Bricklayer.—Ram in 6 inches of concrete and bring to a sound, well consolidated state and an even upper surface.

Build the walls in bricks cast from a mould 10″ × 5″ × 3″ well burnt and laid in fine worked slip. Fix all wood-work during the execution of the masonry. Build in English boud. After the roof is on rake out all the joints to the extent of $\frac{3}{4}$ of an inch from the face and point in good mortar composed of one part fresh slacked lime, two parts pounded brick.

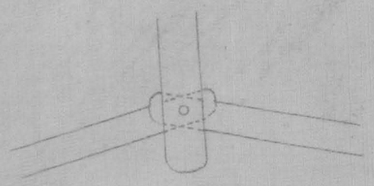
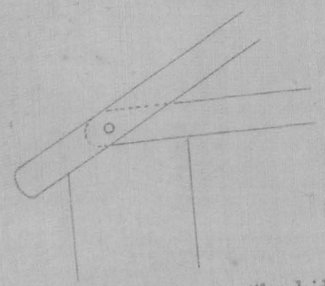
The rafters and upper end of king piece will be spiked with a half inch spike; the lower end of the king piece and the tie in two pieces will also



be spiked. The ties will rest on the wall and the rafters project.



Roofer.—Finish the roof with well-burnt pantiles laid on a bamboo frame in the usual manner. Protect the end and over the division wall with chunam bands.
