The Chief Engineer desires to call the attention of Officers of the department to the necessity for adverting fully to the previous history of works when submitting Estimates for sanction. This may be most conveniently done on the wrapper or outer sheet of the estimate form, under the head "References", where the entries should show whether the work has been included in any schedule of demands, has been brought forward in budgets for allotment of funds, or has been specially noticed in any Proceedings of Government.

2. Attention to these instructions will insure proper consideration to any claims which works may possess to early provision of funds.
