12th October 1883, No. 2873 W., Public Works.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Account.

Read—the following letter from J. W. RUNDALL, Esq., Superintending Engineer, Second Circle, to the Chief Engineer, Public Works Department, dated Masulipatam, 28th September 1883, No. 509 N.L. :—

I have the honor to request you will obtain the sanction of Government to the undermentioned alterations in the limits of reserve stock for the Nellore division, as sanctioned in G.O., No. 488 W., dated the 14th February 1883 :—

	Present limit. Rs.	Proposed limit. Rs.
Metals	1,800	1,000
Timber	1,500	2,300

2. The above alterations will not affect the total of reserve stock.

3. The Executive Engineer has been able, by means of a schedule contract, to reduce considerably the stock of metals. Iron, &c., can be procured in the local market, or got up from Madras within a fortnight.

4. It is, however, different with timber; teak cannot be got in the local market, and there are great delays in getting it from Madras. During the last three years the average consumption of teakwood in the Nellore division has been 2,746 cubic feet, costing Rs. 7,800.

5. It is very necessary that the Executive Engineer should be able to keep a larger stock of wood.

Order—dated 12th October 1883, No. 2873 W., Public Works.

14TH FEBRUARY 1883, No. 488 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General Account.

No. 191.

READ—the following letter from Captain C. B. HENDERSON, R.E., Executive Engineer, Nellore Division, to the Superintending Engineer, Second Circle, dated Venkatachelam's Chattram, 31st January 1883, No. 53 A:—

I have the honor to request that the sanction of Government may be obtained to an increase of Rs. 800 under the sub-head "Building Materials" of the stock authorized for Nellore Division, and to a limit of Rs. 200 for Land, Kilns, &c., another sub-head of stock.

2. The sanctioned limit is Rs. 1,000 at present for the former and nil for the latter.

3. I desire to keep a supply of limestone at head-quarters and a small supply of lime. The limestone is obtained from the bed of a tank about six miles from Nellore, and for some months it cannot be got at; the demand for lime at head-quarters is constant, and I have recently had considerable difficulty in purchasing even small quantities in the town at high rates. I think that a saving of Rs. 2 per candy can be made if we burn the lime ourselves near the workshops.

4. I also propose to manufacture roofing tiles and pipes for minor distributaries; the price of tiles in Nellore has gone up, while for months the supply in the town is very low and the article is very bad.

5. The Rs. 200 for Land, Kilns, &c., will suffice for small lime and tile kilns and for a few temporary sheds for storing materials.

No. 1088 N.L.

Endorsement on the above.

Forwarded to the Chief Engineer, Public Works Department, with a request that the increase under sub-head of stock, "Building Materials," applied for, viz., Rs. 800, may be sanctioned. This will increase the sanctioned limit under this sub-head to Rs. 1,800, and the total balance in the Nellore Division will become Rs. 5,800 instead of Rs. 5,000 as sanctioned in G.O., No. 1471 W., of the 13th June 1882.

It is very advisable that the Executive Engineer should manufacture lime himself and to control the market price. There is a kiln in the store yard at Nellore which will require only slight repair.

As the only source from which limestone is readily procurable is under water for six months in the year, it is advisable to have a stock of limestone.

(Signed) J. W. RUNDALL,
Superintending Engineer, Second Circle.
