No. 73.

Order—dated 8th March 1883, No. 765 W., Public Works.

On a representation made by a Committee lately assembled at Ootacamund, supported by the Chief Engineer, as to the desirability of having at once a sufficient number of convicts to afford a daily working party not less than 80 in strength, in order to deal effectively with the shaping of the ground lately laid dry by lowering the water level of the lake at that station, the Government have decided to place a sufficient body of convicts at disposal for the purpose in view.

2. The Inspector-General of Jails will accordingly make the earliest possible arrangements for the immediate transfer of the requisite number of convicts to be worked under the instructions of the Executive Engineer, Nílgiri Division.

3. Should the Jail Department not be enabled to supply the requisite working tools, the Executive Engineer should be requisitioned for the same without delay.

4. The terms of payment for the work will be arranged in direct communication with the Chief Engineer, but, generally speaking, the Government are of opinion that the simplest method would be to pass to credit of the Jail Department the value of the work executed appraised at local rates, leaving the Jail Department to meet cost of extra guards, &c., from the amount.
