GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following papers :—

From R. B. BUCKLEY, Esq., Officiating Under Secretary to the Government of India, Public Works Department (Civil Works—Miscellaneous), to the Secretary to the Government of Madras, Public Works Department, dated Simla, 10th September 1884, No. 341M.

Her Majesty's Government having expressed a wish that India should participate in a prominent manner in a Colonial Exhibition, which it is proposed to hold at London during the year 1886, the Government of India have accepted the responsibility of arranging for an adequate representation of the country.

2. Fuller information on the subject will be communicated hereafter, but in the meantime I am to request that this office may be informed by wire what approximate extent of space, if any, will be required at the exhibition for the purposes of the Public Works Department.

3. A reply has to be sent to the Secretary of State before 1st October next.

Telegram from the Secretary to the Government of India, Public Works Department, Simla, to the Secretary to the Government of Madras, Public Works Department, dated 24th September 1884.

Reply as to space required in Colonial Exhibition of 1886 by 29th at latest.

Telegram from the Agent, South Indian Railway, to the Consulting Engineer for Railways, dated Trichinopoly, 26th September 1884.

No space wanted in London Exhibition.

Telegram from the Agent and Manager, Madras Railway Company, to the Consulting Engineer for Railways, dated Madras, 26th September 1884.

Your telegram regarding London Exhibition. Should like space 25 feet by 14 reserved for railway exhibits.

From Captain H. D. LOVE, R.E., Principal, Civil Engineering College, to the Secretary to Government, Public Works Department, dated Madras, 25th September 1884, No. 508 C.

In reply to your telegram, dated 24th September 1884, I have the honor to state that I should be glad to render assistance in carrying out your suggestions if I had the requisite means at my disposal, viz., workshops, detail plans and money. The last two are probably readily procurable, but this college has, as yet, unfortunately, been furnished with no facilities for carrying out practical carpentry on its premises.

2. I would suggest that the Public Works shops at Madras and Dowlaishweram might be asked to execute the models desired. The latter could certainly furnish

good specimens of the Godávari anicut and head-sluices, and possibly also of the Kistna head works. It is to these shops and to those of the Madras Railway that I myself apply for college models requiring any but the simplest workmanship.

3. The amount of space necessary for the models you propose will, of course, depend on the scales to which they are constructed. I should say that general site models of head works should not be less than 1 inch to 40 feet; while head-sluices and similar masonry works might be 1 inch to 2 feet. Isolated portions of works, as a single vent of head-sluice with shutters and gearing might be 1 inch to 1 foot.

ORDER—dated 19th November 1884, No. 2889 W., Public Works.

His Excellency the Governor in Council is of opinion that the most appropriate manner in which the Madras Public Works Department can be represented at the Colonial Exhibition of 1886 will be by sending models of some of the principal irrigation works within the Presidency; inasmuch as such works constitute the chief engineering speciality of this part of India.

2. Those named below have, in communication with the Chief Engineer for Irrigation, been selected for exhibition:—

(1) Kistna Anicut.
(2) Do. enlarged head-sluice with shutters complete.
(3) Do. do. under sluices do.
(4) Grand Anicut, Cauvery and Vennár Regulators.
(5) Lower Coleroon Anicut.

3. Models of the above will be made up at the Public Works Workshops, Madras, the Principal of the Civil Engineering College being requested, in the Educational Department, to assist the General Superintendent in their preparation.

4. The following models will also be made up at the Madras Workshops under the general supervision of the Consulting Architect:—

(6) Board of Revenue and Civil Engineering College buildings at Chepák, and at the Dowlaishweram Workshops should be prepared a model of—

(7) First-class Staff Boat, Godávari.

5. To these may be added—

(8) Specimens of fine plaster, to be prepared by the Consulting Architect.

6. The scale of the models must be decided with reference to the space available, on which point further instructions will be issued by the Chief Engineer.

Forwarding copy of proceedings issuing instructions in regard to the exhibits from the Madras Public Works Department for the — .

2889 + 2890

Hon.

The models I would respectfully should be sent to the Exhibition are

1. Victoria Aniaut
2. do enlarged Head Shewing with Skeleton complete
3. do do undressing do
4. Grand Aniaut, Cover & Pannam Regulator
5. Lower Coleroon Aniaut
6. 1st Class Sailing Boat for Cavery -
7. Chapam Buildings
8. Model of Pillar Madras Cathedral.
9. Specimens of fine plastering

All of these except No 6 could I think best be made at the Madras Workshops, and it would perhaps be well to ask Captain Low to assist the Supt in preparing the models - the scale must be selected according to space available.

No 6 might be made in the Dindigul Superintendents Workshops.

One space asked for is 50 (25' x 14' -
