the technical question involved in the order to apply funds sanctioned for the Govt House to what appeared to be Educational purposes and he would have failed in his duty if he had not done so.-

3. But the way in which the School has been looked upon by the Local Govt, may be considered legi-timate and on full consideration of the special circumstances of the case, the Governor General in Council is pleased to authorize the School room being treated as one of the subsidiary buildings to Govt House, and its cost admitted against the sanctioned esti-mate.

RESOLUTION.—The classification of revenue and expenditure of Irrigation and Navigation Works adopted in the existing forms of the Budget Estimates of the Public Works Department, Irrigation Branch, having, under recent orders, undergone several changes, a revision of the forms has become necessary. The accompanying revised forms have therefore been prepared in substitution of those issued with Public Works Department Circular, No. 56 of 1879, and it is requested that they may be adopted for the future, commencing with the Budget Estimates for the year 1886-87.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations marginally* noted for information and guidance.

Also, that a copy be communicated to all other Local Administrations and Officers† for information.

The appended notes by the Accountant General, Public Works Department, *viz.*, Nos. 1, 2, 3 and 4 G, dated the 2nd January 1879.

OBSERVATIONS.—The Circulars that have been read again describe the forms and details in which it has been laid down that the Imperial Budgets should be prepared and submitted to the Government of India. It is essential that they should be thus prepared in detail before expenditure is incurred, but, as observed by the Accountant General, such detailed information is not required by the Government of India, and its preparation, long before the time for expenditure has arrived, is a much more difficult matter than making the allotments, as the time for executing the work approaches. This is especially the case in respect of repairs ; and, further, the sanction of a detailed Budget for repairs by the Government of India is of little practical value when items of details are liable to entire revision without further reference, so long as the aggregate is not exceeded. It is desirable therefore to reduce the details of the Budgets to be submitted to the Government of India to such as are really necessary for information before acceptance, and orders as to the amount and nature of outlay to be provided for.

RESOLUTION.—It is resolved that the proposals of the Accountant General be accepted.

2. As to *repairs*, details may be entirely dispensed with, except in the case of works for which a Revenue Account is kept; and, for these, the estimated outlay on the maintenance of each is all that is required.

3. As regards *works* (original), they will be in two classes as regards degree of detail. In the case of Military Works and Other Services the details will be as heretofore. For the capital of Irrigation and Navigation works for which Capital and Revenue Accounts are kept up, the proposed outlay on each
