Civil Works.

READ—the following letter from Colonel ROSS THOMPSON, R.E., Executive Engineer, in charge Consulting Architect division, to the Chief Engineer, Public Works Department, dated Chepauk, 16th June 1886, No. 370:—

I have the honor to report that in laying out the new fishing village to the west of the Buckingham canal, according to the enclosed plan, it was found that the limits between the canal and temple lands formed a very irregular line, in some places approaching within $7\frac{1}{2}$ feet of the canal and in other points receding so far away as 83 feet from it.

2. As the village could not be laid out in this irregular way, after ascertaining from the sub-divisional officer of the canal that a margin of 20 feet will be enough for canal spoil, this space has been left, and 15 feet more for a pathway, making a total of 35 feet from margin of canal to the west side of the pathway, and the village laid out outside of this margin.

3. As by this arrangement some of the temple land is included within the margin of 35 feet left for the canal, while some of the Government land outside this margin is included within the new village, the dharmacartas suggest that there should be a mutual exchange of land; all within the limit of 35 feet becoming canal or Government land, and all outside becoming temple land. By this arrangement the dharmacartas will receive 1,849 square feet more than they make over; for this they are willing to pay at the same rate as land was purchased from them for the canal.

4. I beg to recommend the proposal, and, if the Government approve of the same, that the deputy collector may be requested to arrange for the transfer of the lands.

5. The plan now forwarded explains the matter clearly.

ORDER—dated 24th June 1886, No. 1603 W., Public Works.

The proposals of the Consulting Architect are approved. The transfer will be carried out in communication with the deputy collector, Madras.

Endorsement thereon, in the Educational Dept.,	" 9th January 1885	" 49.
Letter from the Consulting Architect to Govt.,	" 20th March "	" 1841.

ORDER—dated 23rd April 1885, No. 959 W., Public Works.

The above correspondence relates to a proposal which has been brought forward for the erection of boarding-houses for the native students attending the presidency college. The question comes before the Public Works Department in reference to the site for the buildings.

2. The boarding-house committee originally * proposed a site within the Chepak

* Paragraph 3 of the letter printed with proceedings of the Director of Public Instruction, No. 4542, dated 29th June 1883.

† Letter No. 209, dated 18th December 1884.

park, along the west bank of the canal, behind the presidency college, and extending from Pycroft's road northwards. The Principal of the college subsequently suggested † the fishing village on the beach in immediate proximity of the college.

3. In forwarding this last suggestion, the Director of Public Instruction remarked that, if the site were taken up by Government and, after being laid out, were offered at a nominal quit-rent for a long period of years to a committee undertaking to establish a boarding-house, to be built according to plans approved, and conducted according to principles laid down by Government, possibly the offer might be accepted. Mr. Grigg also alluded to the advantage to the neighbourhood which would result from the removal of the unsightly collection of houses forming the fishing village in question.

4. The Consulting Architect estimates that the cost of removal of the village to another site, which he indicates, and the acquisition of the land, would amount to about Rs. 26,500.

5. The improvement to Madras from the removal of the existing village would be so great that, in the opinion of Government, efforts should be made to secure the land. The cost, as estimated by the Consulting Architect, is apparently reasonable; and that officer is now authorised to enter into negotiations for the acquisition of the property. The Government desire that the fishermen in occupation should be liberally dealt with. The provision of funds will be made in the Financial Department.

6. The Government are not prepared to allot any portion of the land in question for the erection of boarding houses. The site is more adapted for some public building; nor can a site within Chepak park be made available for the erection of boarding houses.

7. The Consulting Architect has suggested that the old ice-house, which is about half-a-mile distant from the presidency college, could be converted into a suitable boarding-house at moderate cost. As the ice-house is private property, the boarding-house committee can arrange for its acquisition without the intervention of the Government, should they deem it advisable to do so.

Do. Deputy Sanitary Commissioner	5th Dec. " 1151.
Do. Deputy Surgeon-General G. BIDIE, M.D., C.R., Sanitary Commissioner, dated 11th January 1886.	

ORDER—dated 25th January 1886, No. 211 W., Public Works.

In their proceedings, dated 23rd April 1885, No. 959 W., the Government sanctioned certain proposals made by the Consulting Architect for acquiring the site of the fishing village to the south of the presidency college, and transferring the village to a new site, west of the canal, at present rented by the Madras Municipality from the dharmakartas of the Sri Parthasarathi Swami temple in Triplicane.

2. After those proposals had received approval, the President of the Municipality drew attention to two objections thereto. First, that the site to which it is proposed to remove the fishermen formed part of a municipal sewage farm, and that, in the event of that part of the farm being taken for the village, the disposal of the sewage would involve difficulty and expense; second, that the location of the village on the site of an old sewage farm seemed objectionable on sanitary grounds.

3. Subsequent to the receipt of Mr. Mackenzie's letter detailing these objections, the question of an alternative site for the fishing village was fully investigated. Several suggestions were brought forward, but to each there appeared to be insuperable objections; and Lieutenant-Colonel Morant's original proposal was apparently the only practicable way out of the difficulty.

4. In order to investigate the objections raised by the President of the Municipality, the Chief Engineer, Public Works Department, reports that he met the President and the Vice President of the Municipality at the proposed site in November 1885, when the whole question was fully considered. It was ascertained that the area now available for the Triplicane sewage farm is inadequate for the disposal of the sewage which is now conveyed there; that a considerable quantity of that sewage now escapes into the canal, and that additional and more complete arrangements for the utilisation of the sewage are absolutely necessary. This being so, the Government are of opinion that the only available course is the construction of a covered drain, to lead the surplus sewage to the Kistnamapett farm (about half-a-mile south of the Triplicane farm), where there is a considerable area of land available for the reception and disposal of sewage.

5. The construction of this covered drain will remove the first of the objections urged by Mr. Mackenzie against the establishment of the fishing village on the site recommended by Lieutenant-Colonel Morant, inasmuch as the area available at Kistnamapett is sufficiently large to allow of the surrender by the municipality of the site required for the village.

6. The second objection, on sanitary grounds, to the establishment of the village on a site which has been used for purposes of a sewage farm, has been referred to the Sanitary Commissioner, who is of opinion that there are no objections to the measure from a sanitary point of view, provided that the site be raised with sand, as contemplated by the Public Works Department, and that the sewage be diverted in the manner indicated in paragraph 4 of this order.

7. On full reconsideration of the subject, the Government resolve that the orders already issued in G.O., No. 959 W., dated 23rd April 1885, shall stand; and that the municipality be directed, in the Financial Department, to take immediate measures to prevent the further fouling of the canal by the escape into it of sewage from the municipal drains; and with that object to construct without delay a covered drain for the purpose of conducting the sewage from the Triplicane siphon well to their farm at Kistnamapett.

8. A sum of Rs. 26,500 has been provided in the Provincial budget for 1886-87 to meet the estimated expenditure connected with the removal of the fishing village, and the Consulting Architect will at once make the necessary preliminary arrangements for the acquisition of the site on the beach. With respect to the covered drain to be constructed by the municipality, the Government will be willing to contribute from Provincial funds one-half the cost, to admit of the work being completed with the least practicable delay. On the municipality reporting what sum can be spent before 31st March 1886, an allotment of funds will at once be made as an advance towards the Government contribution.

9. The present open drain, which intersects the sewage farm, should be converted into a covered drain leading to the siphon well by a new line skirting the site of the proposed village. This work should be undertaken first, and its cost may be included in the total amount to be shared by the Government and the municipality.

READ—the following papers :—

From R. F. CHISHOLM, Esq., Consulting Architect to Government, to the Chief
Engineer, Public Works Department, dated Chépák, 21st January 1886,
No. 1502.

I have the honor to inform you that I had an interview with the deputy collector
of Madras on the subject of the intended purchase of the fishing village adjoining the
presidency college.

2. The deputy collector gave me to understand that there would be no objection
to the land in question being purchased by this office by private negotiation, but
inasmuch as the dharmakartas to the temple are merely trustees, it would be safer
to acquire it under the Land Acquisition Act through the Revenue officer of the district.
This, he assured me, could be done without any additional expense to the State.

3. In regard to the compensation to the fishermen, the deputy collector is of
opinion that the fishermen should not be given any compensation in cash but that the
Government should have the huts or houses, as the case may be, constructed and
made over to them. This may cost the State a little more as the compensation
estimated for in this office letter, No. 1841, dated 20th March 1885, does not allow
that margin of liberality contemplated in G.O., No. 959 W., dated 23rd April 1885.

4. The measurement of the village according to the survey made by this office
does not agree with the measurements of the temple authorities. This office estimated
for 80 grounds, the dharmakartas claim 85 grounds. The differences will be
reconciled by further measurements and the matter reported to Government.

5. I shall feel obliged if you will authorize me officially to proceed with the work
and to obtain the rails for the tramway on loan.

From the Consulting Architect to Government, dated 23rd January 1886, No. 1524.

ORDER—dated 27th January 1886, No. 231 W., Public Works.

With advertence to G.O., No. 211 W., dated 25th January 1886, the Consulting
Architect is authorised to commence at once, with the consent of the Madras Muni-
cipality, the work of raising with sand the site to which it is proposed to remove
the fishing village south of the presidency college. With that object, the portable
railway now available in the Public Works Stores should be laid without delay, and
early application should be made for funds required during the current official year.

2. The Consulting Architect's proposals to acquire under the Land Acquisition Act the land on which the fishing village now stands, and to construct by Government agency the huts or houses for the fishermen on the new site, are approved.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following papers :—

G.O., dated 1st April 1886, No. 2095, Revenue.

Read—again the following G.O., dated 19th March 1886, Mis. No. 1796.

Read—the following memorandum from the Public Works Department, dated
18th March 1886 :—

In forwarding the accompanying survey map, the undersigned has the honor to state that it is the desire of the Government in the Public Works Department that the municipal sewage farms A/1 and A/2 should be closed, and the municipal burial ground A/3 moved to some other locality. As compensation to the municipality, it is proposed to hand over to them the plots marked C/1, C/2 and C/3.

C/1 is understood to be canal land in charge of the Public Works Department and may be utilised by the municipality as a sewage farm.

C/2 is understood to be Government poramboke and is occupied to a large extent as a municipal burial ground but not, so far as can be traced, under any special order of Government. This land has been partly raised by the municipality.

C/3 is understood to be Government waste and is now being partly raised and partly occupied by the municipality as a cart depot.

The undersigned has the honor to inquire whether there is any objection in the Revenue Department to plots C/2 and C/3 being made over to the municipality, to be used as burial or burning grounds and sewage farms.

The favor of an early reply and the return of the map are requested.

Forwarded to the Collector of Madras for very early report which should be addressed direct to the Secretary to Government, Revenue Department, a copy being submitted to the Board of Revenue.

Read—also the following letter from the Collector of Madras, dated 26th March 1886, No. 776.

With reference to G.O., No. 1796 (map herewith returned), dated the 19th instant, I have the honor to report that I see no objection, from a revenue point of view, to the lands C/2 and C/3 in question being transferred to the municipality.

2. Plot C/2 consists of two blocks of land—one a burial and burning ground in charge of the municipality bearing survey No. 2977 and measuring cawnies 4, ground 23, square feet $4\frac{1}{4}$; and the other a swamp and poramboke No. 286 and cawnies 4, 17 grounds, 2365 square feet in extent, according to scale measurement. There are no records either in this or in the office of the deputy collector throwing light as to when and under what special authority the municipality came by the first block, but is believed that it passed to their control as all the other burial and burning grounds did, when the first municipal law for this town was brought into force.

Plot C/3 is Government land partly surveyed and partly not. The surveyed portion bears survey Nos. 2971 and 2972, measuring together cawnies 2, grounds 4, 2236½ square feet, while the unsurveyed portion is a swamp measuring cawnies 10, grounds 8, and square feet 880.

3. C/1, which is in charge of the Executive Engineer, Buckingham canal, is Government land by purchase for the said canal. This plot consists of portions of survey Nos. 3357, 3391 and 3396, and its total area is cawny 1, grounds 9, and 1240 square feet by scale measurement.

4. The value of the plots C/1, C/2, and C/3 is Rs. 400 a cawny approximately in each case.

Order—dated 1st April 1886, No. 2095, Revenue.

Communicated to the Public Works Department with reference to memorandum from that department, dated 18th March 1886. Government, in this department, see no objection to the transfer of the plots C/2 and C/3 to the municipality.

(True Extract.)

(Signed) J. F. PRICE,
Acting Secretary to Government.

ORDER—dated 19th April 1886, No. 1015 W., Public Works.

The Madras Municipal Commission will be requested, in the Financial Department, to take the requisite steps to close the sewage farms marked A/1 and A/2, and the burial ground marked A/3 in the survey map, and to hand over the land to the Consulting Architect on behalf of the Government.

2. In lieu of those plots, the canal land marked C/1 on the survey map, will be made over to the municipality by the Superintending Engineer, II Circle, for use so long as it may not be required for Government purposes, and the plots C/2 and C/3 will also be transferred to the municipality under orders in the Revenue Department.

3. The Consulting Architect will take the necessary steps, in communication with the Collector, to acquire, on behalf of the Government, the strip of ground within the cemetery enclosure, now the property of a private individual.

4. On taking charge of the sewage farms A/1 and A/2, the Consulting Architect will proceed to lay out the ground as a park in continuation of the site of the fishing village.

5. The burial ground should be planted with shrubs, &c., but the tombs should on no account be interfered with. The enclosure wall should also remain intact for the present.
