21st JULY 1884, No. 1778 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Military Works.

READ—the following letter from Brigadier-General R. C. STEWART, Quartermaster-General, to the Secretary to Government, Military Department, dated, Ootacamund, 11th July 1884, No. 640-A. —

I have the honor, by order, to forward, for sanction and transfer to the Public Works Department for disposal, the estimate, plan, &c., below-mentioned which have been approved by the Commander-in-Chief. The plan and estimate have been countersigned:—

- (1) Plan and estimate, amounting to Rs. 700, for sinking a well in the compound of the station hospital at Cannanore.
- (2) The report attached to the estimate shows that this well is required in addition to two existing wells, the water in which is not sufficient for the wants of the hospital during certain seasons of the year.

No. 3346, Military.

Approved and transferred to the Public Works Department.

(By Order.)

OOTACAMUND,
12th July 1884.

(Signed) A. R. KENNEY-HERBERT, Lieut.-Col.,
Offg. Secretary to Government.

ORDER—dated 21st July 1884, No. 1778 W., Public Works.

The estimate, amounting to Rs. 700, for sinking a well in the compound of the station hospital at Cannanore, is sanctioned.

2. This sanction has been registered as Imperial Ordinary, No. 19 W. of 1884-85, and classified as Military Original Works.

Dated the 12th July 1884

From the M. Secy to Govt

NOTE OF REMARKS.

1. The accompanying plan and estimate provide for sinking a well in the compound of the Station Hospital at Bannanore. The amount of the estimate is Rs. 700.
2. The well is to be sunk 50 feet below the surface of ground. The inner diameter is to be 10 feet. The upper 10 feet of the depth pass through gravelly soil; the lower 34 feet through hard laterite.
3. The upper 10 feet of the well which pass through gravelly soil will be bound in with a circular ring, 1 1/2 feet thick and 10 feet inner

3346/7
Bannanore 11/7/84

diameter, built with laterite stones each 12" x 9" x 4 1/2", in mortar. It is stated that this laterite ring or stamming is to be built from the top downwards in courses 3 feet deep, the upper course to be completed before the excavation for the lower course is begun. Subject to approval, would it not be better in the present instance to excavate the full depth of 10 feet at once, down to the hard laterite, where the excavation should be 13 feet in diameter with a slight batter upwards to ground surface, then build from the laterite base, taking care to give the stamming a firm back as the work progresses.

1778
Of course in this case the excavation of the 3 1/2 feet depth of laterite is not to be commenced before the stamming has been completed. 4. The estimate and plans have been countersigned by the Offg. Asst. General.

1778 W
15th July/82
P.W.
For orders with authority to the estimate to be made. As however the estimate amounts to only Rs 700, & the S.G. is responsible for details, a draft order sanctioning the estimate is submitted for approval.
