11th September 1884, No. 2226 W., Public Works.

2226/1

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following letter from H. B. GRIGG, Esq., M.A., Director of Public Instruction, Madras, to the Chief Secretary to Government, dated Ootacamund, 18th July 1884, No. O-501 :—

I have the honor, with reference to G.O., No. 3417, dated 29th November 1883, to submit the enclosed estimate for Rs. 65,341, prepared by the Officiating Consulting Architect to Government, for increasing the accommodation in the college at Kumbakónam and providing furniture for the same.

2. The estimate provides for—

(i) the addition of an upper-story on the south side of the building, providing accommodation for the teaching of chemistry and physics and a laboratory, including certain alterations in the tower;

(ii) the addition of an upper-story on the north side of the tower, providing three lecture-rooms so arranged that they can be used as one large lecture-room or examination hall—a fourth lecture-room and a study for the Principal;

(iii) the addition of the class-rooms on the ground floor at the south end of the building.

The first addition is estimated to cost Rs. 13,152, the second Rs. 36,038, and the third Rs. 16,151.

3. Of these additions I would premise that I seek sanction for the first only, *i.e.*, for the absolutely necessary provision for the teaching of physical science, which the Government have introduced as a branch of the college course, and which cannot be efficiently taught until this provision is made, as in the crowded state of the college no accommodation is available for either a laboratory or a small lecture-room. For proposals (ii) and (iii) I simply ask the general approval of Government so far as the design is concerned.

4. The present accommodation is by no means sufficient for the existing ordinary classes, whilst there are no rooms available for a students' reading-room or for the Principal's study. In the complete plan provision is made for accommodating properly a body of at least 300 University students, which will probably before very long be the strength of the institution so soon as the teaching of science is properly provided for. But, as above stated, I do not now ask sanction for carrying out additions No. (ii) or (iii), but I thought it well to take advantage of the presence of the Government Architect at Kumbakónam early in the year to have complete designs prepared for any future extensions that may become necessary, so that the work when, if ever taken in hand, may be in architectural unison with the rest of the present fine building and the additions immediately required. Moreover the designs of the extension, for which sanction is now sought, could not be successfully worked out without working out at the same time the design of extensions which will in all probability at some future time become necessary and part of which would now be recommended, if the financial exigencies of the department admitted of the extra outlay being incurred.

5. The addition of an upper-story was, in the opinion of the Officiating Consulting Architect, the most economical and suitable manner of providing for the laboratory and the science lecture-room. Full particulars regarding the work will be found in his letter of the 30th April. It will be observed that the Professor of Physical Science, Presidency College, has approved the arrangements for the science classes.

6. Of the sum required for the work Rs. 13,152, Rs. 10,000 have been provided in the Public Works Department Budget, Part I, Class B Works, No. 18, which will probably more than suffice for the outlay to be incurred in the present official year, if these proposals are approved.

ENCLOSURE.

From Major J. L. L. MORANT, R.E., Officiating Consulting Architect to Government, to the Director of Public Instruction, Madras, dated Chepâk, 30th April 1884, No 152.

With reference to Public Works G.O., No. 3417, dated 29th November 1883, and our personal visit to Kumbakónam last January, I have the honor to forward for your approval plans and an estimate of proposed additions and improvements to the Kumbakónam College. The estimate amounts to Rs. 65,341.

2. The above Government Order gave cover to two approximate estimates prepared by the Executive Engineer, Tanjore division, aggregating Rs. 39,730. These estimates provided for adding to the college nine rooms, whose joint area, exclusive of verandahs, is 7,485 square feet. The estimate now sent (omitting furniture, seats, &c.,) comes to Rs. 60,341 for eight rooms, whose joint area (excluding verandahs) is 8,481 square feet. But the estimate of the Tanjore officer was an approximate one for the plainest, simplest building contained within a rectangle of four walls. It can hardly with fairness be put in comparison with the present estimate, which provides for improvements to the existing building as well as the erection of additions of an architectural character. (Please refer to Public Works Department G.O., No. 49, dated 9th January 1872.)

3. The original cost of making the college what it now is came to Rs. 52,000, which covered cost of adding four rooms to an old building. The number of superficial feet that these four rooms cover (excluding verandahs) is 3,600 square feet, against 8,481 square feet that the proposed additions give. The whole area of the additions made to the original building (as it now stands), including verandahs, &c., is 9,025 square feet. The whole area of the additions now proposed to be made comes to 12,139 square feet, the verandahs being much wider in the present building than in what is now proposed to be added. Taking the whole area (verandahs and all) the additions to the college, which have been already done, cost Rs. 5¾ per square foot, those now proposed Rs. 5⅓. Moreover the first estimate did not provide for furniture. In the present estimate Rs. 5,000 are entered for seats and fittings. I may add further that the physical science department of the Presidency College with fittings cost Rs. 35,000. I fear I weary you with these figures, but I enter on the subject (in no way for the purpose of making invidious comparisons but) solely to show that the cost of the proposed additions, though larger than might have been anticipated from the estimates furnished by the Executive Engineer, Tanjore division, is not extravagant.

4. The proposed design provides—

two class-rooms, each 40 by 25 feet and 27 feet high,
a physical science laboratory, 44 by 20 feet and 16 feet high,
a physical science lecture hall, 40 by 20 feet and 16 feet high,
a logic room, 26 by 26 feet and 16 feet high,
a very large lecture-room (in three parts), 88 by 32 feet and 25 feet high,
Principal's study with conveniences, 26 by 26 feet and 16 feet high,
and two staircase wells, { one 22 feet in diameter and 16 feet high,
{ one 12 feet by 8 feet and 10½ feet high.

5. I purpose placing on the present building an upper-story, which will give the requisite space for all the above rooms except the two large class-rooms, these being added on the ground floor to the west end of the building.

6. It is also intended to improve the present five octagonal rooms by making them rectangular and by throwing the centre room into the two adjoining rooms north and south of it. The octagonal shape has been found inconvenient, and the centre room is very dark and cannot, from its position, be lighted except by adding it to its neighbours.

7. A porch is provided to the entrance and the upper rooms are connected both front and rear by a light narrow wooden verandah supported on corbels. In this way the old verandah is left undisturbed.

8. The present clear-story ventilators are found inconvenient. They are wooden venetians, and, not being self-acting, are kept permanently closed and so give neither light nor air. It is proposed to remove them, lessen their area, and convert them into permanently open ventilators filled with colored glass arranged in a double form so as to give cooled light and air. The new ventilators in the upper-story will be similarly treated. The details are not shown in the present plan, but they have been worked out and I have every reason to believe they will answer.

2226/2

9. Should the plans and estimates now sent you meet with your approval, will you kindly forward them to Government. If finally approved by every one I can easily furnish enlarged working details of every part. These have been drawn. But I now withhold them in case emendations or alterations are considered necessary.

10. The plan of the rooms has been examined by the Principal of the College, whose suggestions have been adopted. This letter and all the plans and estimate are now sent to you through him. Dr. Wilson of the Madras Presidency College has also approved of the physical science class arrangements.

Kumbakonam College Building

Plans and estimate for additions and improvements to the —, sanctioned.

2226/3

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following letter from H. B. GRIGG, Esq., M.A., Director of Public Instruction, to the Chief Secretary to Government, dated Madras, 20th November 1883, No. 7799:—

I have the honor, in submitting two letters from the Principal, Kumbakónam College, forwarding approximate estimates, amounting to Rs. 12,600 and Rs. 27,130, for additional accommodation to be provided in connection with the college building, to request that the Consulting Architect to Government may be instructed to prepare complete plans and estimates for the works. I beg also that he may be instructed to consider the best location for the additions in view of the architectural effect of the building. Considering the importance of the work, the Executive Engineer thinks that the design should be prepared by that officer. The need of a laboratory and science lecture room is very great, and should be provided as soon as possible.

Enclosures.

From G. H. STUART, Esq., Principal, Kumbakónam College, to the Director of Public Instruction, dated Kumbakónam, 17th September 1883, No. 180.

I have the honor to forward, herewith, an approximate estimate, amounting to Rs. 12,600, for a laboratory, lecture room and apparatus room for this college. The estimate has been prepared by Mr. Hughes, Executive Engineer of this division, in accordance with a sketch furnished by Dr. Wilson, of the Presidency College, in his letter, dated 30th April 1883, to the Acting Director of Public Instruction; the sketch is herewith returned.

Mr. Hughes thinks that the design ought to be made by the Government Architect.

Approximate estimates for the other necessary additions to the college will be forwarded shortly.

From the same Officer, dated Kumbakónam, 15th October 1883, No. 212.

I have the honor to enclose provisional estimate, amounting to Rs. 27,130, for additions to this college. This estimate has been prepared by Mr. Hughes, Executive Engineer, Tanjore. The design is a two-storied building comprising six rooms—three below and three above. Of these, one is a consulting library, one a private room for the Principal, and the other four are class rooms, viz., one for English professor, one for Assistant English lecturer, one for logic, and one for history. I enclose a sketch of the existing building showing the proposed arrangement of classes. The examination hall has hitherto been used as a class room instead of being kept to its proper use for examinations. The room marked 1 C is a very dark room and is a thoroughfare to 1 B, 2 A and 1 A. It would only be used when the first class becomes so large that it must be put into three divisions. The sketch shows that every room will be fully occupied, including the new rooms, and so gives some idea of the present crowded state of the class rooms—a state which must be injurious to the health of the students.

No. 2298, Educational.

Approved and transferred to the Public Works Department for further disposal.

27th November 1883.

Office of the Director of Public Instruction,

On circuit Ootacamund ~~Madras~~, July 1884

No.

2336/5

From

H. B. GRIGG, Esq., M.A.,
Director of Public Instruction,
Madras,

To

The Chief Secretary to Government
Fort St. George.

Sir,

I have the honor with reference to G. O. No 3417 dated 29 November 1883 to submit the enclosed estimate for Rs 65,341 prepared by the Officiating Consulting Architect to Government for increasing the accommodation in the College at Kumbakonam and providing furniture for the same.

2. The estimate provides for

(1) the addition of an upper storey in

the

the South side of the building (providing accommodation for the teaching of chemistry and Physics and a laboratory including certain alterations in the tower.

(ii) the addition of an upper storey on the North side of the tower, providing three lecture rooms so arranged that they can be used as one large lecture room or examination hall – a fourth lecture room and a study for the Principal.

(iii) the addition of the class rooms on the ground floor at the south end of the building.

The first addition is estimated to cost 13,150 Rs, the second 36,039 Rs, & the third 16,151 Rs.

3. Of these additions I would premise that

that I seek sanction for the first only, i.e. for the absolutely necessary provision for the teaching of Physical Science, which the Government have introduced as a branch of the College course, and which cannot be efficiently taught until this provision is made, as in the crowded state of the College no accommodation is available for either a laboratory or a small lecture room. For proposals II and III I simply ask the general approval of Government so far as the design is concerned.

4. The present accommodation is by no means sufficient for the existing ordinary classes whilst there are no rooms available for a students' reading room or for

for the Principal's Study. For the complete plan provision is made for accommodating properly a body of at least 300 University Students which will probably before very long be the strength of the institution, so soon as the teaching of Science is properly provided for. But as above stated I do not now ask sanction for carrying out additions No ii or iii but I thought it well to take advantage of the presence of the Government Architect at Kumbakonam early in the year to have complete designs prepared for any future extensions that may become necessary so that the work, when, if ever, taken in hand may be in architectural unison with the rest of the present fine building

and

and the additions immediately required. Moreover the designs of the extension for which sanction is now sought could not be successfully worked out without working out at the same time the design of extensions which will in all probability at some future time become necessary and part of which would now be recommended, if the financial exigencies of the Department admitted of the extra outlay being incurred.

5. The addition of an upper storey was in the opinion of the officiating Consulting Architect the most economical and suitable manner of providing for the laboratory and the Science lecture room. Full particulars regarding the work

will

will be found in his letter of the 30th April. It will be observed that the Professor of Physical Science, Presidency College, has approved the arrangements for the Science classes.

6. Of the sum required for the work, Rs 13,152, Rs 10,000 have been provided in the Public Works Department Budget Part I, class B works, No 18 which will probably more than suffice for the outlay to be incurred in the present official year, if these proposals are approved.

To
The Director of Public Instruction
Madras.

Sir,

With reference to Public Works G.O. No 3417 dated 29th November 1883 and our personal visit to Kumbakonam last January, I have the honor to forward for your approval plans and an Estimate of proposed additions and improvements to the Kumbakonam College. The Estimate amounts to Rupees 65,341.

2. The above G.O. gave cover to two approximate estimates prepared by the Executive Engineer Tanjore Division aggregating Rupees 39,730. These estimates provided for adding to the College 9 rooms whose joint area exclusive of verandahs is 7,485 square feet. The estimate now sent (omitting furniture seats &c) comes to Rs 60,341 for 8 rooms whose joint area (excluding verandahs) is 8481 square feet.

8

But the Estimate of the Tanjore Officer was an approximate one for the plainest simplest building contained within a rectangle of 4 walls. It can hardly with fairness be put in comparison with the present Estimate which provides for improvements to the existing building as well as the erection of additions of an Architectural character. (Please refer to P. W. D. G. O. No. 49 dated 9th January 1872)

3. The Original cost of making the College what it now is came to Rs 52,000 which covered cost of adding 4 rooms to an old building. The number of superficial feet that these 4 rooms cover (excluding verandahs) is 3,600 Square feet, against 8481 Square feet that the proposed additions give. The whole area of the additions made to the original building (as it now stands) including verandahs &c is 9025 Square feet. The whole area of the additions now proposed to be made comes to 12139 square feet, the verandahs being much wider in the present building than in what is now proposed to be added. Taking the whole area (verandahs & all) the additions to the College which have been already done cost Rupees 5¾ per square foot, those now proposed Rupees 5⅓. Moreover the first Estimate did not provide for furniture. In the present Estimate Rupees 5,000 are entered for seats and fittings. I may add further that the Physical Science Department of the Presidency College with fittings cost Rs 35,000. I fear I weary you with these figures, but I enter on the subject (in no way for the purpose of making invidious comparisons but) solely to show that the cost of the proposed additions though larger than might have been anticipated from the Estimates furnished by the Executive Engineer Tanjore Division is not extravagant.

4. The proposed design provides

2 Class Rooms - each	40 by 25 feet	and	27 feet high
a Physical Science Laboratory	44 by 20 "	&	16
a Physical Science Lecture Hall	40 by 20 "	&	16
a Logic room	26 by 26 "	&	16
a very large Lecture room (in 3 parts)	88 by 32 "	&	25
Principals Study with conveniences	26 by 26 "	&	16
and two staircase wells	one 22 feet in diar	&	16
	one 12 ft by 8 ft	&	10½

5. I purpose placing on the present building, an upper storey, which will give the requisite space for all the above rooms except the two

large class rooms, these being added on the ground floor to the west, end of the building.

6. It is also intended to improve the present five octagonal rooms by making them rectangular and by throwing the centre room into the two adjoining rooms North and South of it. The octagonal shape has been found inconvenient and the centre room is very dark and cannot from its position be lighted except by adding it to its neighbours.

7. A porch is provided to the entrance and the upper rooms are connected both front and rear by a light narrow wooden verandah supported on corbels. In this way the old verandah is left undisturbed.

8. The present clearstorey ventilators are found inconvenient. They are wooden venetians and not being self acting are kept permanently closed and so give neither light nor air. It is proposed to remove them, lessen their area, and convert them into permanently open ventilators filled with colored glass arranged in a double form so as to give cooled light and air. The new ventilators in the upper storey will be similarly treated. The details

are not shewn in the present plan but they have been worked out, and I have every reason to believe they will answer.

2226/10

9. Should the plans and Estimates now sent you meet with your approval will you kindly forward them to Government. If finally approved by every one I can easily furnish enlarged working details of every part. These have been drawn. But I now withhold them in case emendations or alterations are considered necessary.

10 The plan of the rooms has been examined by the Principal of the College whose suggestions have been adopted. This letter and all the plans and Estimate are now sent to you through him. Dr. Wilson of the Madras Presidency College has also approved of the Physical Science Class arrangements.

From the Chief Secy. to Govt.

2226/13

NOTE OF REMARKS.

1. The accompanying plans and estimate provide for additions and improvements to the Kumbakonam College, Tanjore District. The amount of the estimate is Rs. 65,341.

2. The estimate is thus divided:—

a. The upper storey providing accommodation for the teaching of Chemistry, and the laboratory; the alteration of the tower; and the front porch — — Rs. 13,152;

b. Additions and alterations in the upper and lower stories north of the stair-case — — — — Rs. 36,038;

c. Additions and improvements on the south side of the building — Rs. 16,151.

B. 23.8.84.

3. Under sub-head a. are provided — Physical Science Laboratory, 44'x20'x16'; Physical Science Lecture Hall, 40'x20'x16' Front Porch; and alteration to Staircase. Under sub-head b. are provided — Logic Room, 26'x26'x16'; Large Lecture Room, 88'x32'x25'; Principal's Study, 26'x26'x16'; and alteration to staircase. Under sub-head c. are provided — Two Class Rooms — each, 40'x25'x27'.

4. It may be learnt from the enclosing letter of the Director of Public Instruction that he asks for the sanction of the work coming under sub-head a., and amounting to Rs. 13,152, as he considers it "immediately required". Of b. and c. he writes:— "I simply ask the general approval of Government so far as the design is concerned." In fact, as he states, he obtained from C.E. a design, with estimate, which would fully meet all present and possible future requirements of the College so that all additions and improvements may blend and harmonise with the College and each other as parts of a whole.

5. Neither Report nor Specification has been submitted, but the plans and the detailed and abstract estimates have been very well prepared.
