W.

New stables, Revenue Board.

Estimate Rs. 2004.

This matter appears to have
been discussed by you personally
with Major Inayat.

The consent of the Rev. Board
to the shifting of the stables & the
new sites will apparently be necessary,
before the Estimate is formally sanctioned.

C.S.

To D. W.

Letter No. 1382

Dated the 8th December 1884

From the *Consig Architect to Govt*

NOTE OF REMARKS.

1. This estimate provides for removing the stables of the Rev. Board and Rev. Survey offices from their present site to one less objectionable. The estimate amounts to Rs. 2,004. A site plan showing a portion of Chepāk Park is submitted.

2. The estimate has been correctly prepared.

3. The new stables are to form three sheds, - two sheds run parallel to one another between the N.W. corner of the D.O.M. offices and the out-buildings of the B.E. College; the third lies west of, and in contact with the

tiffin rooms for Hindus.
4. Subject to approval
are not the proposed
new sites ill chosen?
It is probable a better
arrangement of the
stabling can be made
a little south of the
tiffin rooms and along
the east bank of the
canal - care being
taken that Capt. Love
will experience no in-
convenience from its
proximity to his residence.
The road on the east
side of the canal, extending
from the tiffin rooms
to the south end of the
compound round Capt.
Love's residence is not
much used so that, if
necessary, closing that
length need not be looked
on as of importance.
The site plan is not suffi-
ciently full and ample.
5. The proposal has not
been submitted to the
Rev. Board.

8th December 1884.

No. 1382

From

The Consulting Architect to the Government of Madras.

To

The Chief Engineer, Public Works Department.

In,

Enclosures.

1 Estimate
1 Plan.

With reference to our conversation
on the subject I have the honor to
submit a plan and estimate (the
latter amounting to Rupees 2004) for
improving the Chepak Park in the
vicinity of the new Senate House
Bridge.

2. The improvements are pro-
posed to consist of the removal of
the present Revenue Board office
stables, the abolition of the exis-
ting road past them, the laying
out of the ground in paths grass
and shrubberies, and the widening
of the roads contiguous to the

Senate House.

3. Only 3 of the existing four blocks of stables need be re-erected as they are now too large. Their new position will be as shown in red blocks, not far from the new floating latrine.

4. The existing road (dotted in plan) which it is proposed to abandon will not be used by the public when the proposed road to the west of it (for which an estimate was submitted with my No. 1408 dated 23rd January 1884) is made, and when the Senate House Bridge is completed which it will be shortly.

5. The cost of laying out the ground as proposed and of widening the roads round the Senate House can be met out of the existing grants for the improvement of the Park.

6. The new boundary of the

Government House Park might be as shown by the red dotted line partly skirting the new public roads.

7. The existing stables which are proposed to be removed are a great eyesore, and their vicinity ^{horde} is much fouled by the native keepers. When the Senate House Bridge and the already contemplated new road between the Gov's House and Lkepāk Parks are finished the existing cross road past the stables will hardly ever be used by the Public, the small area of park will be too much ~~roaded~~ and the stable block in the middle will be extremely unsightly and out of place. If the whole of the area proposed to be made into ornamental gardens be treated in the way suggested, with two bridges and the canal water between to add to their accessibility an agreeable
