GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following letter from L. R. BURROWS, Esq., President, Ootacamund Municipality, to the Chief Secretary to Government, dated Ootacamund, 9th October 1884, No. 364:—

I have the honor to forward, for the orders of Government, extract from the proceedings of the commissioners on the subject of the Ootacamund agraharam drainage.

2. In consequence of the construction of the main sewer, which runs parallel to the agraharam, by the Public Works Department, the main channel bank level has been so raised as to form a barrier to the flow of drainage from the backyards of the agraharam, thus causing pools of foul water to stagnate along the line of the new sewer.

3. As I understand that there is a saving from which the necessary additional drains could be constructed, I trust the request of the commissioners will receive the favorable consideration of Government.

ENCLOSURE.

Extract from the Proceedings of a Meeting of the Municipal Commissioners of Ootacamund held on Thursday, the 2nd October 1884.

* * * * *

5. List of owners of land adjoining the main sewer who should be called upon to drain off stagnant water within their premises.

The commissioners are of opinion that the present state of the agraharam is primarily, if not entirely, caused by the construction of the main sewer, and they think that, as the Government have undertaken the drainage of the town, the drainage of this part of it should also be undertaken by them by the construction of stone drains similar to those built in the bazaar. The commissioners are apprehensive that in the event of an outbreak of cholera in the station the agraharam is likely to be the first affected.

No. 364

3573/1/84

From L. R. Burrows Esquire
President,
Potacamund Municipality.

To The Honorable E. Webster
Chief Secretary to Government
Financial Department
Ootacamund

SIR,

I have the honor to forward for the orders of Government Extract from the Proceedings of the Commissioners on the subject of the Agraharam Drainage.

In consequence of the construction of the main sewer, which runs parallel to the Agraharam, by the P. W. D, the main channel bank level has been so raised as to form a barrier to the flow of drainage from the backyards of the Agraharam, thus causing pools of foul water to stagnate along the line of the new sewer.

2. I understand that there is a saving from which the necessary additional drains could be constructed. I therefore request

request of the Commissioners will receive the favourable Consideration of Government.

I have the honor ble
