Current No. 9547 ²²⁵ *K*Letter No. 5976Dated the 30th October, 1885From the Secy to Govt - (P.W. Dept)

NOTE OF REMARKS.

The accompanying plans and estimate provide for constructing an office for the "General Duty Deputy Collector" at Puthur in the South Banara district.

The estimate amounts to Rs. 10,960.

2. The building is to be erected on the lines of the standard design sanctioned in G.O. No. 400 of the 3rd May/77 with certain modifications to meet the suggestions of the collector and to suit the climate of the West Coast. An examination of the design submitted shows that the chief of the proposed alterations are the substitution of pitched roof for gabled roof roofing and the increasing of the width of the verandah to 10 feet. Subject to approval

the climate of the West Coast fully warrants the adoption of these alterations by causing them to be very suitable and desirable improvements of the standard design. - The changes proposed to be effected in the dimensions of all the rooms are probably due to the suggestions of the collector as well as partly to the altered description of roofing adopted. The increased depths of foundation and increased heights of basement are of course occasioned by site requirements. Additional stairs are provided at both ends of the building and relieving arches over the doors and windows. - The masonry is to be laterite stone in mortar. The roofing is to be of Mission tiles with plank ceiling over teakwood rafters and trusses. Wooden fittings are provided for the court rooms, raised dais, a witness box and a prisoners box.

The common and
jack rafters should
be $3\frac{1}{2} \times 5$ " and the
beam should be 9×12 "

A Tiers should be
intended for the
mainstays of the column.

10/11/85

3. The scantlings of the common and jack rafters and of the beams spanning the clerks room must be corrected. The cross section allowed the common and jack rafters is $2\frac{1}{2} \times 5$ " this must be changed to, at the least, 3×5 ". The cross section given to the beam is 4×8 " while considering its length and importance its cross section may fairly be 9×12 ". Subject to approval the introduction of a wrought iron column into the private room is a mistake which should be rectified. Might not the object the column is intended to serve be better answered by prolonging the ridge piece to meet the angle of junction of the hip rafters with a stay couple (or truss if preferred) underneath? - The item in cut stone work of "over pillars" is a mistake. The rates are fair. 4. The estimates and plans of the office have been counter signed.

by the collector of the district
and have been approved
by the Revenue Department.

10/11/85
In order that
the points asserted to be
I in his hands, shall
be noted, in sanctioning
the estimate -

8

Under his order,
this estimate is to L.O.
with B until the
Budget programme for
1886-87 has been
decided.

The work should
be brought forward
by B in the list to
be discussed in Com-
mittee, & if it be
found possible to
allow the full amount
of the estimate, the
latter will be
sanctioned.

C
16/11/85

The full amount of the
estimate has been demanded
by the S.D., so that the work
can be sanctioned if the money
can be given. C
