No. 204.

Office Note.

With reference to memorandum No. 2607-C, dated 22nd December 1883, from the Public Works department, the undersigned is directed to inquire whether any funds are available for the survey and preparation of plans for the water-supply of Coonoor.

Fort St. George,
31*st January* 1884.

(Signed) E. F. WEBSTER,
Chief Secretary.

From Colonel J. SHAW-STEWART, R.E., Secretary to Government, Public Works department, to the Chief Secretary to Government, dated Chepâk, 2nd February 1884, No. 226 D.

No difficulty is anticipated in finding the requisite funds. The Superintending Engineer estimates the cost of the survey to amount to Rs. 1,350.

Order—dated 1st March 1884, No. 460, Financial.

The President will be informed with reference to paragraph 1 of his letter read above that the funds required for the preparation of plans and surveys for the Coonoor water-supply scheme will be provided in the Public Works department when necessary. On paragraphs 3 and 4 orders* have already been passed.

* G.O., 31st January 1884, No. 223.
„ 4th February „ „ 261.

2. The President's assumption in paragraph 5 is correct.

FINANCIAL DEPARTMENT.

Read—the following papers:—

From F. BRANDT, Esq., Collector of Nílgiris and President of the Municipal Commission, Coonoor, to the Chief Secretary to Government, dated Ootacamund, 10th December 1883, No. 136.

Referring to G.O., No. 2771 (Mis.), Financial department, dated 5th December 1883, I have the honor to ask whether it is intended that the Coonoor Municipal Commission shall find the funds (Rs. 1,350) estimated to be required for plans and surveys for the water-supply scheme for Coonoor.

2. It seems to me to be useless this commission going to the expense of preparation of plans and surveys unless they see their way clearly to obtaining the money requisite for carrying out the scheme.

3. As I have informed Government in my letter of the 8th November 1883, No. 129, it is proposed by the commission to raise money by means of a loan for this purpose: but I also asked that Government will be pleased to give a grant-in-aid from Provincial funds; and the budget for 1884-85 has been framed, and is now before me with provision for the expenditure considered absolutely necessary, and framed on the supposition that the money will be raised and given.

4. I would therefore ask for final orders on the proposals above referred to and on the budget before committing the commission to expenditure on plans and surveys for an undertaking which they may not be able to carry out, assuming that it is intended that the commission is to pay for such survey.

5. I believe I am correct in thinking that the surveys for the water-supply project in Ootacamund are now being carried on out of Provincial funds.

No. 2607-C.

Memorandum.

In reply to memorandum from the Chief Secretary to Government, No. 2580, dated 20th December 1883, the undersigned has the honor to invite attention to the Proceedings of Government quoted below, which have been communicated to the Financial department:—

Memorandum by Lieutenant Baddeley, dated 23rd January 1884.

Order—dated 9th February 1884, No. 360 W., Public Works.

The foregoing papers relate to the question of restricting the operations of the Presidency Public Works Workshops in view to their eventual abolition.

2. The subject came prominently under the notice of Government in September 1881, when the Examiner of Public Works Accounts, submitted his annual review of the financial operations of the workshops for the year 1880-81. That report showed that the outturn during the few preceding years had been steadily decreasing, and that from a commercial point of view, the result to be looked for was the entailment of an annual loss on Government. In G.O., No. 3081 W., dated 12th December 1881, Colonel Prendergast, R.E., Superintending Engineer, V Circle, who, as President of the Public Works Stores Committee, had acquired much information in regard to the working of the shops, was requested to report his conclusions on the general question raised as to the future of the workshops, and the best arrangements for execution of work should their closure be decided on.

3. The results of the inquiry which followed are summarised in the printed précis attached to Proceedings of Government, No. 2064 W., dated 12th August 1882, and the Chief Engineer, Public Works Department, in a note printed therewith summed up in favor of abolishing the workshops for the following reasons :—

First.—As being in a condition of chronic deficit ;

Second.—As directly interfering with private enterprise ; and

Third.—As presenting insuperable difficulties in the way of providing for their proper and continuous supervision by a thoroughly trained mechanical engineer.

The Chief Engineer was further of opinion that one of the following three courses seemed open to Government :—

(1). To maintain the shops on much the same footing as at present, though relieved as much as possible of certain items standing against the capital account, so as to admit of their having a better chance in future of working to show a profit,

(2). To get rid of all buildings and plant, and retain only those portions which may be required for the execution of such repairs and trifling matters of manufacture as Executive Engineers cannot have locally executed,

(3). To dispose of the whole concern, and trust to the open market for all manufactures and repairs ;

and, as it was feared that much inconvenience might result from such a drastic measure as the immediate closure of the shops, the Government, on the recommendation of the Chief Engineer, resolved to adopt the second of the alternatives thus placed before them, and called for proposals for carrying it into effect.

4. Those proposals which were submitted in the papers printed with Proceedings of Government, No. 2488 W., dated 25th September 1882, and generally approved by Government for gradual adoption, may be briefly summarised as follows :—

(*a*) All work to be refused except that required by the Public Works Department, and in the instrument shops.

(*b*) Officers of the Public Works Department to abstain as far as practicable from giving orders for work at the shops.

(*c*) The nucleus of a small workshop for departmental purposes to be organized within the present shops.

(*d*) Tenders to be invited for the purchase of the existing buildings and available plant ; and if any such be accepted, the reduced establishment to be removed elsewhere.

(*e*) Inquiries to be made as to whether the mathematical instrument work of the department could be executed at Calcutta.

(*f*) The gradual reduction of the existing establishment.

5. The steps which have since been taken to carry out these measures may thus be briefly stated. Immediate effect was given to (*a*), and, at present, except in special cases, no work is undertaken outside the Public Works Department.

With regard to (*b*), Superintending Engineers were called upon in the Chief Engineer's Circular No. 567 C., dated 9th March 1883, or nearly six months subsequent to the issue of the restrictive orders, to report how far the intentions of Government had been carried out and the result which had thereby accrued, with special reference to the following points :—

1*st.*—To what extent work previously done by the Public Works Workshops had been carried out by other agency.

2*nd.*—Whether any difficulty, either in the shape of increased prices, of delay, or of difficulty in getting work done, had been experienced in carrying out the change.

3*rd.*—If any such difficulty had been experienced, whether it could be removed, and by what means.

4*th.*—If no steps had been taken towards the reduction of demands upon the workshops, what had prevented such steps from being taken.

The majority of the replies to that circular were meagre, but they showed generally that little work had been given to the presidency workshops during the period in question ; that officers of the department anticipated no difficulty or delay in getting work done by private agency ; and that sufficient time had not elapsed for any reliable opinion to be formed as to the full effect of the restrictive orders.

As regards (*c*), nothing definite has apparently yet been done beyond reducing the number of workmen and restricting work.

With respect to (*d*), the contemplated sale of the buildings, &c., completely fell through, not one reasonable offer having been received in reply to advertisements for tenders published throughout India.

With reference to (*e*), an inquiry addressed to the Surveyor General, Calcutta, elicited the reply that the mathematical instrument department there was not in a position to undertake the repair of the mathematical instruments of the Madras Public Works Department, and it was consequently decided, in Proceedings of Government, No. 3183 W., dated 4th December 1882, that the closing of the Madras instrument shop would be premature. It was therefore ordered to be maintained for the present, for the execution of Government work ; the establishment to be regulated solely with reference to the amount of such work likely to be required, and the execution of private work to be discouraged. Subsequently, Messrs. Orr and Sons undertook to repair Government mathematical instruments, and a certain number were sent to them for treatment ; but the result, as reported by Captain Baddeley, was not altogether satisfactory with respect both to quality of work and to price. Messrs. Orr and Sons however maintain that, if a continuity of work were supplied to them, they are confident of overcoming defects due to inexperience, and of ultimately giving entire satisfaction.

With regard to (*f*), some reduction of establishment has taken place ; the apprentices under training to be foremen mechanics have been transferred to the Madras Railway workshops ; and the General Superintendent has submitted statements showing the existing permanent establishment, the number of workmen employed, the duties performed by each man, and the scale of establishment he would recommend for the maintenance of a small workshop for purposes purely departmental.

6. The Government consider that the time has now come when some definite settlement should be arrived at as to the future of the workshops, and they accordingly resolve to appoint a Committee composed of—

Colonel H. L. Prendergast, R.E., Superintending Engineer, V Circle, as President, and

Major C. Bowen, R.E., Deputy Chief Engineer and Under Secretary to Government, Public Works Department.

D. C. Gordon, Esq., Examiner, Public Works Accounts,

Major R. R. E. Drake-Brockman, R.E., Executive Engineer, and

W. Hughes, Esq., B.A., Executive Engineer,

as members, to investigate and report on the questions now pending respecting the Public Works Workshops and Stores. The attention of the Committee will be specially directed to the following points :—

I.—The effects of the restrictive order No. 2488 W., dated 25th September 1882, on the financial position of the workshops.

II.—The extent to which the department has, since the issue of the above quoted order, availed itself of outside agency to meet requirements, and the manner in which work has been executed by such agency.

III.—The extent to which the conditions under which that order was issued have been modified by the commencement of the lines of railway recently sanctioned.

IV.—The inferences to be drawn from the results of the above inquiries, as to the policy to be now pursued, *i.e.*, whether the establishment should be still further reduced, or the shops be closed altogether or re-established, and if so, on what footing.

V.—The circumstances of the mathematical instrument department, and the possibility of limiting its operations.

VI.—The staff to be in future entertained in connection with the Public Works Workshops, and its kindred branches, the Public Works Stores, State Railway Stores, Government Machinery Department, &c.

7. The papers recorded at the head of these Proceedings will be forwarded in original to the Committee, who will be requested to submit the results of their deliberations to Government as early as practicable. Any information required by the Committee will be furnished to them by the officers concerned.
