SUPERINTENDING ENGINEER'S OFFICE,

5TH CIRCLE, MADRAS,

Chepauk, 2<sup>d</sup> December 1884.

From

THE SUPERINTENDING ENGINEER,

5TH CIRCLE,

To

THE

Chief Engineer  
P. W. D.

SIR,

Enclosures.

I have the honor to request that sanction may be given under Section 184 and Rule 3 of Section 188 of the Civil Pension Code to the employment of R. Anantha Mudaliar, a pensioned Clerk, formerly in the Adjutant General's Office, as a temporary Clerk on Ruper 20, in the Shingleput Division, upon the sanction given in S. O. No. 2240<sup>th</sup> of 12<sup>th</sup> September 1884.

1884.

2. Annuntha Mudaliar is  
an invalid pensioner. His  
pay in the Adjutant Gene-  
ral's Office was Rupees 65.  
His pension Rs 18-12-10 and  
his pay in the Chingleput Di-  
vision, Rupees 20, do not together  
exceed the pay he was in re-  
ceipt of, on being pensioned.

3. The cause of Annuntha  
Mood's being invalided, was,  
that he was unable to stand  
the climate of Ootacamund.

Annuntha Mudaliar

**Tank Maintenance Works in  
Chingleput Division**

Proposed formation of a separate sub-division and entertainment of an additional temporary establishment to carry out —, sanctioned.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General  
Establishment.

READ—the following papers :—

From Lieutenant-Colonel H. SMALLEY, R.E., Executive Engineer, Chingleput Division, to the Executive Engineer, No. 2 Tank Division, dated Chingleput, 11th August 1884, No. 2375.

With reference to your letter, No. 17/821, dated 5th instant, I have the honor to express my opinion, as asked for by you, that there is not a fair probability of the sums estimated by you being spent on the Tank Maintenance Scheme in this division before the end of this official year. I consider that about Rs. 15,000 on new works and Rs. 40,000 on repairs would be the probable limit of expenditure, and that only provided estimates were sanctioned in good time and that our present executive staff were much increased.

The four best working months of the year have gone by without any expenditure on these works ; estimates now in progress only amount to Rs. 5,000 for new works and Rs. 11,000 for repairs, in round numbers. It will take some time to procure additional executive agency. In October, November and December little can be done, and even in January and February, when the tanks are full. We have Rs. 1,12,000 to spend on the ordinary irrigation works of the division, and nearly Rs. 1,00,000 on Military and Provincial works, all of which draw off labor. These works are all given out on contract and expenditure cannot therefore be suspended on them for the sake of the Tank Maintenance works. Taking all these facts into consideration, I do not see my way to spending more than I have named above.

No. 1444 T.

Endorsement on the above.

Submitted to the Chief Engineer for information.

One overseer will be at once placed under the orders of the Executive Engineer, Chingleput division, in anticipation of formal sanction to the transfer. It will, however, be observed that this addition to the regular establishment (which is all that can be spared with due regard to the investigation of works and preparation of estimates) is much below what the Executive Engineer, Chingleput, considers necessary.

(Signed) J. PENNYCUICK, Lieut.-Col., R.E.,  
22nd August 1884. Superintendent of Works, Tank Maintenance Scheme.

From Colonel H. L. PRENDERGAST, R.E., Superintending Engineer, V Circle, to the Chief Engineer for Irrigation, dated Bangalore, 28th August 1884, No. 2053.

In reply to your memorandum, No. 28 C.N., of the 14th instant, I have the honor to report that the Executive Engineer of the Chingleput division has been in correspondence with the Executive Engineer of the Tank division, and stated that the probable limit of his expenditure on minor works would be Rs. 15,000 on new works and Rs. 40,000 on repairs, provided estimates were sanctioned in good time, and his executive staff were increased.

2. Colonel Smalley mentioned, in his letter of the 11th instant, that he had Rs. 1,12,000 to expend on the ordinary irrigation works, and that the works were "all given out on contract and expenditure cannot therefore be suspended on them for the sake of the Tank Maintenance works."

With the ordinary works thus in full swing, I would have been glad to have carried them on and to have had the reduction made instead in the Tank Maintenance allotment, for but few estimates were furnished, to the aggregate value of Rs. 16,000, although more were promised.

3. There has been every expectation of fully utilising the ordinary grant, and a very doubtful prospect of getting through the Tank Maintenance allotment. It is always a pity to stop works that are started and to disappoint contractors who have entered into engagements to carry out works.

But if it is necessary that 20 or 30 thousand rupees should be surrendered, I must instruct the Executive Engineer to make arrangements to that effect. I beg that I may have orders on this point.

4. The Executive Engineer of Chingleput applies, in the statement enclosed, for extra establishment, viz. :—

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| Executive, temporary—                                                                 | RS. |
| 1 Sub-divisional officer ... ..                                                       | 250 |
| and permanent—                                                                        |     |
| 2 Overseers ... ..                                                                    | 120 |
| also, office, temporary (for Executive Engineer's office)—                            |     |
| 1 Clerk (in addition to the two temporary clerks that are at present employed) ... .. | 20  |
| and permanent—                                                                        |     |
| 1 Clerk ... ..                                                                        | 45  |
| Increase to pay of storekeeper... ..                                                  | 5   |
| For the sub-divisions, temporary—                                                     |     |
| For the temporary sub-division officer—                                               |     |
| 1 Clerk ... ..                                                                        | 20  |
| 1 Messenger ... ..                                                                    | 6   |
| 3 Lascars ... ..                                                                      | 18  |
| For the present temporary overseer—                                                   |     |
| 1 Clerk ... ..                                                                        | 15  |
| 1 Lascar ... ..                                                                       | 6   |
| For 2 Overseers (permanent)—                                                          |     |
| 2 Clerks ... ..                                                                       | 35  |
| 2 Lascars ... ..                                                                      | 12  |
| Total ... ..                                                                          | 552 |

5. The Executive Engineer considers that Chingleput should be made a first-class division office, and he asks for a permanent clerk on Rs. 45, with difference of pay Rs. 5 for the storekeeper, or Rs. 50.

The additional work thrown on the division is not permanent, and I do not think it necessary to recommend any permanent establishment being given. I would therefore deduct Rs. 50 proposed for the office and treat the rest of the establishment required as temporary, viz. :—

1 Sub-Engineer, sub-divisional officer } each with the ordinary establishment of  
2 Overseers, } clerk and lascars; and  
1 Clerk for the Executive Engineer's office, in addition to the two temporary clerks already sanctioned.

The Executive Engineer has one temporary overseer who is entertained for three months, and he asks for a clerk and lascar for him; but this overseer is really supernumerary to the establishment and further sanction is necessary for his retention as well as for his clerk and lascar.

6. I agree with the Executive Engineer that there should be a separate sub-divisional officer for the great number of minor works that will gradually be put in hand. Three overseers will not be too many for the sub-division, and I trust that this establishment with a clerk for the Executive Engineer's office may be sanctioned.

P.S.—Since the above was written, I have received memorandum No. 29 C.N., but my letter does not require alteration thereupon.

(Initialled) H.L.P.

No. 150 I.

*Note by the Chief Engineer for Irrigation.*

The Superintendent of Works, Tank Maintenance Scheme, has transferred one overseer from the No. 2 Tank division to the Chingleput division for carrying out Tank Maintenance works. This transfer is recommended for approval. The proposal of the Superintending Engineer, V Circle, to form a separate sub-division to carry out Tank Maintenance works in the Chingleput division is supported. One Sub-Engineer and three overseers together with office establishment required for them and an additional clerk for the Executive Engineer's office have been applied for. But as one overseer has already been transferred from the No. 2 Tank division, two overseers instead of three will be sufficient. The temporary overseer entertained for three months may continue for another six months.

2. The works connected with the Tank Maintenance Scheme must take precedence of ordinary irrigation works, except those already commenced or given on contract. As the existing establishment of the Chingleput division is unable to attend to the ordinary irrigation works as well as the Tank Maintenance works, the following additional temporary establishment is recommended for sanction, for six months, from the balance of the lump sum provided for temporary establishment in the current year's Provincial budget, as Provincial funds get credit for a contribution at 23 per cent. on expenditure on Tank Maintenance works carried out by the ordinary division :—

|                                                |     |

| Total ... ..                                   | 386 |

OOTACAMUND,  
5th September 1884.

To the Chief Engineer, Public Works Department.

(Signed) J. O. HASTED, Colonel, R.E.,  
Chief Engineer for Irrigation.

ORDER—dated 12th September 1884, No. 2240 W., Public Works.

The proposals of the Chief Engineer for Irrigation are sanctioned, and the additional temporary establishment applied for, costing Rs. 386 per mensem, may accordingly be entertained for a period of six months.

2. The sanction accorded in these proceedings has been registered as Provincial No. 43 W. of 1884-85, and classified as Establishment, Temporary.
