GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Military Works.

READ—the following papers :—

From Brigadier-General R. C. STEWART, Quartermaster-General, to the Secretary to Government, Military Department, dated Ootacamund, 17th February 1885, No. 594 A.

I have the honor, by order of His Excellency the Commander-in-Chief, to submit, for the consideration of Government, the Letter No. 5982, dated 12th February 1885, forwarding estimate (Rs. 1,040) for the construction of a new bed for the boiler attached to the bakery at Madras. Correspondence, as per margin, from the Commissary-General, forwarding estimates, amounting to Rs. 1,040 and 450, respectively, for certain works to the Government bakery at Madras.

2. The Commander-in-Chief quite concurs with the Commissary-General in his opinion as to the urgent necessity for these works. The importance of ensuring a supply of pure bread to the troops cannot be denied, and, as at present the steam bakery is being worked with only one boiler, any accident to which would at once stop the preparation of bread material for the whole of the troops in the garrison of Madras, His Excellency hopes that, with a view of averting such a calamity, a special grant will be sanctioned for the works in question.

3. The Commander-in-Chief regrets he is unable to recommend an alienation of funds from any of the important works for which grants have been allotted, and His Excellency trusts that what has now been represented will satisfy Government of the necessity for making a strong appeal to the Government of India for a special grant for the works in question, the insurance of a proper supply of bread for the troops being so desirable.

No. 885, Military.

I have the honor to forward
an Estimate for the construction
of a new bed for the boiler
attached to the Bakery at

Madras and request the favor of its
being submitted for the sanction of the
Commander in Chief and Government.

2. The work is very urgently needed.
The boiler is one of the two which supply
steam to the Bakery Machinery, it was
removed some months since for
examination and repair and cannot
be replaced in its new position till
funds are provided.

3 Meanwhile the machinery
is being worked with only one boiler,
any accident to which would at once
