

Copy of letter from the Examiner Public
Works Accounts, Madras, to the Superintending
Engineer S. G. Girdle, dated 21st April 1886.

Before sending you your letter of
13th April 1886 to the Chief Engineer, I have
the honor to point out that if as stated by
you, the value of the timber from which the
puttings were obtained, was already charged
off to works, the puttings could have had
no book value, and hence there can be
no loss to write off.

Copy of letter from the Superintending
Engineer 5th Circle to the Examiner
Public Works Accounts Madras No 333
dated 8th May 1886.

With reference to your letter No 32 dated
21st Ultimo, I have the honor to state that
the cuttings have a book value. The actual
quantity of wood used in any work is charged
off to it and not the cuttings. The cuttings
are kept separate and valued at the end
of the year at 50 to 75 per cent of the value of
the original log. This is then set down
as the book value of the cuttings and if
the amount realized by the sale of the
cuttings be less than this book value, the
difference has to be written off to "Profit
and Loss".
