GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Account.

READ—the following letter from Lieutenant-Colonel D. H. TRAIL, R.E., Officiating Deputy Secretary to the Government of India, Public Works Department (Account—General), to the Secretary to the Government of Madras, Public Works Department, dated Simla, 1st June 1885, No. 138 A.G.:—

I am directed to acknowledge the receipt, with your No. 1020 M.W., dated 29th ultimo, of the final issue of the Imperial Civil Buildings, Roads and Services budget estimate for 1885-86, and to point out that the sum of Rs. 18,500 passed under the head Establishment by the Government of India, in its orders on the budget, should have been exhibited in the final issue instead of the reduced figure of Rs. 18,400.

2. In the table embodied in paragraph 1 of the orders on the budget, the marginally-noted corrections in the details of the figures entered under Original Works for 1885-86 have been necessitated in consequence of the withdrawal of Rs. 8,500 on account of the Calicut post-office having been made from the grant for "Works in progress" instead of from that for "Works not commenced." The necessary corrections have been made by this office in the final issue to effect an agreement between its figures and those in the budget orders.

	As shown in budget orders.	As now corrected.
Original Works—	RS.	RS.
In progress	45,800	54,300
Not commenced ...	26,400	17,900

3. I am to request that the budget head "Civil Buildings, Roads and Services" may be adopted in future instead of "Other Services," which is now obsolete.

ORDER—dated 17th June 1885, No. 1412 W., Public Works.

Communicated to the Examiner of Public Works Accounts.

2. The budget estimates for 1885-86 under Imperial Civil Buildings, Roads and Services will now stand as follow:—

Civil Buildings.

		RS.
Original Works—		
In progress		54,300
Not commenced	Postal	11,900
	Telegraph	6,000
Repairs		8,000
Establishment		18,500
Tools and plant		800
	Total ...	99,500

3. The budget head "Imperial Civil Buildings, Roads and Services" will be adopted in future instead of "Imperial Other Services."

(True Extract.)

Notes of Inspection by
Superintending Engineer
First Circle.

18th November 1885.

Local Fund Road from
Dowlaishweram to Medapad

The surface of this road is
in fair order but might
be improved in places.

The proximity of the very
best material should en-
able this road to be kept
in perfect order with a very
small outlay.

Opposite the Sumpati-
nagaram quarries at about
the 6th and 7th Mile stones, the
road has been very Consi-
derably encroached upon
by the Officers of the Public
Works Department who
have stacked building
stone all along the Road.

The Executive Engineer of the
Eastern Division Godavari
will take early steps to have

the stone removed back a little.

Yerrampalem Quarries.

Loading place near Kesavaram. This loading place has been very satisfactorily Completed and with two powerful Cranes in position will facilitate the removal of the largest stone; there are Some splendid blocks of stone from one to two Cubic yards each lying at the loading place. They are just the description of stone that should be employed on the Cocanada groynes.

Local Fund Road from Medapad to the Juliabaga is in very bad order and should be repaired at an early date. Platforms appear to have been Constructed all along this road for stacking metal on, but these are not used and gravel is heaped up in the most dangerous places such as the steep approaches to Bridges &c.

The approaches to the bridges especially to the bridge over the Juliabaga required to be made up with earth work. The Juliabaga drain requires to be brought down to the Bridge more directly and the Excavation from the bund above the bridge should be placed on the approaches. The Executive Engineer should arrange with the Local Fund Engineer to have this very necessary work done!

The Coping &c. of all the Bridges and Culverts require Repair and it would be well if the Ex. E. Engineer utilized yearly a small portion of the allotments

G.O. No 2786 W 21-11-85 & file
C.A. W. 30-11-85

on the repair of the masonry works.

From the Juliabaga Drain to the Mundapetta Canal and from thence to Jagannathagiri the road is in good order.

20th November 1885

4 The road from Jagannathagiri round by Draksharam to Ramchendrapur is in good order; but the approaches to the Bridge over the Injeram Canal are in very bad order: material has apparently been collected for repairing this.
