12TH SEPTEMBER 1884, No. 2240 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General
Establishment.

READ—the following papers :—

From Lieutenant-Colonel H. SMALLEY, R.E., Executive Engineer, Chingleput Division, to the Executive Engineer, No. 2 Tank Division, dated Chingleput, 11th August 1884, No. 2375.

With reference to your letter, No. 17/821, dated 5th instant, I have the honor to express my opinion, as asked for by you, that there is not a fair probability of the sums estimated by you being spent on the Tank Maintenance Scheme in this division before the end of this official year. I consider that about Rs. 15,000 on new works and Rs. 40,000 on repairs would be the probable limit of expenditure, and that only provided estimates were sanctioned in good time and that our present executive staff were much increased.

The four best working months of the year have gone by without any expenditure on these works; estimates now in progress only amount to Rs. 5,000 for new works and Rs. 11,000 for repairs, in round numbers. It will take some time to procure additional executive agency. In October, November and December little can be done, and even in January and February, when the tanks are full. We have Rs. 1,12,000 to spend on the ordinary irrigation works of the division, and nearly Rs. 1,00,000 on Military and Provincial works, all of which draw off labor. These works are all given out on contract and expenditure cannot therefore be suspended on them for the sake of the Tank Maintenance works. Taking all these facts into consideration, I do not see my way to spending more than I have named above.

No. 1444 T.

Endorsement on the above.

Submitted to the Chief Engineer for information.

One overseer will be at once placed under the orders of the Executive Engineer, Chingleput division, in anticipation of formal sanction to the transfer. It will, however, be observed that this addition to the regular establishment (which is all that can be spared with due regard to the investigation of works and preparation of estimates) is much below what the Executive Engineer, Chingleput, considers necessary.

(Signed) J. PENNYCUICK, Lieut.-Col., R.E.,

22nd August 1884.

Superintendent of Works, Tank Maintenance Scheme.

From Colonel H. L. PRENDERGAST, R.E., Superintending Engineer, V Circle, to the Chief Engineer for Irrigation, dated Bangalore, 28th August 1884, No. 2053.

In reply to your memorandum, No. 28 C.N., of the 14th instant, I have the honor to report that the Executive Engineer of the Chingleput division has been in correspondence with the Executive Engineer of the Tank division, and stated that the probable limit of his expenditure on minor works would be Rs. 15,000 on new works and Rs. 40,000 on repairs, provided estimates were sanctioned in good time, and his executive staff were increased.

2. Colonel Smalley mentioned, in his letter of the 11th instant, that he had Rs. 1,12,000 to expend on the ordinary irrigation works, and that the works were "all given out on contract and expenditure cannot therefore be suspended on them for the sake of the Tank Maintenance works."

To
The Chief Engineer
for Irrigation.

Sir

In reply to your Memo.
No 28 bet of the 14th Instant, I
have the honor to report that the
Executive Engineer of the Chingleput
Division has been in correspondence
with the Executive Engineer of the
Tach Division, and stated that
the probable limit of his expenditure
on Minor Works would be Rs 15,000
on new works, and Rs 40,000 on re-
pairs: provided estimates were
sanctioned in good time, and
his Executive Staff were increased.

2. Colonel Smalley men-
tioned in his letter of the 11th Inst.
that he had Rs 112,000 to expend
on the ordinary Irrigation Works,
and

repairs would be the probable limit of expenditure, and that only provided estimates were sanctioned in good time, and that our present executive staff were much increased.

The 4 best working months of the year have gone by without any expenditure on these works. Estimates now in progress only amount to Rupees 5000, for new works and Rupees 11,000 for repairs in round numbers. It will take sometime to procure additional executive agency. In October, November and December little can be done even in January and February when the tanks are full. We have Rupees 1,12,000 to spend on the ordinary Irrigation works of the Division and nearly Rs 1,00,000 on Military and Provincial works all of which draw off later. These works are all given out on contract and expenditure

cannot therefore be suspended on them for the sake of the Tank Maintenance works taking all these facts into consideration, I do not see my way to spending more than I have named above.

in anticipation of formal
sanction to the transfer, it will
X

and that the works were all given out on Contract and expenditure cannot therefore be suspended on them for the sake of the Tank Maintenance works."

With the ordinary works thus in full swing, I would have been glad to have carried them on, and to have had the reduction made instead, in the Tank Maintenance allotment, for but few estimates were furnished, to the aggregate Value of Rs. 16000: although more were promised.

3. There has been every expectation of fully utilizing the ordinary grant: and a very doubtful prospect of getting thro' the Tank Maintenance allotment.

It is always a pity to stop works that are started: and to disappoint Contractors who have entered into engagements to carry out works.

But if it is necessary that 20 or 30

thou. and Rupees should be rendered, I must instruct the Executive Engineer to make arrangements to that effect. May that I may have orders on this point.

4. The Executive Engineer of Chingleput applied in the Statement enclosed for extra establishment.

Viz Executive, temporary. Rs. 2240/6
1 Sub Divisional Officer. 250.

and permanent 2 Overseers. 120

also, office, temporary for Executive Eng. Office Clerk. 20

in addition to the two temporary clerks that are at present employed and permanent 1 Clerk. 45

Increase to pay of Storekeeper. 5
for the Sub Divisions

Temporary for the temporary Sub Division Officer. 1 Clerk. 20

1 Messenger. 6

3 Lascars. 18

for the present temporary Overseer 1 Clerk. 15

Do. 1 Lascar. 6

permanent for 2 Overseers - 2 Clerks. 35.

2 Lascars. 12.

Total. 552

5. The Executive Engineer considers that Chingleput should be made a 1st class Division Office, and he asks for a permanent

permanent clerk on Rs. 45. with
difference of pay Rs. 5 for the
Store keeper or Rs. 50.

The additional work thrown on the
Division is not permanent, and
I do not think it necessary to
recommend any permanent est.
establishment being given. I would
therefore deduct Rs. 50 proposed
for the Office, and treat the
rest of the Establishment required
as temporary viz.

- 1 Sub Engineer ^{Sub-divisional Officer} each with the ordinary
establishment of Clerk & Lascars.
- 2 Overseers
- and 1 Clerk for the Executive En-
gineer's Office in addition to the
two temporary clerks already men-
tioned.

The Executive Engineer has one
temporary Overseer who is entertained
for 3 months and he asks for a
Clerk & Overseer for him. but this
Overseer is really supernumerary
to the Establishment, and for
this sanction is necessary for
his retention, as well as for his
Clerk and Lascars.

6. I agree with the En-
gineer.

Executive Engineer that there should
be a separate Sub Divisional
Officer for the great number of
minor works that will gradually
be put in hand. Three Overseers
will not be too many for the
Sub Division, and I trust that
this Establishment with a
Clerk for the Executive En-
gineer's Office may be sanc-
tioned.

I have the honor to be

THE SUPERINTENDING ENGINEER,

5TH CIRCLE,

To

THE Chief Engineer
for Irrigation.

Dated 28th

Recd.

August 1884.

ENCLOSURES.

No. 2053

Increase of Establishment—

Submitting an application
of an—on account of Tank

Maintenance Scheme Works.

Letter N^o 2053 of 28th August 1884 from
Superintending Engineer, Fifth Circle.
N^o 150-I

Note by the Chief Engineer for Irrigation

The Superintendent of Works,
Tank Maintenance Scheme, has
transferred one overseer from
the N^o 2 Tank Division to the
Chingleput Division for carrying
out Tank Maintenance works.
This transfer is recommended
for approval. The proposal
of the Superintending Engineer,
Fifth Circle, to form a separate
sub-division to carry out
Tank maintenance works in
the Chingleput Division is
supported. One Sub Engineer and
3 overseers together with office
reestablishment required for them
and an additional clerk for
the Executive Engineer's office
have been applied for. But

as one overseer has already been transferred from the N. 2 Tank Division, two overseers instead of 3 will be sufficient.

The temporary overseer entertained for 3 months may continue for another 6 months.

2. The works connected with the Tank Maintenance Scheme must take precedence of ordinary irrigation works except those already commenced or given on contract. As the existing establishment of the Chingleput Division is unable to attend to the ordinary irrigation works as well as the Tank Maintenance works, the following additional temporary establishment is recommended for sanction for 6 months from the balance of the lump sum provided for Temporary establishment in the current year's Provincial Budget, as

h 8

Provincial funds get credit for a contribution at 23 per cent on expenditure on Tank Maintenance Works carried out by the ordinary Divisions.

1 Supervisor 1 st grade	Rs 200
1 Overseer	2200/9 60
