READ—the following letter from Colonel J. BEATTY, R.E., Superintending Engineer, IV Circle, to the Chief Engineer, Public Works Department, dated Pálar Anicut, 29th November 1883, No. 546 W.:—

With reference to your circular, No. 1596, of 24th June 1880, I have the honor to submit, for sanction, a plan and an estimate, amounting to Rs. 1,140, for improving the lightning conductors of the powder magazine in the Vellore fort, in North Arcot district.

2. The existing arrangement of the rods, &c., of the lightning conductors of the magazine is defective and unsafe. The wooden frames which support the rods are rotten and require constant patching; and even with this patching they are likely to fall down in a strong wind.

3. This estimate has, therefore, been prepared to improve thoroughly the lightning conductors in accordance with the appendix A to the standard specification.

4. The plan and estimate have been approved and countersigned by the Military authorities.

As the work is of an
emergent character, it
might be carried out at
once, in anticipation of
allotment, as a Special
Case. There is no definite
Code rule authorising such
procedure, but it is
frequently adopted. If
the G. of S. sanction the
add grant recently ap-
plied for under Minor Works,
this work can be
provided for.
