GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

No. 82.

READ—the following letter from A. J. STUART, Esq., Collector of North Arcot, to the Secretary to Government, Public Works Department, dated 6th March 1883, No. 31 :—

I have the honor to report, for the orders of Government, the following difference of opinion between the Inspector-General of Registration and myself.

He wishes for all new Sub-Registrars' offices the design copy enclosed to be used.

2. I object to a terraced roof in the same compound with Mr. Chisholm's Standard Cutcheries, which are all tiled and in a different style. I have no objection to terraced roof elsewhere.

3. The danger of fire is, I believe, his reason. I believe that tiled buildings designed so as to harmonize, or at least not to be in violent contrast, with the style of the new Cutcheries may be made to all intents and purposes very nearly as safe as terraced buildings, and quite safe enough.

4. The risk would be exceedingly small, the offices being all closed at night, and might be further diminished by orders that all registration business be conducted by daylight. To provide a small additional security for a very small and remote risk it seems to me a pity to sacrifice what good effect there is in Mr. Chisholm's new Cutcherry designs.

5. As the matter is a general one, and is likely immediately to affect several stations in this district, I think it right to lay it before the Government for orders. I may add that I have represented my views to the Inspector-General of Registration, but without convincing him.

No. 83.

ORDER—dated 10th March 1883, No. 788 W., Public Works.

The Consulting Architect to Government is now engaged on the preparation * of a type design of Registration Offices which will afford the requisite security and at the same time harmonize with the design of Cutcherry buildings.

2. The new design should be submitted and circulated as soon as possible.

No 31

North West Collection
Revised 1880.

788

From,

The Collector of
North West

To,

The Secretary to Government
Public Works Department
Fort Saint George.

Sir,

I have the honor to report for
the orders of Government the following
difference of opinion between the
Inspector General of Registration
and myself.

1. The number for a new Sub
Registration is 1000. The design copy
has come to me now.

2. I object to a terrace road
in the same compound with Mr
Chisholm's. It is a road to be used
which are all the same in a dif-
ferent style. I have no objection
to terrace road of the same kind.

Yours,
J. S. S.

3. The danger of fire is I believe
his reason. I believe that it is a
building designed so as to be as
monstrous, or at least not to be in violent
contrast with the style of the new
Cathedral which may be seen to all
intent as a perfect copy very nearly
as safe as terraced buildings, and
quite safe enough.

4. The point is and he has already
said that the river being all closed
at night and might be further di-
minished by a great deal of registra-
tion business he conducted by
daylight. To find out a small
additional security for a very small
and make it seem to me a pity
to sacrifice what good there is there
in Mr. Chicka's new but cherry
designs.

5. As the matter is a general one
and is being immediately to a great
several stations in the district,
I think it right to say it before the
Government for advice, I may add
that I have represented my views

to the Inspector General of Regi-
stration but without convincing
him.

I have the honor to be,
Sir,
Your Most Obedient Servant,

Albion
Collector
