TRIPPLICANE 13-11-83

I agree that an ordinary
cable roof would suffice, but I think
it could always resist our trusses
even for small spans, & of course
there would be a great saving & the
difference in cost is very trifling.
I think may be saved.

NOTE OF REMARKS.

1. The plan and estimate here
with submitted provide
for Quarters for Signallers
of the Telegraph Dept. at
Coconut. The amount of
the estimate is Rs. 31,800.
2. Neither Report nor Specification
accompanies the esti-
mate. It is proposed to
form all foundations of
concrete, and the basement
and superstructure of
rough stone in mortar. In
regard to the roofing, trusses
appear superfluous, the
span being only 14 feet. The
scuttles are slightly excessive
in those of the main building
while they are slightly deficient
in the timbers of the out-
houses - (3' x 3 1/2") is a better
cross section for the rafter
than the (2' x 4") allowed.

that of the out house.

3. Plan and estimate have
been countersigned by the
Director General of Telegraphs
in India
