Report by the Superintending Engineer, Sixth Circle, on the Estimate for constructing a Sub-Registrar's Office at Melūr, in the Madura District, dated Trichinopoly, 16th March 1883, No. 710 M.D.

One Abstract Estimate.
One Site Plan.

The estimate is prepared with reference to G.O., No. 730 W., of 20th March 1882.

2. The plan is based on the Standard Design Sheet No. 21 that accompanied G.O., No. 120 W., of 14th January 1882.

3. The site selected for the construction of the building has been approved of by the Collector and Sub-Registrar. No compensation is allowed in the estimate, the land belonging to Government. The soil of the ground is reported to be red earth and that gravel is found at 1 foot 9 inches below the surface. The depth of the foundations is altered, as shown on plan, from 1 foot 9 inches to 3 feet, as the Superintending Engineer considers that no foundation less than 3 feet should be allowed for this building. Concrete bottom is not thought necessary. The estimate as corrected in this office amounts to Rs. 2,830.

4. Weather-boards have been provided to side windows of Clerks' and Registrar's rooms.

5. The work can probably be completed in eight months after sanction and allotment of funds.

Note of Remarks.

1. This estimate provides for the construction of a Sub Registrars Office at Melur, Madurai District and amounts to Rs. 2830.
2. The Suptg. Engr. considers a depth of 3 ft of foundation necessary from the nature of the soil, instead of 1 ft 9 inches as allowed in the Standard plan, and that this increased depth of brickwork renders a concrete base superfluous. Two weather boards have also been estimated for. In all other items the estimate corresponds with that sanctioned in G. O. No. 120 W of the 14th January/83
