READ—the following papers:—

From Colonel H. L. PRENDERGAST, R.E., Superintending Engineer, V Circle,
to the Chief Engineer for Irrigation, dated Chembrambakam, 10th December
1884, No. 3472.

The head-sluice for the Allangal channel, in South Arcot, sanctioned in G.O.,
No. 175 I., dated 23rd February 1883, has been built. For the channel and head-
sluice there is only one lascar. The head-sluice is in an out-of-the-way place, with
seven sets of shutters and screw-gearing, and the Executive Engineer thinks it is
necessary that there should be a head lascar as sluice-keeper, on Rs. 10, to keep the
gearing clean, and to prevent the ironwork being stolen; to be able also to write
Tamil. An additional lascar, on Rs. 6, is likewise required for six months in each
year, from July to December, to help to work the sluice shutters, and to assist the one
lascar now on the sanctioned establishment, who has more than sufficient work to do
in looking after the 10½ miles of channel.

2. I have the honor to submit, for sanction, a statement of proposition for the
increase of the channel establishment.
