The Consulting Architects proposals are approved.
2. With respect to the scale to be adopted for the models, Lt. Colonel Morant will ascertain from the Gen. Insp^t P.W. workshops the space which will be occupied by the models of irrigation works. He will then be in a position to determine the most suitable scales for the model of the Port & Telegraph Office, and of the Shornur Rajah's Bara.
3. The entire space which has been applied for, for the P.W. Dept., is 25 feet by 14 feet. 9/12 Ill.

offices be substituted for one of the Board of Revenue. The Post and Telegraph Office has two open Courtyards and a very broken and peculiar roof which would shew up in a model.

2. Might further suggest that a model of the Dharma Râjah's Ratha at Mahauellipore be also sent?

This Ratha is the most southern of the group and is the most complete and most interesting of the whole.

A model shewing every detail would not occupy an area of more than a square yard. It would, most certainly, be a subject of very great interest to English Archaeologists and Architects. This office could undertake the construction of this model.

3. Might I submit further that the preparation and submission of some good Architectural Photographs or perspective elevations of certain selected Buildings

ings at Chépâk are such as would
not look better in a solid model
than they would in a perspective
drawing or photograph. They have
only uniformly flat featureless roofs
and no handsome Court yards, or
any varieties of that kind which
a model illustrates better than
a picture. Might I suggest that
