20TH APRIL 1885, No. 444, REVENUE.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

READ—the following despatch from the Right Honorable the EARL OF KIMBERLEY, Her Majesty's Secretary of State for India, to His Excellency the Right Honorable the Governor in Council, Fort St. George, dated India Office, London, 5th March 1885, No. 2 (Statistics and Commerce):—

With reference to your letter, dated the 6th October 1884, No. 18 (Revenue), and to subsequent telegraphic correspondence, I have to inform you that, on the recommendation of Professor Chandler Roberts, a copy of whose letter (addressed to Mr. W. T. Blanford) is enclosed, I have appointed Mr. P. Bosworth Smith to the post of Government Mineralogist for the Madras Presidency. He has been informed that the appointment will be for three years certain, that the salary is Rs. 500 per mensem, commencing from the date of arrival in India, with a travelling allowance of Rs. 250 per mensem, and that he will receive a first-class passage to Madras, but will not be entitled to a return passage.

2. Mr. Bosworth Smith will proceed to Madras by the steamer leaving London on the 25th instant. An advance of £40 has been made to him in this country.

ORDER—dated 20th April 1885, No. 444, Revenue.

Miscellaneous.

Mr. P. Bosworth Smith, who has been appointed in terms of the foregoing despatch Government Mineralogist in this Presidency, may be expected to arrive at Madras about the end of the current month of April, and His Excellency the Governor in Council deems it desirable to indicate for his guidance the course of procedure that he should in the first instance adopt.

2. As one of Mr. Bosworth Smith's most important duties will be to create in the Central Museum at Madras a perfect index to the mineral wealth of the Presidency, he will, as soon as possible, after entering on his office, go carefully through the collection of minerals that is now there, and having made himself acquainted with that and seen what it embraces—a task that, it is thought, will not occupy him for more than three or four days—he will proceed to Ootacamund, where he will confer with Dr. Bidie and such other officers as Government may instruct him to communicate with, and thereafter receive the further orders of the Government as to how and where he should begin the mineralogical survey of the Presidency, on which he is to be employed.

3. These orders will be guided very much by the suggestions which the knowledge that Mr. Bosworth Smith may have already acquired from books and other

sources of information of the mineralogy of Southern India and his study of the collection in the Museum at Madras may enable him to offer.
