P. W. D. Madras.
Form No. M 46.

NOTES.

REFERENCE TO MADRAS P. W. D. CODE.

CHAPTER XV.—PARA. 2147.

1. This form should be used by the Executive Engineer in any of the following cases:—

a.—When he requires a grant, or an addition to an existing grant for carrying on a sanctioned Major work.

b.—When he is unable to utilize the grant at his disposal for any work, and wishes to resign it either wholly or in part.

c.—When he wishes to utilize the grant for one work upon some other.

2. Either of the columns for "Proposed New Grant" or for "Proposed Reduction," or both, may be used as required.

3. If it happens that the grant already allowed has been reduced, the entry in the column "Existing grant for current year" would of course be the amount less such reduction.

4. In the case of Irrigation Works the entries in the column "Departmental and Service Head" should show distinctly whether the proposed re-appropriation is debitable to Capital or Revenue, and the entries in the column "Works" should be so arranged as to show the project to the capital or Revenue Account of which the charge is debitable, and the class of Service to which the charge is debitable thus:—

——— Project.

(1)—Head works.

B. Land.

K. Buildings.

In cases of Productive Public Works the fact of their being so should be noted against the entries.

5. It being of the utmost importance that early intimation of possible lapses, or of excesses in outlay on works should be communicated to the Government, a close watch should be maintained on the progress of all works by Executive Officers, and this form employed the moment the facts are sufficiently known.

From,

The Executive Engineer
North Arcot Division

To.

The Superintending Engineer
4th Circle

Sir,

Encls: 6

1. application
*5 Encls: of Memo No. 65/N.A. will follow

With reference to the correspondence on the subject of the work at the Wallajah Taluq cutcherry, and to your Memo No. 65/N.A of 10th instant, I have the honor to inform you, that the contractor has not made sufficient progress on the work, so as to lead me to expect, with any degree of certainty, that the full allotment for the work will be worked out within the 31st March 1883. When I wrote my letter No. 2289 dated 14th January 1883, I was convinced that the contractor was making steady progress, from the fact of his having purchased timber to

to the value of about Rs 4,000 and of his having made arrangements for burning bricks &c; but this conviction, I am sorry to say, has been nullified in a great measure. From the report that have reached me, I gather that the contractor is involved in pecuniary difficulties, and that with a view to ensure fulfilment of the contract, he entered into partnership, with some monied men, but that these men are now disinclined to render pecuniary assistance to the contractor who has thus been disabled to show satisfactory progress on the work.

2 Judging from the above facts, I feel sure now that the present contractor cannot cope with the work, and that any further reliance on his false promises will lead to considerable difficulty in expending the allotment for the work.

3 Under the above circumstances I am sorry to be reluctantly obliged to surrender Rs 4,000 from the allotment of Rs 20,000, for the work. As above explained you will perceive that this late surrender is due, entirely to the false promises made, and hopes which the contractor has held out to me; and had I known of the difficulties under which the contractor was placed, the surrender would certainly have been made at an earlier date; and the work taken out of his hands. I have this day given 10 days notice to the Contractor, and after expiration of the period, will relet it, with your approval; to another Contractor who will be better able to spend the balance of the grant to the advantage of Government and complete the work within the terms of the former contract viz March 1884. The Contractor I propose giving the work to, is Moonisami Iyer the largest Contractor in this Division, and who has had nearly 20 years experience of contracting in this Department, and who further has command of most of the

the skilled and other labor in the Wallajah and surrounding talugs.

4 I await an early answer on the reletting of the Contract as above suggested.
