8. *Miscellaneous.*—The entry under this item is on account of purchase of books and commission on their sale. It calls for no remark.

9. *Educational Charges.*—The Educational assets of the circle are estimated at Rs. 24,880, while the proposed charges come to Rs. 23,770, thus leaving a balance of Rs. 1,110, which will be utilised if the proposal suggested in paragraph 7 above be adopted.

RESOLUTION—dated 28th March 1883, No. 857.

The Local Fund Budget of the Negapatam Circle for 1883-84 is herewith submitted for the orders of Government.

REGULAR ESTIMATE, 1882-83.

2. *Receipts.*—The opening balance agrees with that advised by the Accountant-General, and is as follows:—

		RS.
Road Fund	...	2,32,563
General Fund	...	50,223
Endowment Fund	...	7,719
Total	...	2,90,505

Compared with the estimate in the budget, there is an increase of Rs. 57,895, due to short expenditure in 1881-82, especially on works, as noticed in paragraphs 4 and 5 of Board's Proceedings, dated 25th October 1882, No. 2584. The income from Avenues is reduced from Rs. 2,500 to Rs. 1,500, with reference to the receipts of the first five months. The total amount expected to be assigned to Local Funds from the Canal and Ferry Fund of the Tanjore District in the current year's regular estimate of the Special Funds is Rs. 17,040, of which Rs. 8,000 were taken credit for in the Local

Fund Budget of the Tanjore Circle. The remainder, in lieu of Rs. 10,000, will therefore be entered in the present estimate. Under Land Cess, it is anticipated that the whole of the amount, Rs. 1,76,000, entered in the sanctioned budget, will be realized, leaving only Rs. 9,220, or 5 per cent. of the demand, uncollected at the close of the year. This is very satisfactory. The President will explain why the collections of the cess during the first five months entered in Column 2 of the regular estimate differ from those given in the Treasury account for August last, as shown below :—

	Ordinary.	Railway Guarantee Fund.	Total.
	RS.	RS.	RS.
Regular Estimate ...	72,095	23,921	96,016
August Accounts ...	71,209	23,723	94,932
Difference ...	886	198	1,084

Private contribution in aid of works shows a falling off of Rs. 2,000; for a larger sum than Rs. 5,000 cannot, it is said, be expected in spite of all endeavours to expedite the collection of promised subscriptions. The other items of revenue follow closely the figures in the sanctioned budget. "Interest on arrears of cess," under which, according to the monthly Treasury accounts, Rs. 292 were realized up to the end of August last, is omitted to be shown in the regular estimate. The amount will be entered. The assets are—

Road Fund ...	RS.
General Fund ...	3,93,545
Endowment Fund ...	1,04,563
	12,309
Total ...	5,10,417

3. *Expenditure.*—The probable expenditure on "New Works—Communications" is entered as Rs. 94,873, against Rs. 1,34,000 provided in the budget. The reason of the short expenditure is said to be the non-appointment of a Circle Engineer owing to the late receipt of sanction. Under Road Repairs, Rs. 59,925 are provided, against Rs. 53,630 in the budget. It is observed that the amount assigned for expenditure by the Public Works Department on the incomplete works of 1881-82 is Rs. 3,231 and not Rs. 4,413, as entered in the Remark column of the regular estimate (Board's Proceedings, dated 25th October 1882, No. 2586). The provisions for Civil Buildings and Miscellaneous Public Improvements are well within the allotments sanctioned in the budget and subsequently by the Board. Owing to the non-employment of an Engineer, the cost of the Engineering establishment is reduced from Rs. 22,760 to Rs. 14,200. A sum of Rs. 58,000 out of the Railway Guarantee Fund represents an investment in Government promissory notes as sanctioned in G.O., dated 28th August 1882, No. 1043. Under Grant II there are considerable savings, due to causes which will be noticed further on. The budget provisions of some of the items under Grant III have been raised without prior sanction. This is contrary to the instructions contained in Board's Proceedings, dated 21st August 1882, No. 2095. The entry of Rs. 1,120 against Vaccine Inspecting Agency will be struck out, as no charge under that head will be incurred in the current year. The whole of the Road and General Fund Reserves having been allotted, the amounts under those heads will also be struck out. The other items do not call for special notice. In the abstract appended to the regular estimate, Rs. 4,350 are debited to the Endowment Fund under Grant III. The cost of the endowed choultries being Rs. 2,170 and that of the endowed dispensaries payable from this fund being Rs. 1,640, the total amount chargeable under Grant III to the Endowment Fund is only Rs. 3,810. The President is requested to explain why Rs. 4,350 have been debited. The following is the regular estimate of charges :—

Items.	Road Fund.	Endowment Fund.	General Fund.	Total.
	RS.	RS.	RS.	RS.
New Works—				
Communications ... { By P. W. D. ...	14,263	...	...	14,263
Civil Buildings ... { By Other Agency ...	80,610	...	...	80,610
Miscellaneous Public Improvements ...	...	...	2,500	2,500
Repairs—				
Communications ... { By P. W. D. ...	14,453	...	...	14,453
Civil Buildings ... { By Other Agency ...	45,472	...	...	45,472
Miscellaneous Public Improvements ...	...	531	2,169	2,700

These balances will be taken to the budget of 1883-84.

BUDGET FOR 1883-84.

4. *Statement I-A—Receipts.*—Receipts from Fishery Rents have been reduced by one-half, with reference, it is stated, to Board's Proceedings, dated 14th March 1882, No. 2242, wherein the Board expressed the opinion that the exclusive right of fishing should not continue to be sold in the absence of legal provision protecting the right. No assignment is expected from the Pound Fund, as the surplus will be spent in constructing and repairing pounds. In the Canal and Ferry Fund Budget as revised by the Board, Rs. 6,000 are entered as available for transfer to Local Funds in this district. As nothing is credited under this head in the Tanjore Circle, the whole amount is available for this circle. Under Land Cess, the current year's estimate is repeated. Out of a total demand of Rs. 1,83,520, Rs. 1,76,000, or 95 per cent., are expected to be realized. Tolls show a slight improvement. The receipts from Avenues are put down at Rs. 1,500, and it is stated that the estimate is based on the past actuals and that the amount budgeted in previous years (Rs. 2,500) was never realized. This does not seem to be borne out by facts according to the collections of the past five years noted in the margin. The other items of revenue do not call for special notice. The total amount available for expenditure is Rs. 4,00,370 as shown under :—

	Avenue Receipts.	RS.
1877-78 ...	2,250	
1878-79 ...	1,938	
1879-80 ...	2,805	
1880-81 ...	17,921	
1881-82 ...	2,508	
Road Fund ...	...	3,05,130
General Fund ...	...	83,230
Endowment Fund ...	...	12,010
Total ...		4,00,370

5. *Expenditure, Grant I, Public Works.*—Under "New Works—Communications," Rs. 87,880 are provided, of which Rs. 2,660 are to be expended by the Public Works Department and the balance by the Local Fund Engineering Establishment. Besides twenty-six roads (of which three are minor works costing Rs. 1,000 or less) specified

in Statement II-A, Part I, a lump provision of Rs. 10,000 is made for constructing ferry roads. The President is requested to specify the names of these roads, and to expedite the submission of estimates for all unsanctioned works. Under "Civil Buildings," Rs. 3,500 are assigned for constructing four dispensaries. Estimates for three of these to the aggregate value of Rs. 13,630 have been sanctioned and a revised estimate for the Tiruvalūr Dispensary is promised. Rs. 500 are allotted for planting new avenues and Rs. 1,000 for keeping up the existing ones. The provision for road repairs is Rs. 53,590, against Rs. 53,630 entered in the current year's budget. The cost of Public Works Department Supervision at 23 per cent. on the total outlay of that department on New Works and Repairs is Rs. 2,230, and not Rs. 2,460 as entered by the Vice-President. For the Local Fund Engineering Establishment, the same figure as in the current year's budget is entered. The Road Fund Reserve should be Rs. 10,660. The share debitable to the Road Fund of the cost of the Engineering Establishment, of Tools and Plant and of General Management is, respectively, Rs. 21,870, Rs. 2,120 and Rs. 4,900. A sum of Rs. 44,000, the expected Land-cess collections during the current year on account of the Railway Guarantee Fund, is proposed to be invested in Government securities. The total Road Fund expenditure amounts to Rs. 2,27,500, leaving a balance of Rs. 77,630, of which Rs. 44,000 appertain to the Railway Guarantee Fund.

6. *Grant II, Education.*—Rs. 23,770 are provided under this grant, against Rs. 27,950 in the current year's budget. The decrease is under Training Schools and Results Grants. In regard to the former, a provision of Rs. 1,500 is made for maintaining on account of this circle a class of students at the Tanjore Normal School, instead of opening a separate Normal School in the circle, as was originally proposed and sanctioned. Even this provision the Local Fund Board would cancel to prevent the General Fund becoming bankrupt. The Director of Public Instruction is strongly in favor of having a Normal School, and states that a school can be established at the same annual cost of Rs. 1,500 as shown below, instead of the one on a larger scale sanctioned in G.O., dated 16th August 1882, No. 954:—

Head Master	...	...	...	...	...	Rs.
Assistant	...	...	...	...	...	35
Peon	...	...	...	...	...	20
Contingencies	...	...	...	...	...	5
House-rent	...	...	...	...	...	5
Ten Scholarships, at Rs. 5 each	...	...	...	...	...	10
						50
						125 per mensem.
						12
						1,500 per annum.

He also promises a grant-in-aid from Provincial Funds, and points out that savings might be effected by reducing the salaries of masters in Local Fund Schools, besides increasing the educational receipts by obtaining result grants from Provincial Funds for the higher standards in these schools. As for the reduction in the result grants, which the Circle Board would fix at two-thirds the maximum rates, the Educational officers, and the President especially, are much opposed to such a measure. The Director has suggested the means by which it can be avoided, while the President proposes to set free additional funds for the purpose by striking out the provisions for the Normal School and for the contribution to the Madras Medical College and by reducing that for sanitation. The Board agree with the Director in supporting the establishment of the Normal School, and the second reduction proposed is inadmissible at present. The last suggestion may be approved, but it is remarked that, though feasible in the ensuing year owing to the large balance expected to remain in favor of the General Fund at the commencement of the year and the consequent allotment of a disproportionate amount for sanitation, it does not overcome the difficulty pointed out by the Circle Board, that the normal annual receipts are insufficient to meet the fixed charges which it is proposed to add to. That the rate of grant will have to be reduced, as the number of schools applying for it increases, cannot be disputed, and the only question is whether the Circle Board's intention of all at once cutting down the grant by a third may not have a retarding influence on the progress of education. This would seem to be the probable effect, and as by some of the measures above referred to, further funds

can doubtless be made available for results grants, they should be; but if, after all, some reduction is necessary in the rates, a more gradual one than that proposed should be adopted. The Circle Board would also withdraw the contribution of Rs. 1,500 to Provincial Funds on account of an additional Deputy Inspector of Schools to be appointed to the circle. Both the President and the Director are against such a step, and the former points out that there are more schools to be examined than one man can deal with. The necessity for an additional Deputy Inspector would therefore seem to be imperative, considering the tendency of schools to increase in number. Possibly funds might be set free by dispensing with two of the Inspecting Schoolmasters and posting the remaining two under the two Deputy Inspectors. Subject to these remarks, and to modification hereafter, the Board recommend that the assignments under this grant as entered in the budget be sanctioned. With reference to the errors referred to in paragraph 2 of the Director's letter, it is observed that the receipts of the Tediur School are correctly shown as Rs. 80 in the statement submitted to the Board. Rs. 100 will be entered under School Fees against the Normal School in Statement III, as suggested by the Director.

7. *Grant III, Sanitation, Medical Services, &c.*—The provision of Rs. 12,940, against Rs. 14,970 in the current year, made for the maintenance of the dispensaries in the circle, is considered sufficient by the Surgeon-General. The Sanitary Commissioner notices the absence of any provision for the improvement of village-sites, but the Circle Board can probably find funds for the purpose, if necessary, by transfer from the other sub-heads of sanitation. In paragraph 17 of his memorandum, the Vice-President requests permission to show in lump, where unavoidable, the provision for improvement of water-supply. The Board see no objection to the proposal. There is an increase of Rs. 130 in the establishment charges of choultries, due to the provision made for an increased rate of salary to the Monigar attached to the Kallimodu Chat-tram, and to the employment of a Gumastah on Rs. 10 per mensem to look after its affairs. In regard to the latter, a separate application is promised in the Remark column of the list of fixed establishments furnished with the budget. The President will, at the same time, quote the orders under which the Monigar's pay was raised. A sum of Rs. 360 is entered to provide for stipendiary students in the Prince of Wales' Medical School in Tanjore. With reference to the President's proposal to strike out the contribution to the Madras Medical College, he is referred to the Board's remarks in the review of the Tanjore Budget.

8. *Grant IV, Miscellaneous.*—The items under this grant do not call for remark.

9. The following is an abstract of the budget as revised by the Board:—

GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

READ—the following papers:—

Proceedings of the Board of Revenue, dated 28th March 1883, No. 857.

ABSTRACT.—Reviewing and submitting to Government the Local Fund Budget of the Negapatam Circle, in Tanjore District, for 1883-84.

Proceedings of the Board of Revenue, dated 20th June 1883, No. 1790.

ABSTRACT.—Submitting to Government, with remarks, letter from President furnishing information on certain points noticed in Board's review of the Local Fund Budget of Negapatam Circle, in Tanjore District, for 1883-84.

ORDER—dated 3rd August 1883, No. 1641, Financial.

The estimated receipts and charges of the Negapatam Local Fund Circle for 1883-84 are compared below with the regular estimates for 1882-83 and the actuals for 1881-82:—

General Fund	50,223	30,420	2,020
Total	5,01,899	5,10,420	4,01,240

2. *Regular Estimate for 1882-83.*—The regular estimate as revised by the Board is approved, but the Government note with regret the short expenditure on Public Works both in 1881-82 and 1882-83, caused in the first year by the want of a separate Engineering Establishment, and in the second year by the non-appointment of a separate Engineer for the Circle until the month of November, a delay which the President attributes to the late receipt of the sanctioned budget. In future such delays will be obviated by the orders passed in G.O., 19th April 1883, No. 778.

3. *Budget Estimate for 1883-84.*—In the Budget for 1883-84, Land-cess is estimated at the same figure as in the regular estimate, viz., Rs. 1,76,000, representing 95 per cent. of the total demand, a very satisfactory rate of collection. With regard to "Avenues," omitting the abnormal receipts in 1880-81 due to special* causes, the average income for the remaining four years noted in the margin of paragraph 4 of the Board's Proceedings amounts in round numbers to Rs. 2,370. The estimate will accordingly be raised to this amount.

4. Under Grant I, a provision of Rs. 85,420 is made for twenty-four new roads. Statement II-A shows that most of these are unsanctioned works. The attention of the President will be drawn to the instructions of Government in paragraph 3 of their

Order, dated 16th August 1882, No. 954. Item No. 28, the estimate for which exceeds Rs. 5,000, appears to have been sanctioned by the Board of Revenue. The Government desire to know why the estimate for the work was not submitted to them for sanction. The share of the cost of general management debitable to the Road Fund would appear to be Rs. 4,920 and not Rs. 4,900 as stated by the Board of Revenue. It is proposed to invest Rs. 44,000 during the current year on account of the Railway Guarantee Fund.

5. The Educational provision is fully discussed by the Board of Revenue. Subject to their remarks and to such modifications as may hereafter be found to be necessary, the assignments made in the budget will be allowed to stand.

6. The Board's remarks on Grant III are approved. The road map of the circle has not been submitted.

7. With these remarks, the Right Honorable the Governor in Council passes the Budget Estimates of the Negapatam Local Fund Circle for 1883-84.
