Civil Works.

Read—the following letter from H. B. GRIGG, Esq., M.A., Director of Public Instruction, to the Chief Secretary to Government, dated Madras, 16th July 1884, No. 4768:—

I have the honor, with reference to G.O., dated 11th March 1884, No. 491, Public, to submit, for the sanction of Government, the accompanying plans and estimate, amounting to Rs. 2,000, for making improvements to the Government school-house at Cuddapah.

2. The Superintending Engineer of the III Circle states that no provision has been made for the work in the current year's provincial budget; and that an allotment of funds is necessary to admit of the work being carried out in the year. Owing to the bad condition and insufficient accommodation of the school, it is very desirable that the improvements proposed should be effected at an early date. I beg therefore that, if practicable, the necessary instructions may be issued in the Public Works Department for the execution of the work in the current year.

No. 1713, Educational.

Approved and transferred to the Public Works Department.

(By Order.)

From Collr. of Anantapur No. 233/27.9.82

—

While admitting the desirability on general grounds of opening Telegraphic communication with Anantapur, the Govt. observe that the line will, as pointed out by the Collector, also serve the trading community, who may perhaps be disposed to guarantee a certain proportion of the interest on the capital outlay and cost of maintenance. The Collector is requested to enquire whether any such guarantee could be obtained.

PUBLIC DEPARTMENT.

Letter—to
The DIRECTOR-GENERAL of TELEGRAPHS.

Sir,

I have the honor to forward two letters from the Collector of Anantapur, a district newly constituted in this Presidency, and to state that this Government are of opinion that Anantapur should be connected by telegraph with the Presidency Town and Ootacamund. They would be glad to receive from you a plan and estimate for effecting this object.

2. One method would be to connect Anantapur with the Government main wire at some point on the main line, say, Gooty. But the Government think it would be better to effect an arrangement with the Railway authorities, and have the Anantapur line taken into the Railway Telegraph Office either at Gooty or Tadpatri to be worked there by the Railway signallers.

3. The Government would be glad to know what is the most economical office that could be proposed for the Anantapur end. They do not anticipate much traffic.

I have the honor to be,
Sir,
Your most obedient servant,

Fort St. George,
30th March 1882.

Ag. Chief Secretary.

Exd. J. Wright.

9

30TH MARCH 1882, No. 193, PUBLIC.

2096.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following letter from N. A. ROUPELL, Esq., Acting Collector of Anantapur, to the Chief Secretary to Government, dated Gooty, 21st January 1882, No. 63:—

As there is no telegraphic communication at present with Anantapur, the head-quarters of this district, I have the honor to submit, for the favorable consideration of Government, the advisability of extending the wire to it from the Tadpatri station of the Madras Railway Company.

2. The Tadpatri and Gooty stations are equi distant (32 miles in either case) from Anantapur. The Tadpatri line, however, crosses no large river, as the road from Gooty does, and would be the route adopted in the event of the introduction of a steam tramway into this district. Upon the latter point, I shall have the honor to address you in a separate letter.

READ—the following letter from N. A. ROUPELL, Esq., Acting Collector of Anantapur, to the Chief Secretary to Government, dated Penukonda, 11th February 1882, No. 164:—

Adverting to my letter, No. 63, dated the 21st ultimo, on the subject of extending the telegraphic communication to Anantapur, the head-quarters of this district, I have the honor to state that the amount of business, private or public, that would be done on this extension line is at present very limited.

2. There is not much traffic here, and beyond the weekly telegrams and occasional emergent references from and to the Presidency authorities, there would hardly be any public transactions for which the line would be used.

3. I was under the impression that this extension line could have been put up at a very moderate outlay, but as from Mr. Maclean's demi-official note of the 30th ultimo it is estimated to cost Rs. 25,000, I will not, under the circumstances, press the matter further.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

No. 99.

Read—the following G.O., dated 6th July 1882, No. 509, Public:—

Read—the following letter from Colonel R. MURRAY, Director-General of Telegraphs in India, to the Chief Secretary to the Government of Madras, Public Department, dated Simla, 22nd June 1882, No. 856 C.G.:—

In reply to your letter, No. 193, of the 30th March, on the subject of opening a Telegraph Office at Anantapur, I have the honor to forward yon a copy of a memorandum which I have drawn up with reference to this and some other similar cases, and which explains in general terms the cost of such extensions as the one referred to.

2. You will observe primarily that there are two methods of working such an office, viz., either by a Departmental Telegraph Master costing about Rs. 1,800 a year, or a non-departmental Signaller costing about Rs. 456.

3. The latter cannot have the experience or the knowledge of the former, and should always be in direct communication with, and under the check of, a regular Departmental Telegraph Office, which would generally assist and control him.

4. In the case of Anantapur, there are three methods by which it can be worked, viz.:—

I. By a non-departmental Signaller (*i.e.*, a clerk in the Collector's office) in connection with the Railway Office at Tadpatri, which I certainly do not recommend.

II. By a non-departmental Signaller in connection with the Government Telegraph Office at Bellary.

III. By a regular Telegraph Master in connection with the Railway Office at Tadpatri.

5. As there appears to be no prospect whatever of the office paying its expenses for very many years, I do not feel justified in applying to the Government of India for permission to establish the line from Imperial Funds on the terms of the limited guarantee accepted by His Excellency the Governor of Madras in the Devála case, and, if made at all, it should, I would submit, be on the terms of Government Resolution No. 169-90 T. of the 31st May 1880; *vide* also Section II of the attached memorandum.

6. Under these terms, the Government of Madras would pay for the capital cost, which would be Rs. 18,800 if the line were made to Tadpatri, and Rs. 27,000 if made to Bellary.

7. I will now endeavour to show the probable relative cost of the three different plans of establishing communication with Anantapur which I have referred to above, and assuming that whether the Government of Madras or the Government of India found the capital, the annual value of the money would be the same. I have in these comparative calculations entered 5 per cent. interest on the capital cost in each case.

ESTIMATE I.

A non-departmental Signaller in connection with Tadpatri.

	RS.	RS.
Cost of the line	18,800	
Interest at 5 per cent.	... ...	940
Maintenance and depreciation of line	... ...	513
Interest on and depreciation of apparatus	... ...	200
Non-departmental Signaller, 365 days at Rs. 1-4-0 a day ...		456
Total ...		2,109

This method, however, I deprecate on the score of inefficiency.

ESTIMATE II.

A non-departmental Signaller in connection with the Government Office at Bellary.

	RS.	RS.
Cost of the line	27,000	
Interest at 5 per cent.	... ...	1,350
Maintenance and depreciation of line	... ...	910
Interest on and depreciation of apparatus	... ...	200
Non-departmental Signaller ...	... ...	456
Total ...		2,916

ESTIMATE III.

A regular Telegraph Master in connection with Tadpatri.

	RS.	RS.
Cost of the line (as in I)...	18,800	
Interest at 5 per cent.	... ...	940
Maintenance and depreciation of line	... ...	513
Interest on and depreciation of apparatus	... ...	200
Telegraph Master	... ...	1,800
Office-rent, say	... ...	360
Total ...		3,813

8. The second plan is combined with efficiency the most economical, and the one I should recommend, but it is for His Excellency the Governor to decide whether, considering the high cost of even the most economical plan, it is at present worth-while to make the line at all.

ENCLOSURE.

Memorandum on the Cost of Telegraph Extensions made under Guarantees.

I.

THE TOTAL COST OF A TELEGRAPH EXTENSION includes the following items :—

(A) THE COST OF CONSTRUCTION OF THE LINE—which varies very considerably with the country in which it is to be made, the rainfall of the country, and the difficulties to be met with (*e.g.*, a large river crossing, if necessary, may alone cost over Rs. 2 per yard), and also varies according as to whether timber fit for posts may be procurable or not—indeed, without a survey and without local information, it is impossible to give any nearer estimate per mile than to say that the cost varies from Rs. 400 to Rs. 1,000.

(B) MAINTENANCE OF THE LINE.

The charge for this is calculated at Rs. 5 per mile for establishment, labor, and petty repairs, *plus* 2½ per cent. for depreciation of any permanent material, such as wire, brackets, insulators, iron posts, &c., *plus* a varying charge for depreciation of any more perishable material than iron used for posts.

In fixing this latter depreciation charge, the following figures are taken, viz. :—

2½ per cent. funded annually at 4 per cent. becomes 100 in about 24½ years.
5 " " " " " 15 "
7½ " " " " " 11 "
10 " " " " " 9½ "
12½ " " " " " 7⅙ "
15 " " " " " 6⅛ "
20 " " " " " 4⅔ "

and the rate of depreciation must evidently be fixed according to the period the material used may be expected to last.

(C) A RENT-FREE OFFICE GIVING SUITABLE ACCOMMODATION, OR THE RENT OF ONE.

(D) THE COST OF ESTABLISHMENT EMPLOYED.

(a) Branch offices worked by non-departmental Signallers.

In the case of a small branch office, which can be worked as a branch from and under the direct control of a regular departmental Telegraph Office (which should be his usual medium of correspondence on all Telegraph subjects), a clerk of any public office (in which accommodation may be given for the instruments, &c.) may be employed as a "non-departmental signaller," provided he shall have first obtained a certificate of qualification from a departmental officer qualified to grant it.

For this he must be able to write accurately from dictation, to be able to adjust his instruments, to manage his batteries, to have a fair knowledge of traffic rules and rates, and to signal and receive at a minimum speed of 16 and 12 words respectively per minute.

With such qualifications his pay would be 10 annas a day, besides an office charge allowance of 8 annas; but when able to send and receive 20 words a minute, his daily pay would be increased to 12 annas a day, besides the above charge allowance.

(b) Branch offices worked by departmental Telegraph Masters.

When such a signaller may not be procurable, or pending such a signaller being procurable, and in all cases where an office is interposed on an existing line, a departmental Telegraph Master must be employed, and in such cases his pay, inclusive of a charge (made under the rules in Chapter III of the Civil Pension Code and ordered in Public Works Department Circular No. 2 of 8th October 1879) for pension and absentee allowances, would amount to about Rs. 150 per mensem.

(c) Telephone offices worked by Postmasters.

In certain cases, with the previous consent of the Postmaster-General of the Province, a Telephone may be established in a Post Office, in order to work a small branch line from and under the direct control of a neighbouring departmental office. In such cases the Postmaster would be remunerated by a fee of 2 annas for every sent message, and a fee of 3 annas for every received message, the latter sum including the cost of delivery. The total amount paid for fees for telephoning messages is limited to Rs. 15 per mensem, except when a messenger may be regularly maintained by the Postmaster for the special purpose of delivering telegrams, in which case the maximum amount receivable is raised to Rs. 20 per mensem.

(E) A PROPORTIONATE CHARGE FOR DIRECTION, SUPERVISION, AND ACCOUNTS, which is estimated to average 10·73 per cent. per annum on all receipts and expenditure.

(F) A CHARGE OF 5 PER CENT. INTEREST AND 20 PER CENT. FOR DEPRECIATION, WEAR AND TEAR AND RENEWALS OF INSTRUMENTS, say together 25 per cent. on the cost of apparatus and electrical fittings, of which the prime cost may be taken at—

Rs. 1,000 for an Intermediate Telegraph Office.
" 800 for a Terminal or Branch Telegraph Office.
" 360 for a Branch Telephone Office.

II.

FOR PROVINCIAL LINES AND OFFICES established under the terms of Government Resolution, No. 169-90 T., of the 31st May 1881, the Local Government or Administration would provide C in kind and funds in full for A, and would pay annually the charges under B, D, E and F, retaining as a set-off the total Telegraph Department share of the receipts in those offices.

III.

FOR LINES AND OFFICES ESTABLISHED ON A LIMITED GUARANTEE under terms similar to those accepted by the Government of Madras (in letter No. 2219 W., dated the 7th September 1881) in the case of the Devála line and office in the Wynaad, and also similar to those sanctioned by the Government of India in letter No. 96 T., dated the 28th of February 1882, in the cases of the

Berhampore and the Jhalacotty lines in Bengal, the Local Government or Administration would guarantee annually 5 per cent. on A, the charges under B and F and provide C, whilst the Telegraph Department would contribute as its share towards the guarantee the charges under D and E, retaining *per contra* any receipts in excess of the total cost under the heads of A, B, C and F, in the hope of an indirect return by the general extension of business.

IV.

It must be understood, however, when considering the advisability of opening an office, that it is by no means certain either that the office can be interposed in an existing line, or that the cost of a line to it is merely the cost from it to the nearest line of posts.

For traffic reasons the number of offices in a series on the same wire must be limited, and in every case the point from which the connection to a new office is to take its departure must be considered on its own merits.

Hence, and for the reasons before given, Item A must in every case require its own special estimate.

V.

The previous sanction of the Government of India is necessary to the establishment of any lines on the terms of a limited guarantee, such as those referred to above as approved of for the Devála, Berhampore, and Jhalacotty lines and offices.

Simla,
12th June 1882.

(Signed) R. MURRAY, Colonel,
Director-General of Telegraphs.

Order—dated 6th July 1882, No. 509, Public.

Transferred to the Public Works Department for disposal.

(Signed) G. S. FORBES,
Acting Under Secretary.

No. 100.

Order—dated 15th July 1882, No. 1791 W., Public Works.

The Memorandum of the Director-General of Telegraphs on the cost of telegraph extensions made under guarantees, which contains useful information, will be promulgated for future guidance.

2. It is observed that the cost of the proposed extension to Anantapur is out of all proportion to the probable receipts. The project must therefore be abandoned for the present.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

No. 172.

Read—the following papers :—

G O., dated 6th October 1882, No. 1070, Public.

From N. A. ROUPELL, Esq., Acting Collector of Anantapur, to the Chief Secretary to Government, dated Anantapur, 27th September 1882, No. 233.

In his letter No. 856 C.G., dated 22nd June 1882, embodied in Proceedings of the Madras Government, Public Works Department, dated 15th July last, Nos. 99-100, the Director-General of Telegraphs in India, after detailing the costs of alternative schemes for the extension of a line of telegraph to Anantapur, expressed his inability to make any recommendation to the Government of India, on the ground that it was not likely that expenses would be paid for very many years. The Government, in their order of the last date, No. 1791 W., stated that the project must be abandoned for the present, as the cost of the proposed extension is out of all proportion to the probable receipts.

2. It is with much diffidence therefore that I venture respectfully to express the hope that the subject may again be taken into consideration.

3. It will, I think, be conceded that, in establishing telegraph lines in this country, the Government have been influenced in a very minor degree by the consideration whether any particular project would or would not prove financially remunerative. The decision in such cases has, I apprehend, rested upon political considerations, and upon the assistance which such a means of communication affords in the administration of public affairs.

4. It has thus far been acknowledged, in this Presidency at least, that the Government should be in direct telegraphic communication with the chief officer in each district.

5. I would, therefore, respectfully urge, on grounds of public policy, that the project for the extension of the line of telegraph to Anantapur may be reconsidered and adopted on the basis of method No. II and estimate No. II, detailed in paragraphs 4 and 7 of Colonel Murray's letter.

6. As to the cost being out of all proportion to the probable receipts, I would observe that though this might be so at first still the tendency would be to make use of the line, for private as well as for public purposes, more and more as time went on. There is ground for believing that the extensive dealers in grain and other produce in the south of this district would freely resort to the telegraph to ascertain the fluctuations in prices in Bellary and other markets, and for the general purposes of their trade.

Order—dated 6th October 1882, No. 1070, Public.

Transferred to the Public Works Department.

(Signed) C. G. MASTER,
Chief Secretary.

No. 172-A.

From N. A. ROUPELL, Esq., Acting Collector of Anantapur, to the Secretary to Government, Public Works Department, dated Anantapur, 7th December 1882, No. 363.

With reference to your memorandum, dated 16th October 1882, No. 903 E., I have the honor to state that the chief traders in this district are not willing to guarantee any proportion of the interest on the capital outlay and cost of maintenance of telegraphic line between Tadpatri and Anantapur.

No. 173.

Order—dated 22nd December 1882, No. 3418 W., Public Works.

While admitting the desirability on general grounds of connecting the town of Anantapur, the chief civil station of the district, with the general system of telegraphs, the Government, looking to the unremunerative character of the line, and the reluctance of the trading community to guarantee any portion of the receipts, are not prepared to sanction the proposal at present.

2. It is observed meanwhile that the station is within easy reach by post or messenger of the Telegraph Offices at Gooty and Tadpatri.

From
N. A. Roupell Esquire
Ag: Collector of Anantapur

To The Secretary to Govt.
D. P. W
Madras.

Sir,

With reference to your Memorandum dated 16th October 1882 No 9038, I have the honor to state that the Chief traders in this District are not willing to guarantee any proportion of the interest on the Capital outlay & cost of maintenance of Telegraphic line between Tadpatri & Anantapur.

Circulate

It is of course desirable that the head quarters of every district should be brought within the system of telegraphic communications but I think that the circumstances of Anantapur which is within easy reach by post or messenger of two telegraph stations Gooty & Tadpatri are hardly of a nature to warrant the whole burden of cost being thrown on Provincial funds and I am therefore inclined to adhere to the order of the 15th July No 1791.

PUBLIC WORKS DEPARTMENT.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

UNDER date the 22nd Decr/82.

Read the following :—

2096

From,

The Collector of Anantapur (H.E. No 233 d/ 27th Septr 1882)
Endorsement thereon by the Public Dept (" " 1070 d/ 6' Octr ")
From the Collr of Anantapur (" " 363 d/ 7' Decr ")

85

While admitting the desirability on general grounds of connecting the town of Anantapur, the chief civil station of the District, with the general system of Telegraphs, the Government, looking to the unremunerative character of the line, and the reluctance of the trading community to guarantee any portion of the receipts, are not prepared to sanction the proposal at present.

2. It is observed, meanwhile, ~~moreover~~, that the station is within easy reach by post or meſsenger of the telegraph offices at Gooty and Tadputri.
