GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue, dated 2nd August 1884, No. 2644 :—

Read—the following letter from H. St. A. GOODRICH, Esq., Acting Collector of Bellary, to the Secretary to the Board of Revenue, dated 3rd July 1884, No. 1900 :—

The sanction of Government has this day reached me to the levy of a royalty of one anna per six square feet on slabs quarried in certain quarries at Bellary, three annas per cubic yard upon ordinary stone having been already sanctioned.

2. I have been in communication with those who have hitherto authorized the working of these quarries. The Deputy Assistant Quartermaster-General, the Executive Engineer, Public Works Department, the Executive Engineer, Southern Mahratta Railway Co., the Vice-President, Municipal Commission, as well as the Collector or Assistant Collector, have all, at different times, given licenses to contractors who wished to quarry. No guard has ever been maintained, and I see no reason to believe that every one who wished to quarry has troubled himself about a license, which, if given, was given unconditionally; and to enforce conditions, had there been any, no special machinery had been provided.

3. When the Government G.O., P.W.D., dated 23rd October 1882, No. 2746 W., declined to invest the local Public Works Department officer with exclusive control of these quarries, they gave no particular directions as to the manner in which they should be worked.

4. The quarries are unfenced, situated in waste land between the old European cemetery and the glacis of the lower fort. The unlicensed removal of stone cannot possibly be checked unless a guard is maintained, and the minimum guard would be a quarry-keeper and assistant quarry-keeper, who should be paid Rs. 10 and 6 per mensem, respectively, and who should live in a hut or small house which might be erected at the quarry at no great cost. If a police guard be preferred, four men will be needed. No servants are available from the existing revenue establishment to do the duty.

5. I should greatly prefer the notification of an auction of the right to cut stone in the quarry for six months and its sale to the highest bidder. I would sell Basavannakunta, Oodrakunta and Singara Oodrabunda separately.

The whole surface of the country round Bellary abounds in open quarries, and the questioning of all stone in transit within municipal limits over eight square miles will lead to extortion but not to the realization of revenue.

Karkhana Oodrabunda should not be worked, it being useful as a reservoir of water at the commissariat lines, where camels, mules and bullocks are kept.

6. I respectfully request sanction for the establishment which I have described above on the minimum necessary, or permission to sell the right to quarry under the Collector's directions.

Resolution—dated 2nd August 1884, No. 2644.

Submitted for the orders of Government with reference to G.O., dated 16th June 1884, No. 755.

2. In the circumstances explained, the Board recommend that the Collector be authorized to lease out the quarries, the right to work them for periods of six months being sold by auction.
