

PROCEEDINGS OF THE BOARD OF REVENUE.

READ—the following letter from G. D. LEMAN, Esq., Collector of Coimbatore, to the Secretary to the Board of Revenue, dated Karúr, 21st February 1884, No. 237:—

The Executive Engineer estimates that it will cost Rs. 6,000 to make strong rooms of masonry with iron bars at the four sides and a concrete roof in the six treasury rooms of the taluks that now require them.

2. They are Karúr, Palladam, Satyamangalam, Bhaváni, Kollegál and Coimbatore.

3. Most of these buildings are old and many are old native buildings; they are not convenient, are not in good repair and are likely to be abandoned and new ones built on a better style if the bill for repair is very heavy.

4. It therefore does not seem that it is worth while to build these rooms, and I am now of opinion that the iron safes proposed by the Board and recently supplied to the sub-treasuries of this district will do, and they will cost only Rs. 3,109-11-9 as per list.

5. I would suggest, however, that they would be more easily accessible for work if they were embedded in a wall or a buttress of masonry at some little way up instead of in the floor, and that in this way the lock would be better preserved from dirt, &c.

ENCLOSURE No. 1.

Reference on the above, dated 19th March 1884.

The Collector is requested to consult the Executive Engineer as to whether the iron safes of the kind supplied to Deputy Tahsildars' treasuries will suit the requirements of taluk treasuries, and to point out the source from which the expenditure may be met.

(Signed) E. GIBSON,
Secretary.

To the Collector of Coimbatore.

READ—the following letter from G. D. LEMAN, Esq., Collector of Coimbatore, to the Secretary to the Board of Revenue, dated 1st May 1884, Reference on No. 1020 :—

With reference to Board's reference on their general register No. 1386, dated 19th March 1884, I have the honor to inform you that I have consulted the Executive Engineer, and he is of opinion that iron safes will suit the requirements of the taluk treasuries. He further states that if safes are finally decided on as preferable to altering the various taluk treasury rooms, their cost will be met from the grant for Minor Original Works, Civil Buildings, Provincial Fund (for 1884-85 it is presumed), and that the providing and fitting the safes will be undertaken by his department.

RESOLUTION—dated 27th May 1884, No. 1773.

Submitted for the orders of Government.

2. The Board agree with the Collector and Executive Engineer in considering that, instead of providing strong rooms at a cost of Rs. 6,000 in the six taluk treasuries mentioned in the first of the letters above read, it would be preferable to secure all money received in iron safes, which would not cost more than half the sum. The amount can be met from the provision under Civil Buildings, Provincial, for 1884-85. The Board request that Government will be pleased to sanction the purchase of ~~six~~ *Eighteen* safes at a total cost of Rs. 3,109-11-9 from the source pointed out.

PROCEEDINGS OF THE BOARD OF REVENUE.

READ—the following letter from G. D. LEMAN, Esq., Collector of Coimbatore, to
the Secretary to the Board of Revenue, dated Karúr, 21st February 1884,
No. 237:—

The Executive Engineer estimates that it will cost Rs. 6,000 to make strong
rooms of masonry with iron bars at the four sides and a concrete roof in the six
treasury rooms of the taluks that now require them.

2. They are Karúr, Palladam, Satyamangalam, Bhaváni, Kollegal and Coim-
batore.

3. Most of these buildings are old and many are old native buildings; they are
not convenient, are not in good repair and are likely to be abandoned and new ones
built on a better style if the bill for repair is very heavy.

4. It therefore does not seem that it is worth while to build these rooms, and I
am now of opinion that the iron safes proposed by the Board and recently supplied to
the sub-treasuries of this district will do, and they will cost only Rs. 3,109-11-9 as
per list.

5. I would suggest, however, that they would be more easily accessible for work
if they were embedded in a wall or a buttress of masonry at some little way up
instead of in the floor, and that in this way the lock would be better preserved from
dirt, &c.
