Not to be folded or roughly handled

12TH FEBRUARY 1885, No. 327 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General
Account.

RECE—the following letter from Lieutenant-Colonel H. M. VIBART, R.E., Superintending Engineer, III Circle, to the Chief Engineer, Public Works Department, dated Bellary, 9th February 1885, No. 2227.

With reference to G.O. No. 3120 W., dated 19th December 1884, I have the honor to report that the excavation of the well therein sanctioned has been discontinued in consequence of Chemical Examiner of Madras having pronounced the water to be unfit for drinking purposes as containing an extra quantity of nitric acid or ammonia.

2. An outlay of Rs. 202 has been incurred in opening out the well in question, which will remain as a fixed charge against the work.

3. Another well has been opened out in the discharge channel of the same tank, and, as its water has proved of a good quality, it is proposed to sink it ten feet 16 feet below the surface. The well will be merely opened out and provided with clay stones for the natives to pump on when drawing out the water. The cost of this work is estimated at Rs. 124.

4. The Collector is, I hear, arranging to carry out more works of this sort from municipal funds.

5. Deducting Rs. 223, the cost of works referred to in paragraphs 2 and 3, from the allotment of Rs. 1,000, a balance of Rs. 577 will be left unutilised, and this amount may be resumed.

ORDER—dated 12th February 1885, No. 327 W., Public Works.

The sum of Rs. 577, surrendered from the current year's appropriation for sinking a well in Brahaspetrah tank at Bellary, is resumed and added to the Provincial reserve with Government.

Sir,

Enclosures.

With reference to Lgt. 10.3120 W dated
19th December 1884, I have the honor to report
that the excavation of the well therein com-
menced has been discontinued in consequence
of Chemical Examiner of Madras having
pronounced the water to be unfit for drinking
purposes as containing an extra quantity of
nitric acid or ammonia.

2. An outlay of Rs. 292 has been incurred in
opening out the well in question which will
remain as a final charge against the work.

3. Another trial well has been opened
out in the discharge channel of the same tank,
and as its water has proved of a good quality,
it is proposed to sink it to a depth of 10 feet
below the surface. The well will be ...
opened out and provided with slab stones for the

Station to stand on when drawing out the water.
The cost of this work is estimated at Rs. 135.

4. The Collector is being arranged to carry
out more works of this sort from Municipal
Funds.

5. Deducting Rs. 423 the cost of works referred
to in paras 1 and 3 from the allotment of
Rs. 1000, a balance of Rs. 577 will be left unutilised
and this amount may be resumed.

I have the honour
to be
