READ—the following paper:—

Proceedings of the Board of Revenue, dated 12th August 1884, No. 2800.

Read—the following papers:—

G.O., dated 3rd July 1884, No. 1664 W., Public Works.

Read—the following Proceedings of the Board of Revenue, dated 11th June 1884, No. 1986:—

Read—the following letter from J. STURROCK, Esq., Collector of South Canara, to the Secretary to the Board of Revenue, dated Bekal, 29th May 1884, No. 1276:—

I have the honor to submit, herewith, for sanction and the provision of the necessary funds, an emergent plan and estimate (prepared by the Executive Engineer and duly approved and countersigned by the Superintending Engineer of the circle) for repairing and otherwise protecting, at a cost of Rs. 2,870, the sea-face of what is called the "Marine yard" at Mangalore, which is now being gradually encroached on by the waves rolling in at the new mouth of the Netrávati, and must eventually be washed away altogether if steps are not taken to protect it.

2. The marine yard has long ceased to have any connection with the Marine department. Until lately it was mainly occupied by salt cotaurs, and there are still two cotaurs kept for salt for the fish-curing yards and for the Laccadive islanders, and for any other purpose for which they may be found useful, as, for instance, the storage of minor forest produce brought to depôt at Mangalore. Besides these cotaurs there is the old salt cutcherry, and a very substantial godown for the storage of the coir from the Laccadive islands, the aggregate value of the buildings being estimated by the Public Works department at Rs. 15,625, in addition to which it must be remembered that the land itself is very valuable, situated as it is on the river bank almost directly opposite the new mouth.

3. As the proposed outlay is thoroughly justified by the importance of the interests involved, I have the honor to request that the estimate may be sanctioned as an emergent work and funds allotted at an early date.

4. In forwarding the plan and estimate to me, the Superintending Engineer states that as he understands that I consider the work emergent, he has ordered it to be proceeded with, and asks me to report this when forwarding the estimate for sanction. I learn from the sub-division officer, however, that the orders to proceed with the work have since been countermanded.

Resolution—dated 11th June 1884, No. 1986.

The plan and estimate for Rs. 2,870 for repairing and protecting the sea-face of what is known as the marine yard at Mangalore are herewith submitted to Government for early sanction. The value of the buildings situated in the yard—the coir godown and salt-sheds—is estimated at Rs. 15,625, and the land itself is considered

very valuable. The local officers recommend that steps should be taken at once to prevent further erosion, and the Board accordingly request that the work may be treated as emergent and the necessary funds provided in the Public Works department.

Revenue Department, with two original enclosures (to be returned).

Mis. No. 2647, Revenue.

Transferred to the Public Works department with expression of concurrence in the Board's recommendation.

OOTACAMUND,
23rd June 1884.

(Signed) H. E. STOKES,
Secy. to Govt., Rev. Dept.

Telegram to the Superintending Engineer, IV Circle, dated 25th June 1884.

Order—dated 3rd July 1884, No. 1664 W., Public Works.

The estimate, amounting to Rs. 2,870, for repairing and protecting the "Marine yard" at Mangalore is sanctioned.

2. The question as to incidence of the charge will be considered in the Financial department. From the Collector's letter it would appear that the yard is used principally by the Salt and Forest departments.

3. The Superintending Engineer has already been instructed, by telegraph, to put the work in hand in anticipation of an allotment of funds.

4. This sanction will be registered and classified on receipt of orders in the Financial department on the question raised in paragraph 2.

(Signed) E. GIBSON,
Secretary.

To the Collector of South Canara,
with Government Order and plan to be returned.

ENCLOSURE No. 1.—Plan.

From J. STURROCK, Esq., Collector of South Canara, to the Secretary to the Board of Revenue, dated Mangalore, 31st July 1884, No. 1801.

In reply to the Board's reference, dated the 22nd instant, on Government R. No. 3194 of 1884, I have the honor to state that the "Marine yard" at Mangalore is not, as supposed in paragraph 2 of the Government order in the Public Works department, used principally by the Salt and Forest departments, but rather by the Revenue department, which is specially interested in its preservation on account of the large coir godown standing on it. The other buildings, which consist of two salt cotours and a small salt cutcherry, all thatched buildings, are of less importance. Of these, one salt cotaur is used by the Salt department for the storage of salt required for the fish-curing yards and the Amindivi islands. The other cotaur is empty at present, but it is proposed to use it for general purposes, such as the storage of minor forest produce brought to depôt at Mangalore and any other purpose for which it may be found useful.

Resolution—dated 12th August 1884, No. 2800.

Submitted to Government with reference to G.O., dated 16th July 1884, No. 1576, Financial department.

2. The plan received with the Government order is herewith returned.
